Scaled Agile SAFe Release Train Engineer Sample Questions (Q141-Q146):

NEW QUESTION # 141

What does an effective Scrum Master help the team with?

- A. Team metrics
- B. Risk mitigation
- C. Deploying work
- **D. Relentless improvement**

Answer: D

NEW QUESTION # 142

Which of the following is true of Iteration Goals in SAFe?

- A. They provide quantifiable metrics to be used in retrospectives
- B. They describe the value of planned Features and Enablers
- **C. They enable teams to keep aligned with PI objectives**
- D. They provide KPIs for tracking progress and value realization

Answer: C

NEW QUESTION # 143

What are the three key items communicated on the Program Board? (Choose three.)

- **A. Feature delivery dates**
- B. Team velocity
- **C. Milestones**
- D. PI Objectives
- E. Program risks
- **F. Dependencies between teams**

Answer: A,C,F

Explanation:

The Program Board is a visual summary of the Program Increment (PI) planning outputs and is used to communicate key aspects of the plan to stakeholders. According to the SAFe framework, the three key items communicated on the Program Board are:

* Feature delivery dates: These indicate when features are planned to be delivered within the PI.

* Milestones: These are significant events or achievements that are critical to the program's progress and are used to track alignment and progress toward the PI objectives.

* Dependencies between teams: These show the relationships and interdependencies between different teams that need to be managed and coordinated to ensure smooth delivery of features.

These items are essential for creating transparency and alignment across teams and stakeholders, helping to manage risks, and facilitating the resolution of dependencies¹. The Program Board helps in visualizing the work and aids in the coordination of the ART's efforts during the PI².

NEW QUESTION # 144

Which responsibility belongs to the Product Owner?

- A. Testing Features
- B. Assigning PI Objectives
- C. Prioritizing the Team Backlog

Answer: C

Explanation:

The Product Owner (PO) is a key role within the Agile team, primarily responsible for maximizing the value delivered by the team. This is achieved by ensuring that the Team Backlog is aligned with customer and stakeholder needs. The PO's responsibilities include:

- * Defining and prioritizing the Team Backlog: The PO is responsible for building, editing, and maintaining the Team Backlog, which includes writing stories, refining them, and prioritizing them.
- * Balancing demands: The PO must balance the needs of various stakeholders, including customers, business owners, and the development team, to ensure that the team is working on the most valuable work items.
- * Participating in team events: The PO actively participates in team events such as Iteration Planning, Iteration Review, and Iteration Retrospective, where they collaborate with the team to refine and prioritize backlog items.
- * Collaborating with Product Management: The PO works closely with Product Management to ensure that the team's work aligns with the overall product strategy and roadmap.
- * Representing the customer: As the 'voice of the customer,' the PO ensures that the team understands and works towards the customer's needs and preferences.

In summary, the PO's role is crucial in maintaining the flow of value through the prioritization and refinement of the Team Backlog, ensuring that the team consistently delivers features and improvements that meet the customer's needs and align with the strategic goals of the organization.

NEW QUESTION # 145

What does transparency mean in a scrum environment?

- A. Development and Operations teams work together
- B. The team is constantly improving its process
- C. The process is visible to all stakeholders
- D. Team members must immediately share any and all feedback with each other

Answer: C

Explanation:

In a scrum environment, transparency is crucial as it allows all stakeholders to have visibility into the project's progress and challenges. This visibility is essential for trust, timely feedback, and alignment of expectations.

It ensures that everyone has a clear understanding of the work being done, which is fundamental in Agile practices. Transparency in SAFe is achieved through various means, such as making the Program Board visible during PI Planning, conducting System Demos, and summarizing Team PI Objectives into Program PI Objectives for visibility. This approach helps in creating a shared understanding and enables informed decision-making throughout the course of the project.
