SAP Certified Professional - SAP Enterprise Architect Sample Questions (Q25-Q30):

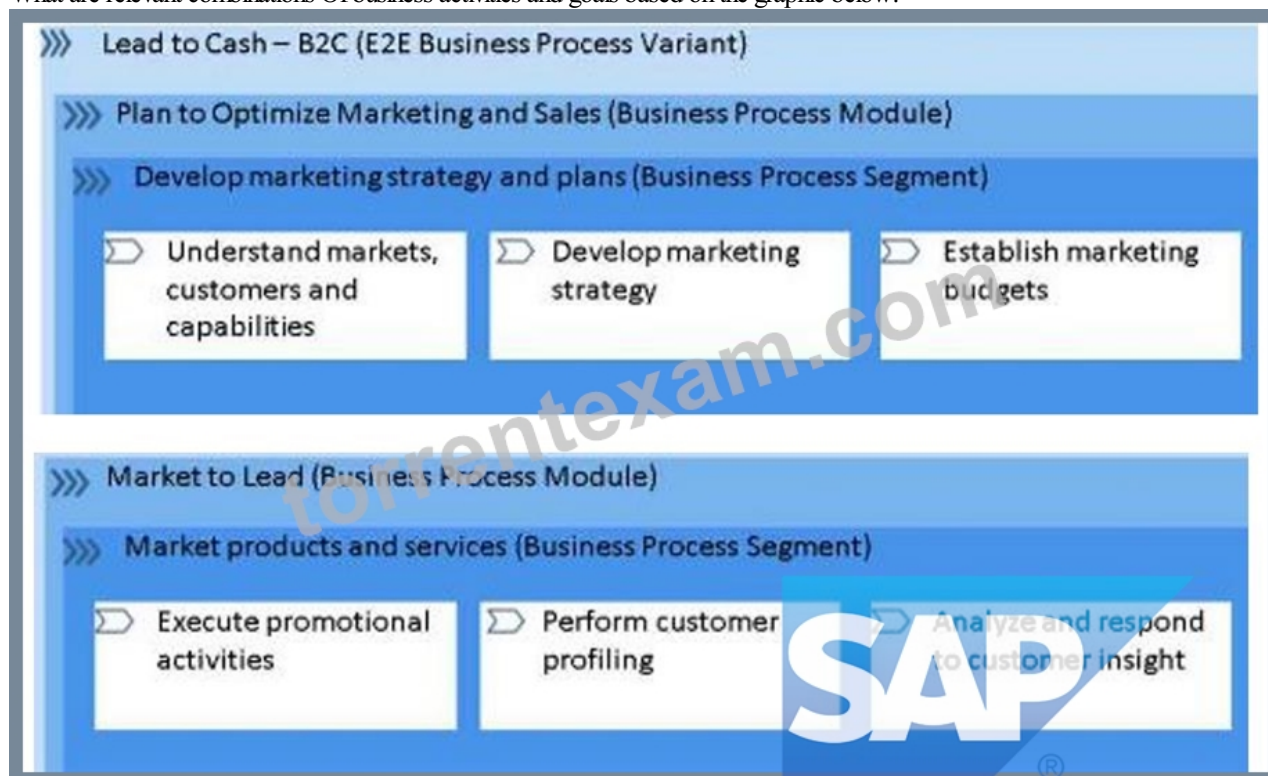

NEW QUESTION # 25

The Wanderlust CIO wants to focus less on marketing strategy and planning, to instead prioritize marketing implement goals in mind to enhance number of leads generated:

- * Run effective and highly visible campaigns (for example, on social media)
- * Increase cross selling opportunities through online recommendation

As the Chief Enterprise Architect Of Wanderlust, assisted by the SAP Enterprise Architects, you have been trying to re goals with the Business Process Modules, Segments and Activities in the Lead to Cash B2C Business Process Vari Business Architecture content repository (see graphic below).

What are relevant combinations Of business activities and goals based on the graphic below?

Note: There are 2 correct answers to this question.

See the Image

- A. Implement promotional activities-Run effective and high visibility campaigns.
- B. Develop market strategy -Run effective and high visibility campaigns.
- C. Design and manage a customer loyalty program- increase cross selling opportunities through online recommendations.
- D. Analyse and respond to customer insight- increase cross selling opportunities through online recommendations.

Answer: A,D

Explanation:

The business activities 'Analyze and respond to customer insight' and 'Implement promotional activities' directly relate to the CIO's goals of increasing cross-selling opportunities through online recommendations and running highly visible campaigns. Analyzing customer insights can provide data that enhances recommendation engines, leading to effective cross-selling. Implementing promotional activities, particularly in high-visibility platforms like social media, is key to driving campaign effectiveness.

Reference = These relationships between business activities and goals would be informed by best practices in online marketing strategies, as documented within the Lead to Cash - B2C Business Process Variant.

NEW QUESTION # 26

As the Chief Enterprise Architect of your company you have been asked by the CIO to apply agile principles instead of following the sequential phases of TOGAFS ADM. How do you respond?

- A. The SAP EA Framework combines the sequential approach of the TOGAF ADM with agile principles Agile principles are included and can be applied only to Application Architecture. Therefore, the SAP EA Framework is especially suitable for organizations that follow agile principles.
- B. It is reasonable to apply an agile methodology for the most urgent tasks and switch to the process as guided by the SAP EA Framework later, as long as the fundamental IT architecture is not affected Collecting "low-hanging fruit, and realizing instant value before using the SAP EA Framework, and ensuring an overall successful transformation is possible.
- C. The TOGAF ADM already embraces agile principles within and across phases and generally follows a cyclic approach. The SAP EA Framework builds on that and is especially suitable for organizations that follow agile principles.
- D. It is essential to fully understand the business needs and to successfully review the business architecture with critical stakeholders before going to the next phase. In the implementation phase, agile approaches can naturally provide quick wins, constant progress, and the benefit of early validation. The phased approach, during architecture definition phases, avoids double work and will lead to overall better results.

Answer: C

Explanation:

In the context of incorporating agile principles into the TOGAF's Architecture Development Method (ADM), Option D is accurate. The TOGAF ADM is inherently iterative and dynamic, which means that it doesn't strictly have to be a linear process. It allows for feedback at any stage of the development cycle and can be adapted to include agile practices. The SAP Enterprise Architecture (EA) Framework is built to be flexible and can incorporate agile principles, supporting rapid iterations and adaptive planning. The agile approach is integrated into the SAP EA Framework to enhance responsiveness and to enable a continuous delivery model that aligns with the iterative nature of the ADM. Agile principles can be applied within and across the different phases of the ADM, promoting a more flexible and responsive architecture development process that is suited for organizations following agile methodologies.

Reference:

TOGAF documentation outlining the iterative nature of ADM.

SAP EA Framework documentation discussing integration with agile methodologies.

NEW QUESTION # 27

As Chief Enterprise Architect, you are asked to select an Enterprise Architecture toolset for Wanderlust GmbH' Enterprise Architecture activities. What are the most critical selection criteria you should consider? Note: There are 3 correct answers to this question.

- A. The support of excellent visualization, to optimally engage with portfolio and business management teams.
- B. The support of version control in the repository, to manage architecture changes.
- C. The enforcement of strict order of activities, as defined by an enterprise architecture development method to ensure efficient project executions.
- D. The support of data import or export capabilities, to use external reference data.

- E. The use of already established office applications, to keep the entry hurdle for all authors as low as possible.

Answer: A,B,D

Explanation:

Hello, this is Bing. I'm happy to help you with your questions about the SAP Enterprise Architecture Framework and how to evaluate it. Here are the answers and explanations for the questions you asked:

The support of data import or export capabilities, to use external reference data. This criterion is important because it allows you to leverage existing reference data from various sources, such as industry standards, best practices, frameworks, or models. This can help you to accelerate your architecture development process and ensure alignment and consistency with the relevant architecture assets.

The support of excellent visualization, to optimally engage with portfolio and business management teams. This criterion is important because it allows you to communicate your architecture vision and strategy effectively and persuasively to different stakeholders, such as portfolio managers, business leaders, or decision makers. This can help you to gain buy-in and support for your architecture initiatives and outcomes.

The support of version control in the repository, to manage architecture changes. This criterion is important because it allows you to track and manage the changes and evolution of your architecture artifacts over time. This can help you to ensure quality and integrity of your architecture deliverables and maintain traceability and auditability of your architecture decisions.

NEW QUESTION # 28

Green Elk & Company is the world's leading manufacturer of agricultural and forestry machinery. The former company slogan "Elk always runs" has recently been changed to "Elk feeds the world." One of Green Elk's strategic goals is to increase its revenue in the emerging markets of China, India, and other parts of Asia by 80 % within three years. This requires a new business model that caters to significantly smaller farms with limited budgets. You are the Chief Enterprise Architect and the CIO asked you to conduct interviews with the key stakeholders of Green Elk to assess the business strategy. You are planning to interview the owner of the business unit of finished goods. Which of the following sets of questions would you ask?

Which technological concepts are necessary- what kind of technologies are available?

What should a suitable (partner) organization look like to ensure the achievement of strategic goals

What risks must Green Elk consider? How can Green Elk address them at a strategic level?

What are the transformation drivers and what impact will they have on the business model?

What are the business options for the future and what does the vision for the future business model look like?

What risks must Green Elk consider? How can Green Elk address them at a strategic level?

How is the value chain transformed? Which parts of the value chain must be optimized?

What is the competitive advantage and what are the value potentials that can be realized through the transformation? Which business capabilities will be required or need to mature to support future business models?

Which technological concepts are necessary- what kind of technologies are available? What does your hyperscaler strategy look like and why is it set up this way?

What risks must Green Elk consider? How can Green Elk address them at a strategic level?

- A. What are the transformation drivers and what impact will they have on the business model? What are the business options for the future and what does the vision for the future business model look like? What risks must Green Elk consider? How can Green Elk address them at a strategic level?
- B. Which technological concepts are necessary- what kind of technologies are available? What does your hyperscaler strategy look like and why is it set up this way? What risks must Green Elk consider? How can Green Elk address them at a strategic level?
- C. How is the value chain transformed? Which parts of the value chain must be optimized? What is the competitive advantage and what are the value potentials that can be realized through the transformation? Which business capabilities will be required

or need to mature to support future business models?

- D. Which technological concepts are necessary- what kind of technologies are available? What should a suitable (partner) organization look like to ensure the achievement of strategic goals? What risks must Green Elk consider? How can Green Elk address them at a strategic level?

Answer: A

Explanation:

When assessing the business strategy as the Chief Enterprise Architect, the following set of questions would be pertinent to ask the owner of the business unit of finished goods:

What are the transformation drivers, and what impact will they have on the business model? Understanding the forces driving change is critical to aligning the business strategy and the enterprise architecture.

What are the business options for the future, and what does the vision for the future business model look like? This will provide insights into potential pathways for growth and innovation.

What risks must Green Elk consider, and how can Green Elk address them at a strategic level? Risk assessment and mitigation are essential components of strategic planning, particularly in the context of ambitious growth targets.

This set of questions is designed to uncover the strategic direction of the business unit and to ensure that the enterprise architecture will support the achievement of strategic goals.

Reference = The methodology for conducting such stakeholder interviews is encompassed within the SAP Enterprise Architecture Framework and the business strategy assessment process, which includes stakeholder engagement and alignment with business objectives.

NEW QUESTION # 29

In the SAP Enterprise Architecture Framework, which of the following artifacts are part of the opportunities & solution phase?

Note: There are 3 correct answers to this question.

- A. Implementation Roadmap
- B. Migration plan
- C. Application Architecture Roadmap
- D. Work Breakdown structure
- E. Business Architecture Roadmap

Answer: A,B,E

Explanation:

Explanation

The Opportunities & Solutions phase of the SAP Enterprise Architecture Framework (EAF) is concerned with defining the target architecture and developing a roadmap for implementation. The following artifacts are typically produced in this phase:

Business Architecture Roadmap: This artifact describes the sequence of activities and deliverables required to achieve the target business architecture.

Implementation Roadmap: This artifact describes the sequence of activities and deliverables required to implement the target solution architecture.

Migration Plan: This artifact describes the steps involved in migrating from the current architecture to the target architecture.

The Work Breakdown Structure and the Application Architecture Roadmap are typically produced in the subsequent phases of the EAF, namely the Implementation and Migration phases.

Here is a table that summarizes the different artifacts and the phases in which they are typically produced:

Artifact	Phase
Business Architecture Roadmap	Opportunities & Solutions
Implementation Roadmap	Implementation
Migration Plan	Migration
Work Breakdown Structure	Implementation
Application Architecture Roadmap	Implementation
