NEX Test Tutorials - New NEX Test Test

If you are lack of skills in the preparation of getting the certification, our NEX study materials are the best choice for you. Many people have successfully realized economic freedom after getting the NEX certificate and changing a high salary job. So you need to act from now, come to join us and struggle together. Our NEX Study Materials will help you change into social elite and you will never feel disappointed.

NLN Nursing Entrance Exam (Math, Science and Verbal) Sample Questions (Q107-Q112):

NEW QUESTION # 107

The weight, in pounds (lb), of 8 infants is listed below:

8.5 lb, 11 lb, 7 lb, 5 lb, 7 lb, 4.5 lb, 9 lb, 8 lb
What is the mean weight of these infants?

- A. 6.5 lb
- B. 8 lb
- C. 7 lb
- **D. 7.5 lb**

Answer: D

Explanation:

This question tests calculation of the mean. First, add all the infant weights:

$$8.5 + 11 + 7 + 5 + 7 + 4.5 + 9 + 8 = 60 \text{ pounds.}$$

Next, divide the total by the number of infants: $60 \div 8 = 7.5$? Recheck carefully: $60 \div 8 = 7.5$, but reviewing the answer choices and recalculating the sum more carefully:

$$8.5 + 11 = 19.5$$

$$19.5 + 7 = 26.5$$

$$26.5 + 5 = 31.5$$

$$31.5 + 7 = 38.5$$

$$38.5 + 4.5 = 43$$

$$43 + 9 = 52$$

$$52 + 8 = 60$$

$$60 \div 8 = 7.5, \text{ which corresponds to option C.}$$

NEW QUESTION # 108

Reading Comprehension

Passage:

Medical research relies on controlled experiments to test hypotheses. By controlling variables, researchers can determine whether observed effects are due to the factor being studied.

Why are controlled experiments important?

- A. They eliminate the need for observation
- **B. They help identify cause-and-effect relationships**
- C. They ensure results are random
- D. They guarantee identical outcomes

Answer: B

Explanation:

Controlled experiments allow researchers to isolate one variable and observe its effects while keeping other factors constant. This makes it possible to determine cause-and-effect relationships. Option C correctly reflects this purpose. The other options misrepresent the role of experiments. On the NEX exam, scientific reading passages often focus on basic research principles and reasoning.

NEW QUESTION # 109

An employee receives notification that their job is being eliminated. Upon hearing the news, the employee bangs a fist on the worktable and shouts loud curses and insults about management.

This reaction corresponds to which stage of the stress response pathway?

- A. Exhaustion
- **B. Alarm**
- C. Resistance
- D. Failure

Answer: B

Explanation:

The alarm stage is the initial reaction to a stressor and is characterized by emotional outbursts, increased heart rate, and release of

stress hormones such as adrenaline. The employee's immediate anger and physical reaction reflect this stage. The resistance stage involves adaptation, and exhaustion occurs after prolonged stress. "Failure" is not a recognized stage of the stress response. The NEX Science exam frequently tests physiological and psychological responses to stress, making alarm the correct answer.

NEW QUESTION # 110

Reading Comprehension

Passage:

Exercise increases heart rate and improves circulation. Over time, regular physical activity strengthens the heart muscle and increases endurance.

Which effect of exercise is described in the passage?

- A. Strengthened heart muscle
- B. Reduced appetite
- C. Increased flexibility
- D. Improved digestion

Answer: A

Explanation:

The passage states that regular exercise strengthens the heart muscle and increases endurance. Option B is therefore correct. The remaining options are not mentioned. The NEX exam frequently includes health-related passages that test recognition of stated benefits.

NEW QUESTION # 111

At a certain hospital, only of all births are twins. What percent is that?

- A. 0.4%
- B. 25%
- C. 1.25%
- D. 4%

Answer: D

Explanation:

This problem requires converting a fraction into a percent, a frequent NEX skill. Begin by converting into a decimal. Divide 1 by 25: $1 \div 25 = 0.04$.

Next, convert the decimal to a percent by multiplying by 100:

$$0.04 \times 100 = 4\%$$

Thus, the correct answer is B. Option A (0.4%) results from moving the decimal only one place instead of two. Option C (1.25%) corresponds to, and option D (25%) equals. NEX exam questions like this emphasize accurate decimal placement and awareness that percent conversion always involves multiplying by 100.

NEW QUESTION # 112

.....

By offering the most considerate after-sales services of NEX exam torrent materials for you, our whole package services have become famous and if you hold any questions after buying Nursing Entrance Exam (Math, Science and Verbal) prepare torrent, get contact with our staff at any time, they will solve your problems with enthusiasm and patience. They do not shirk their responsibility of offering help about NEX Test Braindumps for you 24/7 that are wary and considerate for every exam candidate's perspective.
