Pass Guaranteed Quiz 2026 Fortinet NSE7_EFW-7.2: Fortinet NSE 7 - Enterprise Firewall 7.2 – Valid Valid Test Book

Giving its customers real and updated Fortinet NSE 7 - Enterprise Firewall 7.2 (NSE7_EFW-7.2) questions is Actual4test's major objective. Another great advantage is the money-back promise according to terms and conditions. Download and start using our Fortinet NSE7_EFW-7.2 Valid Dumps to pass the NSE7_EFW-7.2 certification exam on your first try.

Fortinet NSE 7 - Enterprise Firewall 7.2 Sample Questions (Q55-Q60):

NEW QUESTION # 55
Exhibit.

```
config system central-management
    set type fortimanager
    set fmg "10.0.1.242"
    config server-list
        edit 1
            set server-type rating
            set addr-type ipv4
            set server-address 10.0.1.240
        next
        edit 2
            set server-type update
            set addr-type ipv4
            set server-address 10.0.1.243
        next
        edit 3
            set server-type rating
            set addr-type ipv4
            set server-address 10.0.1.244
        next
    end
    set include-default-servers enable
end
```

Refer to exhibit, which shows a central management configuration

Which server will FortiGate choose for web filter rating requests if 10.0.1.240 is experiencing an outage?

- A. 10.0.1.242
- B. 10.0.1.244
- C. 10.0.1.243
- D. Public FortiGuard servers

Answer: B

Explanation:

In the event of an outage at 10.0.1.240, the FortiGate will choose the next server in the sequence for web filter rating requests, which is 10.0.1.244 according to the configuration shown in the exhibit. This is because the server list is ordered by priority, and the server with the lowest priority number is chosen first. If that server is unavailable, the next server with the next lowest priority number is chosen, and so on. The public FortiGuard servers are only used if the include-default-servers option is enabled and all the custom servers are unavailable. References := Fortinet Enterprise Firewall Study Guide for FortiOS 7.2, page 132.

NEW QUESTION # 56
Refer to the exhibit which shows config system central-management information.

```
config system central-management
    set type fortimanager
    set allow-push-firmware disable
    set allow-remote-firmware-upgrade disable
    set fmg "10.1.0.241"
    config server-list
        edit 1
            set server-type update
            set server-address 10.1.0.241
        next
    end
    set include-default-servers disable
end
```

Which setting must you configure for the web filtering feature to function?

- A. Configure server-type with the rating option
- B. Configure securewf.fortiguard.net on the default servers
- C. Add server.fortiguard.net to the Server list
- D. Set update-server-location to automatic

Answer: A

Explanation:
For the web filtering feature to function effectively, the FortiGate device needs to have a server configured for rating services. The rating option in the server-type setting specifies that the server is used for URL rating lookup, which is essential for web filtering. The displayed configuration does not list any FortiGuard web filtering servers, which would be necessary for web filtering. The setting set include-default-servers disable indicates that the default FortiGuard servers are not being used, and hence, a specific server for web filtering (like securewf.fortiguard.net) needs to be configured.

NEW QUESTION # 57
You want to block access to the website ww.eicar.org using a custom IPS signature.
Which custom IPS signature should you configure?

- A.

  F-SBID(--name "detect_eicar"; --protocol tcp; --service ??; --flow from_server; --pattern "eicar"; --no_case;)

- B.

  F-SBID(--name "detect_eicar"; --protocol udp; --service ssl; --flow from_client; --pattern "www.eicar.org"; --no_case; --context host;)

- C.

  F-SBID(--name "eicar"; --protocol tcp; --service HTTP; --flow from_client; --pattern "www.eicar.org"; --no_case; --context host;)

- D.

  F-SBID(--name "eicar"; --protocol udp; --flow from_server; --pattern "eicar"; --context host;)

Answer: C

Explanation:
Option D is the correct answer because it specifically blocks access to the website "www.eicar.org" using TCP protocol and HTTP service, which are commonly used for web browsing. The other options either use the wrong protocol (UDP), the wrong service (DNS or SSL), or the wrong pattern ("eicar" instead of "www.
eicar.org"). References ≔ Configuring custom signatures | FortiGate / FortiOS 7.4.0 - Fortinet Document Library, section "Signature to block access to example.com".

NEW QUESTION # 58

Refer to the exhibit, which shows a routing table.

Network ⇕	Gateway IP ⇕	Interfaces ⇕	Distance ⇕	Type ⇕
0.0.0.0/0	10.1.0.254	port1	10	Static
10.1.0.0/24	0.0.0.0	port1	0	Connected
10.1.4.0/24	10.1.0.100	port1	110	OSPF
10.1.10.0/24	0.0.0.0	port2	0	Connected
172.16.100.0/24	0.0.0.0	port8	0	Connected

What two options can you configure in OSPF to block the advertisement of the 10.1.10.0 prefix? (Choose two.)

- A. Disable Redistribute Connected
- B. Configure a distribute-list-out
- C. Remove the 16.1.10.C prefix from the OSPF network
- D. Configure a route-map out

Answer: B,D

Explanation:
To block the advertisement of the 10.1.10.0 prefix in OSPF, you can configure a distribute-list-out or a route- map out. A distribute-list-out is used to filter outgoing routing updates from being advertised to OSPF neighbors1. A route-map out can also be used for filtering and is applied to outbound routing updates2. References ≔ Technical Tip: Inbound route filtering in OSPF usi ... - Fortinet Community, OSPF | FortiGate / FortiOS 7.2.2 - Fortinet Documentation

NEW QUESTION # 59

Exhibit.

CLI script configuration

Script Name	Static Route
Comments	
	0/255
	0/255
Type	CLI Script
Run script on	Remote FortiGate Directly (...
Script details	

```
# conf rout stat
#      edit 0
#             set gateway 10.20.121.2
#             set priority 20
#             set device "wan1"
#      next
# end
```

Refer to the exhibit, which contains a CLI script configuration on FortiManager.

An administrator configured the CLI script on FortiManager Which statement is true based on the script configuration?

- A. The script successfully added a static route with gateway 10.20.121.2 on the manages device
- B. The CLI scripts failed to execute because of an incomplete command
- C. CLI scripts must start with # l.
- D. The commands are missing d3_cmd at beginning

Answer: B

NEW QUESTION # 60

......

Just like the old saying goes, there is no royal road to success, and only those who do not dread the fatiguing climb of gaining its numinous summits. In a similar way, there is no smoothly paved road to the NSE7_EFW-7.2 Certification. You have to work on it and get started from now. If you want to gain the related certification, it is very necessary that you are bound to spend some time on carefully preparing for the Fortinet exam, including choosing the convenient and practical study materials, sticking to study and keep an optimistic attitude and so on.
