71301T Latest Test Report - 71301T Reliable Test Duration

According to personal propensity and various understanding level of exam candidates, we have three versions of 71301T study guide for your reference. They are the versions of the PDF, Software and APP online. If you visit our website on our 71301T Exam Braindumps, then you may find that there are the respective features and detailed disparities of our 71301T simulating questions. And you can free download the demos to have a look.

Avaya Aura Communication Applications Implement Sample Questions (Q74-Q79):

NEW QUESTION # 74

In the Avaya Session Border Controller for Enterprise (ASBCE) Multi-Server / HA deployments, where do you access the tracesbc tool that displays SIP messages in real-time as they pass through the ASBCE?

- A. from the EMS component / device command line via SSH session using PuTTY
- B. from the EMS web interface
- C. from the SBC component / device command line via SSH session using PuTTY

- D. from the Avaya Aura System Manager (SMGR) web interface, under the Elements > Session Border Controller for Enterprise > Session Border Controller menu

Answer: C

Explanation:

The tracesbc tool is a command-line utility used to capture and display SIP messages in real time. It runs directly on the SBC (Session Border Controller) component, not on EMS or via web interfaces. Therefore, you must SSH into the SBC device (e.g., using PuTTY) to execute it.

NEW QUESTION # 75

Which component converts WebRTC Media Stream to SIP Media Stream?

- **A. STUN/TURN server**
- B. HTTP Reverse Proxy
- C. Avaya Aura Media Server (AAMS)
- D. G.450/430 or G.650 Medpro board

Answer: A

Explanation:

Provisioning Avaya Aura Media Server for the WebRTC Snap-in.

Procedure

1. Log in to the Avaya Aura Media Server Element Manager.

2. Check that Avaya Aura

Media Server nodes and routes are set up correctly.

See Deploying Avaya Breeze™ for details on configuring Avaya Aura Media Server for Avaya Breeze™.

3. Go to System Configuration > Server Profile > General Settings, enable Firewall NAT Tunneling Media Processor and then click Save.

4. Go to System Configuration > Signaling Protocols > SIP > General Settings, enable Always use SIP default outbound proxy, and then click Save.

5. Go to System Configuration > Media Processing > ICE > TURN/STUN Servers > Accounts and create a TURN/STUN account. This account ID and password must match the account created on the Avaya SBCE.

6. Go to System Configuration > Media Processing > ICE > TURN/STUN Servers > Servers to add the TURN/STUN connection to the Avaya SBCE server Etc.

NEW QUESTION # 76

Which statement about SIP Entities being required to support Avaya Aura Presence Services hosted on a single Avaya Breeze server is true?

- A. Only one SIP Entity is required, using the Avaya Breeze server Security Module IP address. This SIP Entity should have the type Avaya Breeze selected.
- B. Only one SIP Entity is required, using the Avaya Breeze server Security Module IP address. This SIP Entity should have the type Presence Services selected.
- C. Two SIP Entities are required, using the same Avaya Breeze server Security Module IP address. One SIP Entity should have the type Avaya Breeze selected, and the other should have the type Other selected.
- **D. Two SIP Entities are required, using the same Avaya Breeze server Security Module IP address. One SIP Entity should have the type Avaya Breeze selected, and the other should have the type Presence Services selected.**

Answer: D

Explanation:

When deploying Avaya Aura Presence Services on a Breeze platform, the Session Manager (SM) needs to distinguish between the general Breeze platform capabilities and the specific Presence Services snap-in application, even though they share the same physical or virtual hardware (and thus the same Security Module IP).

Dual-Entity Requirement: You must create two distinct SIP Entities in System Manager (SMGR).

SIP Entity 1 (Type: Avaya Breeze): This entity represents the platform itself. It is used for general management and common services provided by the Breeze cluster.

SIP Entity 2 (Type: Presence Services): This entity specifically represents the Presence snap-in.

It is required so that the Session Manager can correctly route SIP SUBSCRIBE, NOTIFY, and PUBLISH messages to the Presence engine.

IP Address: Both entities point to the same Security Module IP address of the Breeze server, but the "Type" field in the SIP Entity definition tells Session Manager how to handle the traffic for each.

NEW QUESTION # 77

A field engineer runs the Installation Wizard to install the Avaya Session Border Controller for Enterprise (SBCE). Which statement about the Domain Name Service (DNS) configuration is true?

- A. A DNS address does not need to be configured.
- B. A DNS address always needs to be configured for both the Primary and Secondary DNS, even if only the DNS is available.
- C. A DNS address should not be configured here.
- **D. A DNS address needs to be configured, even if it is unused and/or unreachable.**

Answer: D

Explanation:

The system requires the DNS server to resolve the host names for alarming and remote access name associated with the Avaya Service Center. You must supply a DNS address entry, even if it is unused and/or unreachable.

NEW QUESTION # 78

How does the integration of Presence Services impact the user experience on the Avaya Breeze platform?

- A. Increases system setup time
- B. Reduces system reliability
- **C. Simplifies communication workflows**
- D. Limits customization options

Answer: C

NEW QUESTION # 79

.....

we guarantee to you that our 71301T study questions are of high quality and can help you pass the exam easily and successfully. Our 71301T exam questions boasts 99% passing rate and high hit rate so you needn't worry that you can't pass the exam. Our 71301T Exam Torrent is compiled by experts and approved by experienced professionals and updated according to the development situation in the theory and the practice. Our 71301T guide torrent can simulate the exam and boosts the timing function.
