Latest AP-211 Braindumps Questions, AP-211 Reliable Exam Pattern

Using an updated Salesforce Health Cloud Accredited Professional (AP-211) exam dumps is necessary to get success on the first

attempt. So, it is very important to choose a Salesforce Health Cloud Accredited Professional (AP-211) exam prep material that helps you to practice actual Salesforce AP-211 questions. DumpsReview provides you with that product which not only helps you to memorize real Salesforce AP-211 Questions but also allows you to practice your learning. We provide you with our best Salesforce Health Cloud Accredited Professional (AP-211) exam study material, which builds your ability to get high-paying jobs.

Salesforce Health Cloud Accredited Professional Sample Questions (Q35-Q40):

NEW QUESTION # 35

A customer wants to view a patient's health conditions and clinical encounters as a sequence of events happening over time on the patient's Person Account page.

What should a consultant do to achieve this using the Enhanced Timeline functionality?

- A. Add a record to the HealthCloudTimelineConfig custom setting.
- B. Create a new Timeline record within Setup.
- **C. Create a new Timeline View Configuration record.**
- D. Clone the HCTimeline FlexCard for customization.

Answer: C

Explanation:

* Enhanced Timeline Functionality:

The Enhanced Timeline in Health Cloud displays a sequence of clinical events (e.g., health conditions and encounters) on a patient's Person Account.

Exact Extract:

"To configure the Enhanced Timeline component to show custom event types and adjust the event display, create a Timeline View Configuration record." Reference:

* Other Options:

Timeline records within Setup and HealthCloudTimelineConfig custom setting are not how the Enhanced Timeline is configured for new event views.

Cloning the HCTimeline FlexCard is not required or recommended for this configuration.

NEW QUESTION # 36

Bloomington Caregivers wants to ensure it maintains the privacy of its users' data by enabling data protection details for leads, contacts, and person accounts during the initial Health Cloud install and configuration.

Which entity should the administrator enable within Data Protection and Privacy for Health Cloud to work in this scenario?

- A. Fields
- **B. Records**
- C. Tasks
- D. Objects

Answer: B

NEW QUESTION # 37

Bloomington Caregivers has created and tested its first care plan template in sandbox, which includes problems, goals, and tasks. The company has deployed this template to its final environment using Data Loader.

Which two steps should a consultant recommend, following this deployment, to enable users to successfully leverage this new template?

Choose 2 answers

- **A. Activate the new care plan template.**
- B. Conduct end-user training on the use of the care plan template.
- **C. Confirm User access to Care Plan objects.**
- D. Activate the problems, goals, and tasks associated with the template.

Answer: A,C

Explanation:

Step 1: Requirement Analysis

After deploying a care plan template (including problems, goals, and tasks) via Data Loader to the final environment, users must be able to use the new template for creating care plans in production.

Step 2: Salesforce Health Cloud Documentation Guidance

According to the official Health Cloud administration guide, two key post-deployment steps are required:

1. Confirm User Access to Care Plan Objects

Users must have the correct permissions to view, create, and use care plan templates and related records. This involves assigning the appropriate permission sets or profiles to allow access to the Care Plan, Care Plan Template, and related objects.

Extract:

"Ensure users have the necessary permissions to access care plan templates and related objects so they can view and apply templates to patients' care plans." Administer Health Cloud - Care Plans and Permissions

2. Activate the New Care Plan Template

Templates (and their related records) must be activated after being deployed to make them available for use by end users. Care plan templates in Salesforce Health Cloud have an "Active" status that must be set to "True" or "Activated" before users can select them when creating new care plans.

Extract:

"After importing care plan templates and related data, administrators must activate the template to make it available to care coordinators and clinicians." Administer Health Cloud - Deploying and Activating Care Plan Templates Other Options:

B . Activate the problems, goals, and tasks associated with the template:

Not required as a separate step. When you activate the care plan template, its associated problems, goals, and tasks become available.

D . Conduct end-user training:

While important, it is not a required technical step for enabling the template after deployment.

Verified Answers:

A . Confirm User access to Care Plan objects.

C . Activate the new care plan template.

Reference:

Administer Health Cloud - Care Plan Templates

Administer Health Cloud - User Setup

NEW QUESTION # 38

A new user story requires an OmniScript to update an existing field on a custom SObject.

Which two components should a consultant use to satisfy the requirement?

Choose 2 answers

- A. DataRaptors
- B. API Actions
- C. Integration Procedures
- D. SOQL Query

Answer: A,C

NEW QUESTION # 39

A payer needs to work with plan members and medical providers to influence decisions through a case-by-case review of the appropriateness of care.

When gathering requirements for this use case, which two Utilization Management processes should a consultant discuss with the client?

Choose 2 answers

- A. Designing Care Requests to seek authorization from a health plan for drugs, services, and admissions
- B. Designing Next Best Action and Recommendations for the care management team
- C. Considering the Request Review Types; Prior Authorization Review, Concurrent Review, and Retrospective Review
- D. Considering the number of intake agents who will be using Health Cloud

Answer: A,C

Explanation:
