C-ACDET-2506 Test King & C-ACDET-2506 Practice Tests

In order to help our candidates know better on our C-ACDET-2506 exam questions to pass the exam, we provide you the responsible 24/7 service. Our candidates might meet different problems on C-ACDET-2506 learning guide during purchasing and using our C-ACDET-2506 prep guide, you can contact with us through the email, and we will give you respond and solution as quick as possible. With the commitment of helping candidates to Pass C-ACDET-2506 Exam, we have won wide approvals by our clients. We always take our candidates' benefits as the priority, so you can trust us without any hesitation.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none"> Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 3	<ul style="list-style-type: none"> Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which of the following applies in a Greenfield deployment scenario when migrating configurations from your test site?

- A. You cannot make other configuration updates in ICM when a migration operation is in progress.
- B. The status changes to Complete when migration is finished.
- C. If any configuration type fails during the migration process, you cannot create a new migration request.
- D. You can revert migrated configurations from the target site.

Answer: A,B

Explanation:

During Greenfield migrations using the Intelligent Configuration Manager (ICM), no other configuration updates can be made in ICM while a migration operation is active to ensure stability and consistency of the migration bundle. Additionally, once the migration finishes successfully, the status updates to

"Complete", indicating the configuration is fully migrated and applied.

Contrary to option A, there is no built-in revert or rollback feature in ICM for deployed configurations; changes require new migration cycles. Option D is incorrect because if a migration fails, you can correct the issues and create a new migration request to retry. This process ensures controlled and orderly deployment of configurations.

NEW QUESTION # 47

Users are able to publish a contract workspace without populating the Supplier field. What action can be performed on the Supplier field to force population before publishing?

- A. Configure a validity condition
- B. Enable Required
- C. Configure a visibility condition
- D. Enable Require value before publish

Answer: D

Explanation:

SAP Ariba provides a specific property in the Advanced tab called "Require value before publish", which ensures that a field must be populated prior to the contract workspace being published. Enabling this option on the Supplier field enforces this mandatory behavior during the publish action. The standard "Required" checkbox only enforces field completion in the UI during data entry but

does not prevent publishing if the field is empty. Visibility conditions control whether the field is displayed, not whether it is required at publish. Validity conditions enforce value correctness but not presence at publish time. This feature enhances data completeness at critical lifecycle points.

NEW QUESTION # 48

Which document outlines the roles and responsibilities for the SAP Deployment Lead assigned to your project?

- A. Inline Help
- **B. Deployment Description**
- C. Onboard Resource Center
- D. Partner Statement of Work

Answer: B

Explanation:

The Deployment Description document formally defines the scope, roles, and responsibilities of the SAP Deployment Lead within a specific SAP Ariba project. It provides clarity on tasks such as migration coordination, technical issue resolution, and stakeholder communication. Other documents like the Onboard Resource Center provide logistical support, the Partner Statement of Work focuses on partner deliverables, and Inline Help offers in-application guidance-not role definitions. The Deployment Description is the authoritative reference for deployment lead responsibilities.

NEW QUESTION # 49

During which SAP Activate Methodology phase do you define the customer requirements?

- A. Design
- B. Define
- **C. Explore**
- D. Discover

Answer: C

NEW QUESTION # 50

When you have created a new custom field and marked it as reportable, saved and published your changes, the field does not show up in your reports. How can you resolve the issue?

- **A. You forgot to run the task Retrieve flexible fields metadata for reporting under Manage > Administration > Reporting Manager > Flex Field Reporting**
- B. You need to wait 2 hours for the schema to refresh. Any change to the object model will be automatically synchronized to SAP Ariba Analytics on regular intervals
- C. You created the custom field in a different module. Custom fields must be created in the same module where the reports are generated to show up correctly.
- D. You did not assign the custom field to the appropriate report category. Ensure that the field is linked to the correct category for it to appear in reports.

Answer: A

NEW QUESTION # 51

.....

We hope that you can use your time as much as possible for learning on the C-ACDET-2506 practice questions. So we have considered every detail of the C-ACDET-2506 study guide to remove all unnecessary programs. If you try to download our C-ACDET-2506 study materials, you will find that they are so efficient! And even you free download the demos on the website, you can feel the convenience and efficiency. It is simple and easy to study with our C-ACDET-2506 learning braindumps.
