## CyberArk Defender - PAM Sample Questions (Q141-Q146):

### NEW QUESTION # 141

Assuming a safe has been configured to be accessible during certain hours of the day, a Vault Admin may still access that safe outside of those hours.

- A. FALSE
- B. TRUE

**Answer: A**

### NEW QUESTION # 142

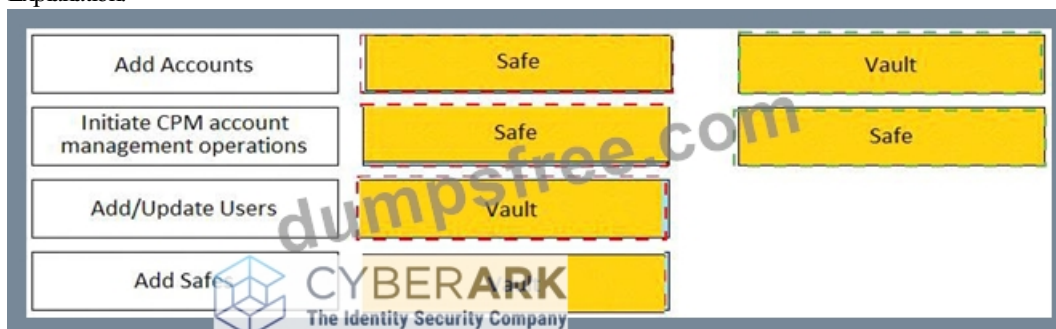

Match each permission to where it can be found.

Add Accounts	Drag answer here	Vault
Initiate CPM account management operations	Drag answer here	Safe
Add/Update Users	Drag answer here	
Add Safes	Drag answer here	

 **CYBERARK**  
The Identity Security Company

**Answer:**

Explanation:

 **CYBERARK**  
The Identity Security Company

Explanation

- \* Add Accounts --> Safe
- \* Initiate CPM account management operations --> Safe
- \* Add/Update Users --> Vault
- \* Add Safes --> Vault

Comprehensive Explanation:

- \* Add Accounts: This permission is associated with the ability to add new accounts to the CyberArk Vault. It is typically found in the Vault's administrative settings where account management is handled.

- \* Initiate CPM account management operations: This permission allows users to initiate operations related to the Central Policy Manager (CPM) for account management within a Safe. It is found in the Safe's permissions settings.
  - \* Add/Update Users: This permission enables the addition or updating of user information in the Vault. It is found in the Vault's user management settings.
  - \* Add Safes: This permission is related to the creation of new Safes in the Vault. It is found in the Vault's administrative settings where Safe management is conducted.
- References:
- \* The permissions and their locations can be referenced in the CyberArk Defender PAM course materials and official documentation, which provide detailed information on the management of permissions within the CyberArk solution.

#### NEW QUESTION # 143

What are the minimum permissions to add multiple accounts from a file when using PVWA bulk-upload?  
(Choose three.)

- A. rename accounts
- B. view safe members
- C. update account content
- D. add accounts
- E. update account properties
- F. add safes

**Answer: C,D,E**

#### NEW QUESTION # 144

The Vault administrator can change the Vault license by uploading the new license to the system Safe.

- A. True
- B. False

**Answer: A**

Explanation:

Explanation

According to the web search results, the Vault administrator can change the Vault license by uploading the new license to the system Safe123. This can be done either from the Vault machine or from a remote machine using the PrivateArk client. The new license file should be named license.xml and replace the current one in the system Safe. This can be done without having to reinstall the Vault or restart the service.

#### NEW QUESTION # 145

You are creating a Dual Control workflow for a team's safe.

Which safe permissions must you grant to the Approvers group?

- A. List accounts, Unlock accounts
- B. Retrieve accounts, Authorize account request
- C. List accounts, Authorize account request
- D. Retrieve accounts, Access Safe without confirmation

**Answer: B**

Explanation:

Explanation

When setting up a Dual Control workflow for a team's safe in CyberArk's Privileged Access Management (PAM), the Approvers group must be granted specific permissions to function effectively within the workflow.

The permissions required for the Approvers group are to 'Retrieve accounts' and 'Authorize account request'.

This allows the Approvers to retrieve the necessary account details and also to authorize requests for access as part of the dual control mechanism. These permissions ensure that the workflow operates smoothly and securely, with the Approvers having the ability to review and approve access requests as needed.
