ACAMS Certified Anti-Money Laundering Specialist (CAMS7 the 7th edition) 認定 CAMS7 試験問題 (Q90-Q95):

質問 # 90

The purpose of a risk appetite statement is to:

- A. help investors understand the risk a financial institution is willing to take.
- **B. clearly define the level of risk exposure to financial crime which a financial institution is willing to take.**
- C. eliminate high-risk business types from a financial institution.
- D. help customers understand which financial institutions may be willing to bank their business.

正解: B

解説:

A risk appetite statement clearly defines the level and type of financial crime risk a financial institution is willing to accept in pursuit of its objectives. It guides decision-making and ensures consistency in risk-taking across the organization.

質問 # 91

In the process of mutual evaluations and subsequent follow-ups used by the Financial Action Task Force (FATF) to assess the quality of various jurisdictions' AML controls, the FATF:

- **A. conducts a peer review process whereby member countries assess the AML controls of other jurisdictions and provide recommendations for improvement.**
- B. imposes economic sanctions on jurisdictions with lax AML controls to force them to strengthen their controls.
- C. conducts on-site inspections of financial institutions in jurisdictions with lax AML controls to identify deficiencies and recommend improvements.
- D. publishes annual reports ranking all member jurisdictions based on their self-assessment of AML controls.

正解: A

解説:

The FATF conducts mutual evaluations-a peer review process-whereby member countries assess each other's AML/CFT systems. This includes on-site visits and reviews by international experts, with public reports containing recommendations for improvement. The process is not punitive and does not impose sanctions.

"FATF mutual evaluations are peer reviews in which experts from member countries assess another member's AML/CFT system and provide recommendations." (CAMS 6th Edition, International AML/CFT Standards; FATF Methodology, Recommendation 40) References:

質問 # 92

Section 319(a) of the USA PATRIOT Act:

- A. Allows the appropriate federal banking agency to require a financial organization to produce, within 120 hours, records or information related to the organization's AML compliance or related to a customer of the organization or any account opened, maintained, administered, or managed in the U.S. by the financial organization.
- B. Requires due diligence, and in certain situations enhanced due diligence (EDD), for foreign correspondent accounts, which includes virtually all account relationships that organizations can have with a foreign financial organization and private banking for non-citizens of the U.S.
- **C. Permits the U.S. Government to seize funds from a correspondent bank account in the U.S. that has been opened and maintained for a foreign bank in the same amount as has been deposited with the foreign bank.**
- D. Provides the U.S. Department of Treasury with the authority to apply graduated, proportionate measures against a foreign

jurisdiction, foreign financial organization, type of international transaction, or type of account.

正解: C

質問 #93

Which statements regarding using network analysis tools to determine links to criminality are true? (Choose three.)

- A. When using network analysis data to fight money laundering and financial crime, data protection and privacy can be disregarded because fighting crime takes precedent
- B. Network analysis allows for the identification of individuals or entities in a network by analyzing connections or links between them and can be used to study a wide range of systems, such as social or transportation networks
- C. Network analysis tools are an efficient means of generating relevant results because they only need a limited amount of data and computation power and artificial intelligence (AI) allows less-skilled people to quickly learn to use these systems
- D. When using artificial intelligence (AI) with network analysis tools, it must be ensured that the algorithms used are not biased towards social criteria, such as race, gender, or religion
- E. Analyzing relationships between individuals in a social network allows for the identification of hierarchies, the detection of behaviors and geographical movements, or an understanding of how groups are organized

正解: B、D、E

解説:

When using network analysis tools, it's important to avoid algorithmic bias toward social criteria to ensure fairness, analyze connections between individuals or entities to identify links and structures, and study relationships within networks to uncover hierarchies, behaviors, movements, and group organization relevant to detecting criminal activity.

質問 #94

Risks associated with real estate transactions include: (Choose two.)

- A. purchases in the name of a natural person
- B. paying true market price for a property
- C. non-financed purchases
- D. cross-border purchases

正解: C、D

解説:

Cross-border purchases increase complexity and risk due to differing regulations and potential anonymity.

Non-financed purchases, especially in cash, can facilitate money laundering by avoiding traditional financial scrutiny.
