Latest NCP-DB-6.10 Cram Materials | Latest NCP-DB-6.10 Exam Price

Facing all kinds of the NCP-DB-6.10 learning materials in the market, it's difficult for the candidates to choose the best one. Our NCP-DB-6.10 learning materials are famous for the high accuracy and high quality. Besides, we provide free update for one year, and pass guarantee and money bach guarantee. We have the free demo for you to know more about our NCP-DB-6.10 Learning Materials. If you have any questions, you can contact our online service stuff.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10

Sample Questions (Q184-Q189):

NEW QUESTION # 184
Which command can be used to assign a static IP address to the Era VM on ESXi?
set
era-server > era
era-server >
An administrator is trying to register an Oracle Database Server VM to Era.
Which dependency must be met?

- A. Enable reQUIREetty setting on the source database
- B. /TEMP folder must have read-only permissions
- C. SUDO NOPASS access is required
- D. set path = /sbin:/bin:/usr/sbin:/usr/bin

Answer: C

Explanation:
To register an Oracle Database Server VM to Era in Nutanix Database Automation (NCP-DB), certain dependencies must be met.
One of these is that SUDO NOPASS access is required. This allows the Era service to perform necessary operations on the Oracle
Database Server VM. As for assigning a static IP address to the Era VM on ESXi, you can use the vSphere Client to configure
static IP settings. However, this is not directly related to the registration of an Oracle Database Server VM to Era. Please note that
these answers are based on the information available as of my last update in 2021 and may need to be verified with the most recent
Nutanix Database Automation (NCP-DB) documentation or resources.

NEW QUESTION # 185
In Nutanix Database Service (NDB), which component is primarily responsible for coordinating database lifecycle tasks such as
deployment, cloning, and patching?

- A. Prism Central
- B. NDB Agent
- C. NDB Controller VM
- D. Calm Blueprint Engine

Answer: C

Explanation:
The NDB Controller VM is the core orchestration component that manages workflows for database lifecycle tasks. The Agent runs
inside DB Server VMs to execute commands, while Prism Central provides general management but not database orchestration.

NEW QUESTION # 186
When provisioning Microsoft SQL Server utilizing database groups, which statement is true?

- A. Microsoft recommends 35 databases within a single database group.
- B. Databases within a database group must be all of the same size.
- C. NDB supports one database group per database server VM or database server cluster
- D. Databases within a database group can share multiple Time Machine configurations.

Answer: D

Explanation:
In NDB, database groups are used to manage multiple Microsoft SQL Server databases collectively, enabling centralized
administration and protection policies. The statement
"Databases within a database group can share multiple Time Machine configurations" is true. A Time Machine in NDB manages
snapshots and log backups for recovery, and a database group can be associated with multiple Time Machine configurations to
support different retention policies or recovery point objectives (RPOs) for the databases within the group. This flexibility allows
tailored data protection strategies.

NEW QUESTION # 187

An administrator needs to deploy multiple SQL Server instances with different CPU and memory allocations but consistent parameter settings. Which NDB object should be reused?

- A. Resource Domain
- B. Database Profile
- C. Time Machine
- D. Software Profile

Answer: B

Explanation:

A Database Profile defines DB-level configuration (parameters, storage layout, etc.). It can be reused across deployments even if hardware resource allocations differ.

NEW QUESTION # 188

An administrator needs to replace the default Nutanix self-signed certificates in Era.
Which SSL Certificate file format is supported?

- A. DER encoded binary X.509
- B. PKCS#12
- C. Base-64 encoded X 509
- D. PKCS#7

Answer: C

Explanation:

According to the Nutanix Database Automation (NCP-DB) learning documents, Nutanix Era supports x509 certificates in Base-64 encoded PEM format. This format is used when an administrator needs to replace the default Nutanix self-signed certificates in Era.

NEW QUESTION # 189

......

The Nutanix NCP-DB-6.10 certification exam helps you in getting jobs easily. Pass4Test offers real NCP-DB-6.10 exam questions so that the students can prepare in a short time and crack the NCP-DB-6.10 exam with ease. These NCP-DB-6.10 Exam Questions are collected by professionals by working hard for days and nights so that the customers can pass NCP-DB-6.10 certification exam with good scores.

Every NCP-DB-6.10 exam practice's staff member is your family they will accompany you to achieve your dream, It is a feasible way but not an effective way for most office workers who have no enough time and energy to practice NCP-DB-6.10 dump torrent, Our NCP-DB-6.10:Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 study guide PDF are updated with the change of the official real exam information, we work on offering the latest, the most complete and the most authoritative NCP-DB-6.10 actual test dumps files with high passing rate, We not only provide you professional latest version of NCP-DB-6.10 dumps torrent but also unconditional 100% money back guarantee.

The drop zone is a trapezoid that covers the right portion NCP-DB-6.10 of the Project panel, SharePoint solution packages are typically thought of as a feature for developers.
