

# Generative-AI-Leader Braindumpsit Dumps PDF & Google Generative-AI-Leader Braindumpsit IT-Zertifizierung - Testking Examen Dumps

P.S. Kostenlose und neue Generative-AI-Leader Prüfungsfragen sind auf Google Drive freigegeben von ZertFragen verfügbar:  
[https://drive.google.com/open?id=1G0NKx\\_0wfOQNQRuO3bqpbNuzJbQxLlP](https://drive.google.com/open?id=1G0NKx_0wfOQNQRuO3bqpbNuzJbQxLlP)

Wenn man an sich glaubt, kann man wirklich was erreichen. Der Grund, warum ZertFragen jedem IT-Fachmann helfen kann, liegt in seiner Fähigkeit. Die Prüfungsmaterialien zur Google Generative-AI-Leader Zertifizierung von ZertFragen können Ihnen zum Erfolg verhelfen. Jede Beschränkung fängt im Herzen an. Wenn Sie die Google Generative-AI-Leader Prüfung bestehen wollen, werden Sie ZertFragen wählen. Eigentlich ist die Distanz zwischen Erfolg und Niederlage nicht weit. ZertFragen führt Sie zum Erfolg.

Sie können im Internet die Demo zur Google Generative-AI-Leader Zertifizierungsprüfung von ZertFragen vorm Kauf als Probe kostenlos herunterladen, so dass Sie unsere Produkte ohne Risiko kaufen. Sie werden die Qualität unserer Produkte und die Freundlichkeit unserer Website sehen. Außerdem bieten wir Ihnen einen einjährigen kostenlosen Update-Service. Sonst erstatten wir Ihnen die gesamte Summe zurück, um die Interessen der Kunden zu schützen. Die Schulungsunterlagen zur Google Generative-AI-Leader Zertifizierungsprüfung von ZertFragen ist anwendbar. Sie werden Ihnen sicher passen und einen guten Effekt erzielen. Sie werden sicher etwas Unerwartetes bekommen.

**Echte und neueste Generative-AI-Leader Fragen und Antworten der Google**

# Generative-AI-Leader Zertifizierungsprüfung

Die Google Generative-AI-Leader Zertifizierungsprüfung ist eine Prüfung, die Fachkenntnisse eines Menschen testet. ZertFragen ist eine Website, die Ihnen zum Bestehen der Google Generative-AI-Leader Zertifizierungsprüfung verhilft. Vor der Prüfung können Sie die zielgerichteten benutzen, werden Sie in kurz Zeit große Fortschritte machen.

## Google Cloud Certified - Generative AI Leader Exam Generative-AI-Leader Prüfungsfragen mit Lösungen (Q26-Q31):

### 26. Frage

A social media platform uses a generative AI model to automatically generate summaries of user-submitted posts to provide quick overviews for other users. While the summaries are generally accurate for factual posts, the model occasionally misinterprets sarcasm, satire, or nuanced opinions, leading to summaries that misrepresent the original intent and potentially cause misunderstandings or offense among users. What should the platform do to overcome this limitation of the AI-generated summaries?

- A. Implement stricter safety settings to filter out potentially misinterpreted content altogether.
- B. Decrease the output length of the summaries to make them more concise.
- **C. Incorporate a human-in-the-loop (HITL) review process to refine the summaries.**
- D. Increase the temperature parameter of the model to encourage more varied and less literal interpretations.

**Antwort: C**

Begründung:

When AI struggles with nuances like sarcasm or satire, human oversight is often the most effective solution. A human-in-the-loop (HITL) process allows human reviewers to check, correct, and refine AI-generated content before it is published, ensuring accuracy and appropriateness, especially for sensitive or complex language.

---

### 27. Frage

A software developer needs a highly efficient, open-source large language model that can be fine-tuned on a local machine for rapid prototyping of a chatbot application. They require a model that offers strong performance in natural language understanding and generation, while being lightweight enough to run on limited hardware. Which Google-developed family of models should they use?

- A. Imagen
- B. Gemini
- **C. Gemma**
- D. Veo

**Antwort: C**

Begründung:

Gemma is Google's family of lightweight, state-of-the-art open models, built from the same research and technology used to create the Gemini3 models. They are designed for developers to build innovative AI applications on their local machines or in the cloud, offering a balance of performance and efficiency suitable for limited hardware and rapid prototyping. Veo is for video generation, Gemini is typically larger and more general-purpose, and Imagen is for image generation.

---

### 28. Frage

A user asks a generative AI model about the scientific accuracy of a popular science fiction movie. The model confidently states that humans can indeed travel faster than light, referencing specific but entirely fictional theories and providing made-up explanations of how this is achieved according to the movie's "established science." The model presents this information as factual, without indicating that it originates from a fictional work. What type of model limitation is this?

- **A. Hallucination**
- B. Data dependency
- C. Knowledge cutoff
- D. Bias

**Antwort: A**

Begründung:

The limitation described is the AI model generating a false or misleading response (humans traveling faster than light is scientifically impossible/unproven) and presenting it as fact (confidently stating a fictional theory is real) without the ability to indicate its uncertainty or the source's fictional nature. This is the definition of a Hallucination in generative AI.

AI Hallucinations occur when a Large Language Model (LLM) generates outputs that are factually incorrect, irrelevant, or nonsensical, despite being linguistically fluent and seemingly plausible. They arise because the model is designed to predict the most statistically probable next word or token based on its training data, even when it lacks information or when its training data contains a mixture of fact and fiction. The model is overconfident in its generated response, a behavior that diminishes user trust and reliability, especially in applications where factual accuracy is critical. While a knowledge cutoff (B) is a common cause of hallucinations when an LLM is asked about recent events, the core limitation of fabricating facts from its own hardwired knowledge is the hallucination itself. Data dependency (A) relates to the model's reliance on the quality and completeness of its training data, and while flawed training data can be a cause, the error mode of inventing facts is the Hallucination.

### 29. Frage

A company wants to choose a generative AI (gen AI) use case that will be successful and have the most impact. What key factor should they determine first according to Google Cloud-recommended practices?

- A. The availability of pre-trained models that are offered on various cloud computing platforms.
- B. The frequency of updates to the underlying foundation models used by different gen AI platforms.
- C. The number of employees who will be trained to use the new gen AI tools.
- **D. The specific business problems the company aims to solve and the desired outcomes.**

**Antwort: D**

Begründung:

A fundamental principle for successful AI adoption, including generative AI, is to start with clear business problems and desired outcomes. Without a well-defined problem, the AI solution might not deliver meaningful value, regardless of the technology used. This "problem-first" approach is crucial for impactful AI strategy.

---

### 30. Frage

What is an example of unsupervised machine learning?

- A. Training a system to recognize product images using labeled categories.
- B. Forecasting sales figures using historical sales and marketing spend.
- C. Predicting subscription renewal based on past renewal status data.
- **D. Analyzing customer purchase patterns to identify natural groupings.**

**Antwort: D**

Begründung:

Unsupervised learning deals with unlabeled data. Identifying "natural groupings" or clusters in customer purchase patterns (e.g., segmenting customers into different buying behaviors without pre-defined labels) is a classic example of unsupervised learning (clustering). Options B, C, and D are examples of supervised learning, as they involve labeled data for training (product categories, renewal status, sales figures).

---

### 31. Frage

.....

Viele IT-Fachleute wollen Google Generative-AI-Leader Zertifikate erhalten. Die IT-Zertifikate werden Ihnen helfen, in der IT-Branche befördert zu werden. Das Google Generative-AI-Leader Zertifikat ist ein beliebtes unter den vielen Zertifikaten. Obwohl es nicht so leicht ist, die Google Generative-AI-Leader Zertifizierungsprüfung zu bestehen, gibt es doch Methoden. Sie können viel Zeit und Energie für die Prüfung benutzen, um Ihr Know-How zu konsolidieren, oder an den effizienten Kursen teilnehmen. Die speziellen Simulationsprüfungen von ZertFragen, die Ihnen viel Zeit und Energie ersparen und Ihr Ziel erreichen können, ist sehr effizient. ZertFragen ist eine gute Wahl für Sie.
