

# SSE-Engineer Exam Simulations | SSE-Engineer New Brindumps Free

BONUS!!! Download part of Dumpcollection SSE-Engineer dumps for free: <https://drive.google.com/open?id=1d1FeNkRArL0XbZN4oGavZ-ltiG2TdkM>

This is where your SSE-Engineer exam prep really takes off, in the testing your knowledge and ability to quickly come up with answers in the SSE-Engineer online tests. Using SSE-Engineer practice exams is an excellent way to increase response time and queue certain answers to common issues. Get SSE-Engineer ebooks from Dumpcollection which contain real SSE-Engineer exam questions and answers. You will pass your SSE-Engineer exam on the first attempt using only Dumpcollection's SSE-Engineer excellent preparation tools and tutorials

If you are worried about your exam, and want to pass the exam just one time, we can do that for you. SSE-Engineer exam materials are compiled by experienced experts, and they are quite familiar with the exam center, and therefore the quality can be guaranteed. In addition, you can receive the downloading link and password within ten minutes, so that you can begin your learning immediately. We provide you with free update for one year and the update version for SSE-Engineer Exam Torrent will be sent to your email automatically.

## SSE-Engineer New Brindumps Free & Pdf SSE-Engineer Exam Dump

Creativity is coming from the passion and love of knowledge. Every day there are many different new things turning up. So a wise and diligent person should absorb more knowledge when they are still young. At present, our SSE-Engineer study prep has gained wide popularity among different age groups. Most of the real exam questions come from the adaption of our SSE-Engineer test question. In fact, we get used to investigate the real test every year. The similarity between our study materials and official test is very amazing. In a word, your satisfaction and demands of the SSE-Engineer Exam brindump is our long lasting pursuit. Hesitation will not generate good results. Action always speaks louder than words. Our SSE-Engineer study prep will not disappoint you. So just click to pay for it.

## Palo Alto Networks Security Service Edge Engineer Sample Questions (Q49-Q54):

### NEW QUESTION # 49

An engineer has configured a Web Security rule that restricts access to certain web applications for a specific user group. During testing, the rule does not take effect as expected, and the users can still access blocked web applications. What is a reason for this issue?

- A. The rule was created with improper threat management settings.
- B. The rule was created in the wrong scope, affecting only GlobalProtect users instead of all users.
- C. The rule was created at a lower level in the rule hierarchy, giving priority to a higher-level rule.
- D. The rule was created at a higher level in the rule hierarchy, giving priority to a lower-level rule.

**Answer: C**

Explanation:

Prisma Access applies security rules in a hierarchical order, where rules at higher levels take precedence over those at lower levels. If a more permissive rule is placed higher in the hierarchy, it may allow traffic before the restrictive Web Security rule is evaluated. To resolve this, the engineer should reorder the rules to ensure the restrictive Web Security rule is positioned higher in the hierarchy so it is applied before any broader or conflicting rules.

#### NEW QUESTION # 50

A malicious user is attempting to connect to a blocked website by crafting a packet using a fake SNI and the correct website in the HTTP host header.

Which option will prevent this form of attack?

- A. Advanced Threat Prevention option to block "Domain Fronting"
- B. Advanced URL Filtering and block the "Malicious Behavior" category
- C. Advanced URL Filtering and block "SNI mismatch with Server Certificate (SAN/CN)"
- **D. SSL Decryption to "Block sessions on SNI mismatch with Server Certificate (SAN/CN)"**

**Answer: D**

Explanation:

This option ensures that SSL Decryption checks for mismatches between the Server Name Indication (SNI) field in the TLS handshake and the Common Name (CN) or Subject Alternative Name (SAN) in the server certificate. If a malicious user tries to bypass content filtering by spoofing the SNI while using the real blocked website in the HTTP host header, this setting will detect the discrepancy and block the session, preventing unauthorized access.

#### NEW QUESTION # 51

How can a senior engineer use Strata Cloud Manager (SCM) to ensure that junior engineers are able to create compliant policies while preventing the creation of policies that may result in security gaps?

- A. Configure an auto tagging rule in SCM to trigger a Security policy review workflow based on a security rule tag, then instruct junior engineers to use this tag for all new Security policies.
- **B. Use security checks under posture settings and set the action to "deny" for all checks that do not meet the compliance standards.**
- C. Run a Best Practice Assessment (BPA) at regular intervals and manually revert any policies not meeting company compliance standards.
- D. Configure role-based access controls (RBACs) for all junior engineers to limit them to creating policies in a disabled state, manually review the policies, and enable them using a senior engineer role.

**Answer: B**

Explanation:

By using security checks under posture settings in Strata Cloud Manager (SCM), the senior engineer can enforce policy compliance standards by automatically denying any security policy that does not align with best practices. This ensures that junior engineers can create policies while preventing configurations that might introduce security gaps. This proactive approach eliminates manual oversight and enforces compliance at the time of policy creation, reducing risk and ensuring consistent security enforcement.

#### NEW QUESTION # 52

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to-business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

The network team must have access to manage only the partner access.

How should Prisma Access be implemented to meet the customer requirements?

- A. Deploy two Prisma Access instances - the first with mobile users, remote networks, and private access for all internal connection types, and the second with remote networks and private application access for B2B connections - and use the specific configuration scope for the connection type to manage access.
- B. Deploy a Prisma Access instance with mobile users, remote networks, and private access for all connection types, and use the Prisma Access Configuration scope to manage all access.
- C. Deploy a Prisma Access instance with mobile users, remote networks, and private access for all connection types, and use the specific configuration scope for the connection type to manage access.
- D. Deploy two Prisma Access instances - the first with mobile users, remote networks, and private access for all internal connection types, and the second with remote networks and private application access for B2B connections - and use the Strata Multitenant Cloud Manager Prisma Access configuration scope to manage access.

**Answer: A**

Explanation:

To meet the customer's requirements, two separate Prisma Access instances should be deployed:

\* Instance 1 should include mobile users, remote networks, and private access for internal connectivity.

This ensures that mobile users can access the internet, data centers, and remote branch locations while enforcing security policies.

\* Instance 2 should be configured with remote networks and private application access for B2B connections. This instance will restrict access to only the required internally developed applications using non-standard ports, ensuring that partners cannot access other corporate resources.

By using specific configuration scopes for different connection types, the security team can manage access to mobile users and branch locations, while the network team can manage B2B partner connections. This ensures proper segmentation of management responsibilities while maintaining security and compliance.

### NEW QUESTION # 53

An intern is tasked with changing the Anti-Spyware Profile used for security rules defined in the GlobalProtect folder. All security rules are using the Default Prisma Profile. The intern reports that the options are greyed out and cannot be modified when selecting the Default Prisma Profile.

Based on the image below, which action will allow the intern to make the required modifications?

- A. Request edit access for the GlobalProtect scope.
- B. Modify the existing anti-spyware profile, because best-practice profiles cannot be removed from a group.
- C. Change the configuration scope to Prisma Access and modify the profile group.
- D. Create a new profile, because default profile groups cannot be modified.

**Answer: D**

Explanation:

Palo Alto Networks best practices and the behavior of Strata Cloud Manager (SCM) dictate that predefined or default objects, including profile groups like "Default Prisma Profile," cannot be directly modified.

These default objects serve as baseline configurations and are often locked to prevent accidental or unintended changes that could impact the overall security posture.

The intern's experience of the options being greyed out when selecting "Default Prisma Profile" is a direct indication of this immutability of default objects.

Therefore, the correct action is to:

\* Create a new Profile Group: The intern should create a new profile group within the appropriate configuration scope (likely GlobalProtect, given the task).

\* Configure the new Profile Group: In this new profile group, the intern can select the desired Anti-Spyware Profile (which might be an existing custom profile or a new one they create).

\* Modify Security Rules: The security rules currently using the "Default Prisma Profile" in the GlobalProtect folder need to be modified to use this newly created profile group.

Let's analyze why the other options are incorrect based on official documentation:

\* A. Request edit access for the GlobalProtect scope. While having the correct scope permissions is necessary for making any changes within GlobalProtect, it will not override the inherent immutability of default objects like "Default Prisma Profile." Edit access will allow the intern to create new objects and modify rules, but not directly edit the default profile group.

\* B. Change the configuration scope to Prisma Access and modify the profile group. The image shows that "Default Prisma Profile" has a "Location" of "Prisma Access." However, even within the Prisma Access scope, default profile groups are generally not directly editable. The issue is not the scope but the fact that it's a default object.

\* D. Modify the existing anti-spyware profile, because best-practice profiles cannot be removed from a group. The question is about changing the profile group, not the individual Anti-Spyware Profile. While "best-practice" profiles might be part of default groups, the core issue is the inability to modify the default group itself. Creating a new group allows the intern to choose which Anti-Spyware Profile to include.

In summary, the fundamental principle in Palo Alto Networks management is that default objects are typically read-only to ensure a consistent and predictable baseline. To make changes, you need to create custom objects.

## NEW QUESTION # 54

.....

Dumpcollection is a wonderful study platform that contains our hearty wish for you to pass the SSE-Engineer exam by our SSE-Engineer exam materials. So our responsible behaviors are our instinct aim and tenet. By devoting in this area so many years, we are omnipotent to solve the problems about the SSE-Engineer learning questions with stalwart confidence. And as long as you study with our SSE-Engineer exam questions, you will find that our SSE-Engineer learning guide is the best for the outstanding quality and high pass rate as 99% to 100%.

**SSE-Engineer New Braindumps Free:** [https://www.dumpcollection.com/SSE-Engineer\\_braindumps.html](https://www.dumpcollection.com/SSE-Engineer_braindumps.html)

Palo Alto Networks SSE-Engineer Exam Simulations We offer the valid preparation material for your good marks at your first try, Palo Alto Networks SSE-Engineer Exam Simulations We are growing larger and larger in these five years and now we become the leading position in this field, Do this, therefore, our SSE-Engineer question guide has become the industry well-known brands, but even so, we have never stopped the pace of progress, we have been constantly updated the SSE-Engineer real study guide, This desktop Palo Alto Networks SSE-Engineer practice test software is compatible with Windows computers.

I'm like, What the hell is this, The role of is always defined, but SSE-Engineer in reality this role is not specifically considered, We offer the valid preparation material for your good marks at your first try.

## 100% Pass Quiz Palo Alto Networks - Professional SSE-Engineer - Palo Alto Networks Security Service Edge Engineer Exam Simulations

We are growing larger and larger in these five years and now we become the leading position in this field, Do this, therefore, our SSE-Engineer question guide has become the industry well-known brands, but even so, we have never stopped the pace of progress, we have been constantly updated the SSE-Engineer real study guide.

This desktop Palo Alto Networks SSE-Engineer practice test software is compatible with Windows computers, Our ability of improvement is stronger than others.
