## Salesforce Data-Architect Valid Exam Pattern & Valid Exam Data-Architect Preparation

We would like to benefit our customers from different countries who decide to choose our Data-Architect study guide in the long run, so we cooperation with the leading experts in the field to renew and update our study materials. Our leading experts aim to provide you the newest information in this field in order to help you to keep pace with the times and fill your knowledge gap. We can assure you that you will get the latest version of our Data-Architect Training Materials for free from our company in the whole year after payment. Do not miss the opportunity to buy the best Data-Architect preparation questions in the international market which will also help you to advance with the times.

Salesforce Data-Architect (Salesforce Certified Data Architect) exam is designed for professionals who specialize in data

architecture and management within the Salesforce ecosystem. Salesforce Certified Data Architect certification validates the knowledge and skills required for designing and implementing scalable, efficient, and secure data solutions using the Salesforce platform. Data-Architect Exam covers a wide range of topics, including data modeling, data integration, data migration, data governance, and data security.

## Salesforce Certified Data Architect Sample Questions (Q60-Q65):

### NEW QUESTION # 60

Universal Container (UC) has around 200,000 Customers (stored in Account object). They get 1 or 2 Orders every month from each Customer. Orders are stored in a custom object called "Order\_c"; this has about 50 fields. UC is expecting a growth of 10% year-over-year. What are two considerations an architect should consider to improve the performance of SOQL queries that retrieve data from the Order\_c object? Choose 2 answers

- A. Make the queries more selective using indexed fields.
- B. Reduce the number of triggers on Order\_c object.
- C. Use SOQL queries without WHERE conditions.
- D. Work with Salesforce Support to enable Skinny Tables.

**Answer: A,D**

### NEW QUESTION # 61

A health care provider wishes to use salesforce to track patient care. The following actions are in Salesforce

1. Payment Providers: Orgs who pay for the care 2 patients.
2. Doctors: They provide care plan for patients and need to support multiple patients, they are provided access to patient information.
3. Patients: They are individuals who need care.

A data architect needs to map the actor to Sf objects. What should be the optimal selection by the data architect?

- A. Patients as Contacts, Payment providers as Accounts, & Doctors as Accounts
- B. Patients as Person Accounts, Payment providers as Accounts, & Doctors as Contacts
- C. Patients as Accounts, Payment providers as Accounts, & Doctors as Person Accounts
- D. Patients as Person Accounts, Payment providers as Accounts, & Doctors as Person Account

**Answer: D**

### NEW QUESTION # 62

Northern Trail Outfitters (NTO) has multiple Salesforce orgs based on regions. Users need read-only access to customers across all Salesforce orgs.

Which feature in Salesforce can be used to provide access to customer records across all NTO orgs?

- A. Federated Search
- B. Salesforce Connect
- C. Salesforce to Salesforce
- D. External APIs

**Answer: B**

Explanation:

Salesforce Connect is a feature that allows users to access data from external sources and multiple Salesforce orgs, using either clicks or code. Salesforce Connect can provide read-only access to customer records across all NTO orgs, without replicating or storing the data in Salesforce.

### NEW QUESTION # 63

NTO has decided to franchise its brand. Upon implementation, 1000 franchisees will be able to access BTO's product information and track large customer sales and opportunities through a portal. The Franchisees will also be able to run monthly and quarterly sales reports and projections as well as view the reports in dashboards.

Which licenses does NTO need to provide these features to the Franchisees?

- A. Lightning Platform license
- B. Customer Community license
- **C. Partner Community license**
- D. Salesforce Sales Cloud license

**Answer: C**

#### **NEW QUESTION # 64**

Universal Containers wants to develop a dashboard in Salesforce that will allow Sales Managers to do data exploration using their mobile device (i.e., drill down into sales-related data) and have the possibility of adding ad-hoc filters while on the move. What is a recommended solution for building data exploration dashboards in Salesforce?

- A. Create a Dashboard in an external reporting tool, export data to the tool, and embed the dashboard in Salesforce using the Canval toolkit.
- B. Create a standard Salesforce Dashboard and connect it to reports with the appropriate filters.
- **C. Create a Dashboard using Analytics Cloud that will allow the user to create ad-hoc lenses and drill down.**
- D. Create a Dashboard in an external reporting tool, export data to the tool, and add link to the dashboard in Salesforce.

**Answer: C**

Explanation:

Creating a Dashboard using Analytics Cloud that will allow the user to create ad-hoc lenses and drill down is a recommended solution for building data exploration dashboards in Salesforce. Analytics Cloud is a powerful data analysis tool that enables users to explore data using interactive dashboards, charts, graphs, and tables on any device. Users can also create lenses, which are ad-hoc data queries that can be saved and reused, and drill down into data details using filters and facets. Creating a Dashboard in an external reporting tool, exporting data to the tool, and adding link to the dashboard in Salesforce will not provide a seamless user experience and may require additional data integration and security considerations. Creating a Dashboard in an external reporting tool, exporting data to the tool, and embedding the dashboard in Salesforce using the Canval toolkit will not provide a native Salesforce solution and may require additional data integration and security considerations. Creating a standard Salesforce Dashboard and connecting it to reports with the appropriate filters will not allow the user to create ad-hoc lenses and drill down into data details on their mobile device.

#### **NEW QUESTION # 65**

.....

We ensure that if you fail to pass your exam by using Data-Architect exam materials of us, we will give you full refund, and the money will be returned to your payment account.
