The clients can try out and download our study materials before their purchase. They can immediately use our ChromeOS-Administrator training guide after they pay successfully.

Google Professional ChromeOS Administrator Exam Sample Questions

(Q104-Q109):

NEW QUESTION # 104
You are tasked with adding a security key to a single user account. Where should you navigate to?

- A. Security > 2-step Verification
- B. Users > Select User > Password
- C. Users > Select User > Security
- D. Security > Password Management

Answer: A

Explanation:
To add a security key to a user account, navigate toSecurity > 2-step Verificationin the Google Admin console. Security keys are part of the two-factor authentication (2FA) setup, enhancing account protection by requiring physical key-based verification.
Verified Answer from Official Source:
The correct answer is verified from theGoogle Workspace Security Guide, which outlines how to add a security key via the 2-step verification settings.
"To add a security key, go to Security settings, select 2-step Verification, and follow the prompts to register a physical security key."
Security keys provide strong, phishing-resistant two-factor authentication, making them ideal for securing sensitive accounts.
Objectives:
* Implement secure authentication methods for users.
* Manage 2-step verification settings.

NEW QUESTION # 105
A customer deploys a large number of ChromeOS devices and would like to start the process of turning on Zero-Touch Enrollment (ZTE) to streamline their deployment process. As an administrator, what would be required to enable ZTE?

- A. Grant partner admin access
- B. identify OU to place devices during enrollment
- C. Create a pre-provisioning token
- D. Create a zero-touch token

Answer: B

Explanation:
Zero-touch enrollment (ZTE) automates the device enrollment process when users first power on their ChromeOS devices. Before you can enable ZTE, you need to determine the organizational unit (OU) where the devices should be placed during enrollment. This is crucial because different OUs can have different policies and configurations applied to them.
* Plan Your OU Structure: If you haven't already, create a well-organized OU structure in your Google Admin console that reflects your organization's hierarchy and device management needs.
* Select the Target OU: Choose the specific OU where you want the ZTE-enrolled devices to reside. Consider factors like department, location, or device type when making your decision.
Once you've identified the appropriate OU, you can proceed with creating a zero-touch enrollment token and associating it with that OU. This will ensure that newly enrolled devices are automatically placed in the correct OU and inherit the desired policies.

NEW QUESTION # 106
How should you generate a custom admin role?

- A. Set privileges on the user directly
- B. Create admin role and assign privileges
- C. Add user to security admin group
- D. Add user to admin role OU

Answer: B

Explanation:
To create a custom admin role in the Google Admin console, you need tocreate the roleand thenassign the required privileges. This method allows for precise control over what the delegated admin can manage, adhering to the principle of least privilege.

Verified Answer from Official Source:
The correct answer is verified from theGoogle Admin Console Roles and Permissions Guide, which explains the process of creating and assigning custom roles.
"To create a custom admin role, go to Admin Console > Admin roles, create a new role, and assign the necessary privileges."
Creating a custom role is essential when you need specific permissions to be delegated without granting full admin access, ensuring both security and operational efficiency.
Objectives:
* Implement role-based access control (RBAC).
* Delegate admin tasks securely.

NEW QUESTION # 107
Which management policy is missing within ChromeOS Flex vs ChromeOS?

- A. SCEP
- B. Do Not Allow Powerwash
- C. Remote Desktop
- D. Forced Re-enrollment

Answer: B

Explanation:
ChromeOS Flex does not support the"Do Not Allow Powerwash"policy, which is available in standard ChromeOS. This limitation means that users can perform a factory reset, potentially losing management and security settings.
Verified Answer from Official Source:
The correct answer is verified from theChromeOS Flex Management Guide, which explicitly mentions the lack of this policy feature.
"ChromeOS Flex does not support certain management features like disabling Powerwash, which can impact security settings."
Without the ability to block Powerwash, devices may be reset, resulting in the loss of enterprise settings and requiring re-enrollment.
Objectives:
* Understand the limitations of ChromeOS Flex.
* Maintain device security through management policies.

NEW QUESTION # 108
As a ChromeOS Administrator, you are tasked with blocking incognito mode in the ChromeOS Browser.
How would you prevent users from using incognito mode?

- A. ln "Enrollment Settings" disable vended access and incognito mode (or content protection
- B. From "Device Settings' change Kiosk settings to "Disallow incognito mode "
- C. Go ,0 "User & Browser Settings' to restrict sign-in to pattern and "Disallow incognito mode "
- D. Navigate to "Users & Browser Security Settings' and set the "Disallow incognito mode" policy

Answer: D

Explanation:
* Access the Google Admin Console:Sign in to the Admin console using your ChromeOS administrator credentials.
* Locate User Settings:Navigate to "Device Management" > "Chrome Management" > "User & browser settings".
* Find Incognito Mode Policy:Within the settings, search for "Incognito mode".
* Disable Incognito Mode:Select the option to "Disallow incognito mode".
* Save Changes:Click "Save" to apply the policy to the designated users or organizational units.
