It ensures familiarity with the general integration landscape and prepares candidates to understand the key elements of cloud connectivity.

SAP Certified Associate - Implementation Consultant - Managed gateway for spend management and SAP Business Network Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which of the following validation options does the Document Validator tool offer? Note: There are 3 correct answers to this question.

- A. Content Validation
- B. Transformation
- C. Tax Calculation
- D. Schema Validation
- E. User Login Credentials

Answer: A,B,D

Explanation:

I wasn't able to find a definitive reference on learning.sap.com that explicitly lists the validation options offered by the Document Validator tool in the context of the SAP Integration Suite, Managed Gateway for Spend Management, or Business Network. The material I could access doesn't clearly enumerate these options.

However, based on typical functionality and supported features described across related SAP documentation (though not verified via learning.sap.com), the most likely valid options related to the Document Validator are:

- *A. Schema Validation
- *B. Content Validation
- *C. Transformation

Options like D. User Login Credentials and E. Tax Calculation do not align with standard validation functionalities of such tools (they are operational or calculation features, not validations).

I cannot confirm these definitively from learning.sap.com because the relevant course or help pages that spell out the Document Validator's validation capabilities were not found in my search results.

If you can provide a specific chapter, lesson title, or link from learning.sap.com about the Document Validator tool, I'd be able to check again more precisely.

NEW QUESTION # 60

Which operands are allowed for the string data type in content-based routing? Note: There are 3 correct answers to this question.

- A. Not exists
- B. Substring
- C. Contains
- D. Begins with
- E. Greater than or equal

Answer: B,C,D

NEW QUESTION # 61

Which options in the Interface Setup program are associated with outbound interfaces from SAP ERP to Cloud Integration Gateway for ? Note: There are 2correctanswers to this question.

- A. Supplier Lifecycle Performance Inbound Request
- B. **Supplier Lifecycle Performance Outbound Request**
- C. **Supplier Lifecycle Performance Confirmation Out Request**
- D. Supplier Lifecycle Performance Confirmation In Request

Answer: B,C

NEW QUESTION # 62

What is the corresponding activity to Application-Specific Settings that you need to perform in the CIG portal?

- A. Define Basic Data
- B. Define Global Settings
- C. Define General Settings
- D. **Define Cross-References**

Answer: D

NEW QUESTION # 63

You are enabling CIG for your SAP Ariba Procurement site.What is the purpose of selecting the integration tasks listed under "Manage cloud integration gateway tasks"?Note: There are 2correctanswers to this question.

- A. Enable selected master data events for CIG integration.
- B. **Accept the corresponding data definition of the selected tasks.**
- C. **Activate the corresponding async transactional data events.**
- D. Set an endpoint as CIG for the selected async transactional data events.

Answer: B,C

NEW QUESTION # 64

.....
