DevOps-Foundation Reliable Dump & DevOps-Foundation Free Exam Dumps

The learning material of PassExamDumps is in three different formats so the students can take full benefit from it and use it anywhere anytime while preparing for PeopleCert DevOps Foundationv3.6Exam exam questions. The PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) guarantees its customers that they will pass the PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) certification exams in a single try if they prepare with our product and if they fail to do it so then they can reclaim their money back according to terms and conditions.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17
An incident has occurred in an organization's core mobile banking application. Individuals from several teams in the US, Germany, and India swarm into a Slack channel where together they query their continuous delivery and monitoring systems to trace the change and fault causing the problem. What BEST describes what they are practicing?

- A. IT Support
- B. Swarming
- C. Incident Management
- D. ChatOps

Answer: D

Explanation:
ChatOpsis the practice of conducting operational work directly through chat platforms (e.g., Slack, Microsoft Teams) integrated with automation and tooling. In this case:
* Teams from multiple locations are collaborating in real-time via Slack.
* They are running commands and queries directly from the chat to the delivery and monitoring systems.
* This allows shared visibility, immediate context, and rapid action during incident resolution.
WhileA(Swarming) describes a collaborative incident response, it does not specifically imply integration with chat-based tools.C(Incident Management) is the overall process, andD(IT Support) is a function, but neither capture the specific ChatOps approach.
Thus,B - ChatOpsis the most accurate answer here.

The DevOps Handbook- Toolchains and Collaboration Integration

NEW QUESTION # 18
According to the State of DevOps Reports, LOW performing organizations have:

- A. More frequent code deployments
- B. Faster mean times to recovery
- C. Faster lead times from commit to deploy
- D. Higher change failure rates

Answer: D

Explanation:
The State of DevOps Reports show thatLOW performing organizations have higher change failure rates, meaning a larger percentage of changes lead to incidents, outages, or degraded service. In contrast, high performers have more frequent deployments, faster lead times, and quicker recovery from incidents.

NEW QUESTION # 19
Which of the following does NOT make DevOps important now?

- A. IT must continue to operate in a silo culture
- B. Time to value must accelerate
- C. Consumers have "app" mentalities and expectations
- D. Enterprises have young, nimble start-up competitors

Answer: A

Explanation:
The urgency for DevOps adoption is driven by increasing market competition, evolving customer expectations, and the need for rapid delivery of value.
* B: Nimble start-ups often deliver faster and more innovatively, putting pressure on established enterprises.
* C: Customers expect continuous improvement and seamless digital experiences ("app mentality").
* D: Reducing time-to-value is essential for staying competitive and meeting business demands.
However,Adescribes a siloed culture-something DevOps actively works to eliminate, not a reason for its importance. In fact,

remaining siloed is an obstacle to achieving DevOps benefits, not a driver for adoption.
Therefore,Ais the correct "NOT" choice.

NEW QUESTION # 20
A team has recently introduced their first Kanban board and are saying that they are finding it hard to focus and are feeling exhausted from context switching. Additionally, the business is complaining that nothing is being finished and they are yet to receive any of what they asked for.
What do the team need to do?

- A. Add more development resources to the team to cope with the workload
- B. Push more work onto the board to provide more opportunities to deliver something
- C. Try using Work in Progress limits
- D. Unblock any blocked work items

Answer: C

Explanation:
When Kanban teams feel overwhelmed and nothing is getting finished, it's a sign thattoo much work is in progress(WIP).
Work in Progress (WIP) limitsare a key Kanban and Lean practice: they restrict how many tasks can be active at one time, forcing teams to focus, finish, and deliver before starting new work.
* Pushing more work(A) oradding more resources(B) worsens the problem.
* Unblocking work(D) is helpful, but the core issue isoverload.
Extract-style reference:
"WIP limits encourage teams to finish work before starting new tasks, reducing context switching and enabling better flow and faster delivery."
-Kanban: Successful Evolutionary Change for Your Technology Business, David J. Anderson PeopleCert DevOps Foundation:
Limiting WIP is essential for effective flow and sustainable pace.

NEW QUESTION # 21
Which of the following metrics relates to The Third Way?

- A. Hypothesis or experiments log
- B. Change cycle times
- C. Change fail rate
- D. Change lead times

Answer: A

Explanation:
TheThird Wayin DevOps emphasizescontinuous learning and experimentation. It's about fostering a culture where teams test hypotheses, take calculated risks, and learn from both successes and failures.
Ahypothesis or experiments logdirectly supports this principle by capturing:
* The changes or experiments attempted
* The hypothesis behind them
* The results and insights gained
Metrics likeA,B, andCare more aligned with theFirst Way(flow) andSecond Way(feedback). They measure speed and stability but not the experimental learning process itself.
By tracking experiments, organizations can make data-driven decisions, reinforce a learning culture, and continuously refine practices-core aspects of the Third Way.
