SC-100 sure test & SC-100 practice torrent & SC-100 study pdf

Work hard and practice with our Microsoft SC-100 dumps till you are confident to pass the Microsoft SC-100 exam. And that too with flying colors and achieving the Microsoft Cybersecurity Architect certification on the first attempt. You will identify both your strengths and shortcomings when you utilize Microsoft SC-100 Practice Exam software.

Microsoft Cybersecurity Architect Sample Questions (Q313-Q318):

NEW QUESTION # 313

Your company plans to follow DevSecOps best practices of the Microsoft Cloud Adoption Framework for Azure to integrate DevSecOps processes into continuous integration and continuous deployment (CI/CD) DevOps pipelines. You need to recommend which security-related tasks to integrate into each stage of the DevOps pipelines.

What should recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 314

Your company has a hybrid cloud infrastructure.

The company plans to hire several temporary employees within a brief period. The temporary employees will need to access

applications and data on the company's premises network.

The company's security policy prevents the use of personal devices for accessing company data and applications.

You need to recommend a solution to provide the temporary employee with access to company resources. The solution must be able to scale on demand.

What should you include in the recommendation?

- A. Redesign the VPN infrastructure by adopting a split tunnel configuration.
- B. Deploy Azure Virtual Desktop, Azure Active Directory (Azure AD) Conditional Access, and Microsoft Defender for Cloud Apps.
- C. Migrate the on-premises applications to cloud-based applications.
- D. Deploy Microsoft Endpoint Manager and Azure Active Directory (Azure AD) Conditional Access.

Answer: B

NEW QUESTION # 315

You have 50 Azure subscriptions.

You need to monitor resources in the subscriptions for compliance with the ISO 27001:2013 standards.

The solution must minimize the effort required to modify the list of monitored policy definitions for the subscriptions.

NOTE: Each correct selection is worth one point.

- A. Assign an initiative to a management group.
- B. Assign a policy to each subscription.
- C. Assign a policy to a management group.
- D. Assign an initiative to each subscription.
- E. Assign a blueprint to a management group.
- F. Assign a blueprint to each subscription.

Answer: A,E

Explanation:

An Azure Management group is logical containers that allow Azure Administrators to manage access, policy, and compliance across multiple Azure Subscriptions en masse.

If your organization has many Azure subscriptions, you may need a way to efficiently manage access, policies, and compliance for those subscriptions.

Management groups provide a governance scope above subscriptions. You organize subscriptions into management groups the governance conditions you apply cascade by inheritance to all associated subscriptions.

Blueprint definition locations

When creating a blueprint definition, you'll define where the blueprint is saved. Blueprints can be saved to a management group or subscription that you have Contributor access to. If the location is a management group, the blueprint is available to assign to any child subscription of that management group.

Create and assign an initiative definition

With an initiative definition, you can group several policy definitions to achieve one overarching goal. An initiative evaluates resources within scope of the assignment for compliance to the included policies.

Note: The Azure Policy Regulatory Compliance built-in initiative definition maps to compliance domains and controls in ISO 27001:2013.

The Azure Policy control mapping provides details on policy definitions included within this blueprint and how these policy definitions map to the compliance domains and controls in ISO

27001. When assigned to an architecture, resources are evaluated by Azure Policy for non-compliance with assigned policy definitions.

NEW QUESTION # 316

You need to recommend an identity security solution for the Azure AD tenant of Litware. The solution must meet the identity requirements and the regulatory compliance requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 317

Hotspot Question

Your company is migrating data to Azure. The data contains Personally Identifiable Information (PII). The company plans to use Microsoft Information Protection for the PII data store in Azure.

You need to recommend a solution to discover PII data at risk in the Azure resources.

What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Azure Purview

Microsoft Purview is a unified data governance service that helps you manage and govern your on-premises, multi-cloud, and software-as-a-service (SaaS) data.

Microsoft Purview allows you to:

Create a holistic, up-to-date map of your data landscape with automated data discovery, sensitive data classification, and end-to-end data lineage.

Enable data curators to manage and secure your data estate.

Empower data consumers to find valuable, trustworthy data.

Box 2: Microsoft Defender for Cloud

Microsoft Purview provides rich insights into the sensitivity of your data. This makes it valuable to security teams using Microsoft Defender for Cloud to manage the organization's security posture and protect against threats to their workloads. Data resources remain a popular target for malicious actors, making it crucial for security teams to identify, prioritize, and secure sensitive data resources across their cloud environments. The integration with Microsoft Purview expands visibility into the data layer, enabling security teams to prioritize resources that contain sensitive data.
