Utilizing 5V0-33.23 Examcollection Free Dumps - No Worry About VMware Cloud on AWS: Master Specialist 2024

To save resources of our customers, we offer Real 5V0-33.23 Exam Questions that are enough to master for 5V0-33.23 certification exam. Our VMware 5V0-33.23 ExamDumps are designed by experienced industry professionals and are regularly updated to reflect the latest changes in the VMware Cloud on AWS: Master Specialist 2024 exam content.

VMware Cloud on AWS: Master Specialist 2024 Sample Questions (Q50-Q55):

NEW QUESTION # 50

What is a supported approach when deploying multiple instances of VMware Site Recovery with VMware Cloud on AWS?

- A. A single software-defined data center (SDDC) connected to multiple on-premises sites and to other cloud SDDCs
- B. A single software-defined data center (SDDC) paired with up to 25 remote sites

- C. VMware Site Recovery add-on deployed in the VMware vSphere Web Client
- D. VMware Site Recovery with multiple protected sites and a shared recovery site

Answer: A

Explanation:

Reference: <https://aws.amazon.com/blogs/apn/design-considerations-for-disaster-recovery-with-vmware-cloud-on-aws/>

NEW QUESTION # 51

Standard security practice for a company requires that all administrator-level user accounts have their passwords changed every 60 days. The cloudadmin@vmc.local account password is changed by an administrator through the VMware vSphere Client to adhere to the security policy. When the administrator attempts to log into the VMware Cloud on AWS vCenter Server through the VMware vSphere Client a few days later as cloudadmin@vmc.local using the account credentials copied from the VMware Cloud console, the administrator's access is denied.

What is the likely cause of this issue?

- A. When the password for cloudadmin@vmc.local is updated from the VMware vSphere Client, the updated password is not reflected in the VMware Cloud console.
- B. The cloudadmin@vmc.local account password should not be changed through the VMware vSphere Client. In order to prevent unauthorized access to VMware Cloud on AWS by non-authorized individuals, VMware will lock the account out.
- C. The cloudadmin@vmc.local password change confirmation email has not been approved by an Organization Owner.
- D. The cloudadmin@vmc.local account password should only be changed through the appliance management interface of the VMware vCenter Server.

Answer: A

NEW QUESTION # 52

A customer plans to use VMware Cloud on AWS to support their public cloud adoption initiatives. Their use case for VMware Cloud on AWS is predominately data center extension to support seasonal and business specific demands. There will also be a number of workloads running in VMware Cloud on AWS on a long-term, permanent basis. Based on a recent sizing assessment, it is determined that utilization of VMware Cloud on AWS will fluctuate between two and five hosts throughout the year based on seasonal and market conditions.

Which possible subscription option would result in the greatest benefit to this customer and why?

- A. Create a subscription for three hosts for three years and consume the remaining hosts, as needed, on-demand. This option allows the customer to lock in a term rate for required hosts and leverage on-demand rates for additional hosts as needed.
- B. Create a subscription for two hosts for one year and consume the remaining hosts, as needed, on-demand. This option allows the customer to lock in a term rate for required hosts and leverage on-demand rates for additional hosts as needed.
- C. Create a subscription for five hosts for three years. This option provides the greatest cost savings to the customer and eliminates the amount of time needed to provision and configure VMware ESXi hosts as consumption fluctuates.
- D. Consume VMware Cloud on AWS on-demand based on seasonal and business requirements. This option provides the cost benefits of cloud through an on-demand consumption model.

Answer: A

NEW QUESTION # 53

Which two network types can be extended with VMware HCX Network Extension? (Choose two.)

- A. Private VLAN Networks
- B. Trunk Networks
- C. vSphere Standard Switch VLAN Networks
- D. vSphere Distributed Switch VLAN Networks
- E. NSX Overlay Networks

Answer: D,E

Explanation:

The HCX appliance supports extending networks from VMware vSphere Distributed Switch and NSX overlay networks.

Reference: <https://docs.vmware.com/en/VMware-HCX/4.2/hcx-user-guide/GUID-0FD13F6B-67AC-4495-91C9-3CCD66791464.html>

NEW QUESTION # 54

An administrator deploys a virtual machine to its software-defined data center (SDDC) and configures it to perform backups of the other virtual machines in the SDDC. The administrator also creates an AWS Simple Storage Service (S3) bucket in the linked Amazon Virtual Private Cloud (VPC) and is attempting to use the S3 bucket as a repository for their backups. The administrator confirms that the backup software is capable of using AWS S3 storage as a backup repository, and that the AWS S3 bucket is configured to use an endpoint in the linked VPC.

What else should the administrator do to ensure connectivity between SDDC virtual machines and the AWS S3 repository in the linked VPC through the Elastic Network Interface?

- A. Ensure Service Access for S3 is enabled in Networking and Security for the SDDC.
- B. Configure a route-based VPN for the SDDC to the VPC.
- C. **Configure Direct Connect to a Private Virtual Interface for access to AWS services.**
- D. Configure Direct Connect to a Public Virtual Interface for access to AWS services.

Answer: C

Explanation:
