

# Pass Guaranteed Portworx-Enterprise-Professional - Pure Certified Portworx Enterprise Professional (PEP) Exam Marvelous Valid Study Questions

DOWNLOAD the newest ExamCost Portworx-Enterprise-Professional PDF dumps from Cloud Storage for free:  
[https://drive.google.com/open?id=1-aCnkKxwKG5BA7wrHHrCnl0\\_wvv4Xw](https://drive.google.com/open?id=1-aCnkKxwKG5BA7wrHHrCnl0_wvv4Xw)

Even though our Portworx-Enterprise-Professional training materials have received quick sale all around the world, in order to help as many candidates for the exam as possible to pass the Portworx-Enterprise-Professional exam, we still keep the most favorable price for our best Portworx-Enterprise-Professional test prep. In addition, if you keep a close eye on our website you will find that we will provide discount in some important festivals, we can assure you that you can use the least amount of money to buy the best product in here. We aim at providing the best Portworx-Enterprise-Professional Exam Engine for our customers and at trying our best to get your satisfaction.

## Pure Storage Portworx-Enterprise-Professional Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Security:</b> This section focuses on Security Engineers and Compliance Officers responsible for enforcing security measures in container storage environments. Topics include managing encryption, access control, and compliance policies to protect stored data.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Operations and Administration:</b> This section of the exam measures the skills of Storage Administrators and Kubernetes Operators and covers managing cluster operations and administering container storage environments using Portworx. Candidates demonstrate the ability to efficiently manage and operate storage clusters in production environments.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Business Continuity:</b> This domain measures the skills of Disaster Recovery Planners and IT Continuity Managers in implementing backup, recovery, and failover strategies. It ensures candidates understand how to sustain business operations and data availability using Portworx features.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• <b>Deploy and Install:</b> This domain targets DevOps Engineers and Infrastructure Specialists and focuses on deploying and installing Portworx storage solutions. It includes configuring and setting up storage clusters to support containerized applications reliably and securely.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• <b>Observability and Troubleshooting:</b> This section assesses the expertise of Support Engineers and System Administrators in monitoring storage deployments and troubleshooting issues. Candidates learn to use observability tools and techniques to maintain system health and resolve performance problems effectively.</li></ul>

## Valid Study Portworx-Enterprise-Professional Questions - Reliable & Professional Portworx-Enterprise-Professional Materials Free Download for Pure Storage Portworx-Enterprise-Professional Exam

In peacetime, you may take months or even a year to review a professional exam, but with Portworx-Enterprise-Professional exam guide, you only need to spend 20-30 hours to review before the exam, and with our Portworx-Enterprise-Professional study materials, you will no longer need any other review materials, because our Portworx-Enterprise-Professional study materials has already included all the important test points. At the same time, Portworx-Enterprise-Professional Study Materials will give you a brand-new learning method to review - let you master the knowledge in the course of the doing exercise. You will pass the Portworx-Enterprise-Professional exam easily and leisurely.

### Pure Storage Pure Certified Portworx Enterprise Professional (PEP) Exam Sample Questions (Q28-Q33):

#### NEW QUESTION # 28

What command should be used to add a new drive to an existing storage cluster?

- A. `pxctl service drive add -drive /dev/dm-1 -operation start`
- B. `pxctl service pool update -resize new-disk 150`
- C. `pxctl sv nw -a`

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Adding a new drive to an existing Portworx storage cluster involves bringing the physical device online for Portworx management. The correct command for this is `pxctl service drive add -drive /dev/dm-1 -operation start`. This command instructs Portworx to recognize and incorporate the new drive specified by the device path (e.g., `/dev/dm-1`) into its storage pool. After this operation, Portworx can use the drive for provisioning volumes or expanding capacity. The `-operation start` flag signals Portworx to initialize and prepare the drive for use. This method is part of Portworx's dynamic storage management capabilities, allowing flexible scaling of storage resources without downtime. Official CLI documentation outlines this command as the supported approach to adding drives to running clusters safely and efficiently **【Pure Storage Portworx CLI Guide source】**.

#### NEW QUESTION # 29

What happens if the `spec.csi.enabled` flag is set to false in the Portworx StorageCluster spec?

- A. The cluster will fail to deploy if CSI is disabled.
- B. CSI will be installed, but it will not be used.
- C. **CSI will not be installed for the storage cluster.**

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The `spec.csi.enabled` flag in the Portworx StorageCluster specification dictates whether the Container Storage Interface (CSI) driver is deployed within the Kubernetes environment. Setting this flag to false means that the CSI driver will not be installed or enabled, effectively disabling the CSI functionality. The CSI driver is responsible for dynamic volume provisioning, attachment, and lifecycle management in Kubernetes clusters. Disabling CSI might be necessary in environments relying on legacy volume plugins or specific operational requirements. When CSI is disabled, Portworx will not support dynamic provisioning or other CSI-dependent features, which could limit functionality for Kubernetes storage operations. Portworx operator documentation explicitly states that disabling CSI omits the CSI driver installation, advising users to carefully consider the impact before setting this flag to false, especially in production environments requiring CSI functionality **【Pure Storage Portworx Operator Docs source】**.

### NEW QUESTION # 30

Which CRD object can be used to restore an existing ApplicationBackup?

- **A. ApplicationRestore**
- B. Migration
- C. VolumeSnapshot

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The ApplicationRestore Custom Resource Definition (CRD) object in Portworx is specifically designed to restore an application from an existing ApplicationBackup. This object orchestrates the process of recovering a consistent snapshot of an application, including all its associated volumes, in Kubernetes environments. Using ApplicationRestore, administrators can define the source backup, restore location, and any necessary transformations during restoration. This facilitates disaster recovery, migration, or rollback scenarios for complex stateful applications. The Portworx backup and restore documentation clearly defines ApplicationRestore as the controller responsible for application-level recovery operations, ensuring data integrity and consistency throughout the restore workflow **【Pure Storage Portworx Backup and Restore Guide source】**.

### NEW QUESTION # 31

If a Portworx node is down and the Kubernetes cluster is healthy, which command should be used to check Portworx alerts on a healthy node?

- A. journalctl -Ifu portworx\*
- **B. pxctl alerts show**
- C. kubectl describe node

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To check Portworx-specific alerts on a healthy node, administrators use the command `pxctl alerts show`. This command displays current alerts raised by Portworx, including warnings and critical notifications about storage, nodes, and cluster health. Even if one node is down, alerts from the healthy nodes can provide insights into cluster-wide issues or the status of the affected node. While `journalctl` displays system and service logs and `kubectl describe node` shows Kubernetes node info, neither provides aggregated Portworx alert data. The Portworx observability documentation recommends using `pxctl alerts show` for focused monitoring and alert management, enabling administrators to respond effectively to operational events within the Portworx cluster **【Pure Storage Portworx Monitoring Guide source】**.

### NEW QUESTION # 32

What are three recommended technologies used for monitoring a Portworx cluster in a Kubernetes environment?

- A. Prometheus, Elk Stack, and FluentD
- B. Nagios, Grafana, and Kubewatch
- **C. Prometheus, Alertmanager, and Grafana**

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Portworx recommends using Prometheus, Alertmanager, and Grafana as the core technologies for monitoring Portworx clusters within Kubernetes. Prometheus scrapes metrics exposed by Portworx components and stores time-series data for analysis. Alertmanager handles alert rules and notification delivery, enabling administrators to respond to critical events promptly. Grafana provides a powerful visualization platform to build dashboards from Prometheus data, helping teams visualize cluster health, performance metrics, and capacity trends. This combination is widely adopted due to its native Kubernetes integration, scalability, and extensibility. Portworx documentation includes detailed guidance on configuring these tools to monitor metrics such as volume latency, node health, pool usage, and snapshot status, forming a comprehensive monitoring and alerting solution for production environments **【Pure Storage Portworx Monitoring Guide source】**.

## NEW QUESTION # 33

.....

If you don't have enough time to study for your Pure Storage Portworx-Enterprise-Professional exam, ExamCost provides Pure Storage Portworx-Enterprise-Professional Pdf questions. You may quickly download Pure Storage Portworx-Enterprise-Professional exam questions in PDF format on your smartphone, tablet, or desktop. You can Print Pure Storage Portworx-Enterprise-Professional PDF Questions and answers on paper and make them portable so you can study on your own time and carry them wherever you go.
