Microsoft MS-721 (Collaboration Communications Systems Engineer (beta)) Exam is a certification exam that tests an individual's ability to design, implement, and manage Microsoft's collaboration and communication technologies. Collaboration Communications Systems Engineer certification focuses on the skills necessary to effectively deploy and maintain Microsoft's communication solutions, such as Microsoft Teams and Skype for Business.

Microsoft Collaboration Communications Systems Engineer Sample Questions (Q116-Q121):

NEW QUESTION # 116

Hotspot Question

You have a Microsoft Teams Phone deployment that contains a user named User1.

A company policy states that all users must have voicemail configured so that callers can record a message or be transferred to reception.

You need to verify the voicemail configuration of User1 to ensure that it meets the requirements of the company policy.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Get-CsUserCallingSettings

"Get-CsOnlineVoicemailUserSettings" can show the voice mail settings of the user.

Box 2: ForwardingTarget

Explanation:

NEW QUESTION # 118

Your company has an office in Seattle.

The default dial-in number for the company's Microsoft Teams meetings has an area code of 425.

The company does NOT have an office in New York. However, most of the company's customers are in New York.

You need to get a new default dial-in number that has a local 718 area code.

You will NOT define additional location information in Teams.

Which two actions should you perform before you assign the bridge? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Search for new numbers by using New York.
- B. Get a Dedicated conference bridge (Toll Free) number.
- C. Search for new numbers by using a 718 area code.
- D. Get an auto attendant toll-free number.
- E. Get a Dedicated conference bridge (Toll) number.

Answer: C,E

Explanation:

A: Change the default phone number of your conference bridge (optional).

The default phone number of your conference bridge defines the caller ID that will be used when an outbound call is placed by a participant or the organizer from within a meeting.

Only a service toll number can be set as the default number for your conferencing bridge; service toll-free numbers can't be set as the default number of your conferencing bridge. If you are assigning a service toll number and you would like to set it as the new default number for your audio conferencing bridge, perform these steps:

1. On the left navigation pane, go to Meetings > Conference bridges.
2. Highlight the service toll number that you want to configure as the default.
3. Select Set as default.

B: Note: In addition to getting phone numbers for your users, you can get toll or toll-free phone numbers for services such as Audio Conferencing (for conference bridges), Auto Attendants, and Call Queues (also called service numbers). Service phone numbers have a higher concurrent calling capacity than user or subscriber phone numbers. For example, a service number can handle hundreds of calls simultaneously, whereas a user's phone number can only handle a few calls simultaneously. To get service numbers,

contact your operator.

NEW QUESTION # 119

You have a Microsoft 365 E5 subscription that uses Microsoft Teams Phone.

You have 10 SIP devices that were used in a previous phone system.

You verify compatibility with Teams Phone.

You need to ensure that users can call from SIP devices in Teams.

What should you do?

- A. Assign a Teams Phone Standard add-on license to each SIP device.
- B. Configure a configuration profile.
- C. Assign a Microsoft Teams Shared Devices license to each SIP device.
- **D. Configure a calling policy.**

Answer: D

NEW QUESTION # 120

You have a Microsoft Teams Phone deployment.

You are deploying a new remote site.

You have a Session Border Controller (SBC) that has an E1/T1 Primary Rate Interface (PRI) deployed to the remote site.

You plan to deploy a Survivable Branch Appliance (SBA) to ensure PSTN connectivity.

Which type of endpoints is supported by the SBA?

- A. call queues in Microsoft Teams
- B. audio conferencing in Microsoft Teams
- C. Microsoft Teams panels
- **D. Microsoft Teams Windows desktops**

Answer: D
