Palo Alto Networks Realistic Exam PCCP Labs Free PDF

As you know, when choosing a learning product, what we should value most is its content. The content of PCCP study materials is absolutely rich. Our company collected a lot of information, and then our team of experts really spent a lot of energy to analyze and sort out this information. If you buy our PCCP Exam Questions, then you will find that the information compiled is all about the keypoints and the latest. And we always keep on updating our PCCP training quiz.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q68-Q73):

NEW QUESTION # 68
Which two services does a managed detection and response (MDR) solution provide? (Choose two.)

- A. Improved application development
- B. Proactive threat hunting
- C. Incident impact analysis
- D. Periodic firewall updates

Answer: B,C

Explanation:
Managed Detection and Response (MDR) services combine incident impact analysis and proactive threat hunting to enhance organizational security posture. Incident impact analysis assesses the severity, scope, and potential damage of identified threats, helping prioritize responses. Proactive threat hunting involves skilled analysts searching for hidden threats that automated detection may miss, leveraging threat intelligence and behavioral analytics. Palo Alto Networks' MDR integrates Cortex XDR and human expertise to detect, investigate, and remediate sophisticated threats early. Unlike routine firewall updates or development processes, MDR is focused on active threat discovery and comprehensive incident management.

NEW QUESTION # 69
Which service is encompassed by serverless architecture?

- A. Security as a Service (SaaS)
- B. Function as a Service (FaaS)
- C. Authentication as a Service
- D. Infrastructure as a Service (laaS)

Answer: B

Explanation:
Serverless architecture is primarily implemented through Function as a Service (FaaS), where developers write and deploy individual functions without managing the underlying infrastructure. The cloud provider handles scaling, resource allocation, and execution on demand.

NEW QUESTION # 70
You have been invited to a public cloud design and architecture session to help deliver secure east west flows and secure Kubernetes workloads.
What deployment options do you have available? (Choose two.)

- A. CN-Series
- B. PA-Series
- C. Panorama
- D. VM-Series

Answer: A,D

Explanation:
To deliver secure east-west flows and secure Kubernetes workloads in a public cloud environment, you have two deployment options available: VM-Series and CN-Series.
* VM-Series is a virtualized form factor of the Palo Alto Networks next-generation firewall that can be deployed in public cloud platforms such as AWS, Azure, Google Cloud, and Oracle Cloud. VM-Series provides comprehensive network security and threat prevention capabilities for protecting your cloud workloads and applications from cyberattacks. VM-Series can also integrate with native cloud services and third-party tools to enable automation, orchestration, and visibility across your cloud environment. VM-Series supports various deployment scenarios, such as securing internet-facing applications, protecting hybrid connectivity, segmenting internal networks, and enabling secure DevOps12.
* CN-Series is a containerized form factor of the Palo Alto Networks next-generation firewall that can be deployed in Kubernetes environments. CN-Series provides granular network security and threat prevention capabilities for protecting your Kubernetes pods and namespaces from cyberattacks. CN- Series can also integrate with Kubernetes network plugins and services to enable dynamic policy enforcement, service discovery, and visibility across your Kubernetes clusters. CN-Series supports various deployment scenarios, such as securing ingress and egress traffic, enforcing microsegmentation, and enabling secure DevSecOps34.
VM-Series in Public Cloud
VM-Series Deployment Guide
CN-Series in Kubernetes

NEW QUESTION # 71
What does SIEM stand for?

- A. Secure Infrastructure and Event Monitoring
- B. Security Information and Event Management
- C. Security Infosec and Event Management
- D. Standard Installation and Event Media

Answer: B

Explanation:
Originally designed as a tool to assist organizations with compliance and industry-specific regulations, security information and event management (SIEM) is a technology that has been around for almost two decades

NEW QUESTION # 72
What is an operation of an Attack Surface Management (ASM) platform?

- A. It detects and remediates misconfigured security settings in sanctioned SaaS applications through monitoring.
- B. It scans assets in the cloud space for remediation of compromised sanctioned SaaS applications.
- C. It identifies and monitors the movement of data within, into, and out of an organization's network.
- D. It continuously identifies all internal and external internet-connected assets for potential attack vectors and exposures.

Answer: D

Explanation:
Attack Surface Management (ASM) platforms focus on continuous discovery and monitoring of all internet-facing assets, both internal and external, to identify attack vectors, vulnerabilities, and exposures that could be exploited by threat actors.

NEW QUESTION # 73
......

As is known to us, different people different understanding of learning, and also use different methods in different periods, and different learning activities suit different people, at different times of the day. Our PCCP test questions are carefully designed by a lot of experts and professors in order to meet the needs of all customers. We can promise that our PCCP exam question will be suitable for all people, including student, housewife, and worker and so on. No matter who you are, you must find that our PCCP Guide Torrent will help you a lot. If you choice our product and take it seriously consideration, we can make sure it will be very suitable for you to help you pass your exam and get the PCCP certification successfully. You will find Our PCCP guide torrent is the best choice for you.
