Topic 2, Contoso, Ltd

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd. is a manufacturing company that has a main office in Seattle and branch offices in Los Angeles and Montreal.

Existing Environment

Active Directory Environment

Contoso has an on-premises Active Directory Domain Services (AD DS) domain named contoso.com that syncs with an Azure Active Directory (Azure AD) tenant. The AD DS domain contains the domain controllers shown in the following table.

Contoso recently purchased an Azure subscription.

The functional level of the forest is Windows Server 2012 R2. The functional level of the domain is Windows Server 2012. The forest has the Active Directory Recycle Bin enabled.

The contoso.com domain contains the users shown in the following table.

The contoso.com domain has the Group Policy Objects (GPOs) shown in the following table.

The contoso.com domain has the Password Settings Objects (PSOs) shown in the following table.

Server Infrastructure

The contoso.com domain contains servers that run Windows Server 2022 as shown in the following table.

By using Windows Firewall with Advanced Security, the servers have isolation connection security rules configured as shown in the following table.

Server4 has no connection security rules.

Server4 Configurations

Server4 has the effective Group Policy settings for user rights as shown in the following table.

Server4 has the disk configurations shown in the following exhibit.

Virtualization Infrastructure

The contoso.com domain has the Hyper-V failover clusters shown in the following table.

Technical Requirements

Contoso identifies the following technical requirements:

- * Promote a new server named DC4 that runs to Windows Server 2022 to a domain controller.
- * Replicate the virtual machines from Cluster2 to an Azure Recovery Services vault.
- * Centrally manage performance alerts in Azure for all the domain controllers.
- * Ensure that User1 can recover objects from the Active Directory Recycle Bin.
- * Migrate Share1 to Server2, including all the share and folder permissions.
- * Back up Server4 and all data to an Azure Recovery Services vault.
- * Use Hyper-V Replica to protect the virtual machines in Cluster3.
- * Implement BitLocker Drive Encryption (BitLocker) on Server4.
- * Whenever possible, use the principle of least privilege.

NEW QUESTION # 265

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a failover cluster named Cluster1 that hosts an application named Appl.

The General tab in App1 Properties is shown in the General exhibit (Click the General tab.)

The Failover tab in App1 Properties is shown in the Failover exhibit. (Click the Failover tab.)

Server2 shuts down unexpectedly.

You need to ensure that when you start Server2, App1 continues to run on Server2.

Solution: You pause the Server1 node in Cluster1 and then start Server1.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 266

You have a Hyper-V host named Server1 that runs Windows Server 2019. Server1 hosts a virtual machine named VM1 that has the following configurations:

* Static IP address: 192.168.10.15

* Configuration version: 8.0

* Virtual network: VNet1

* Generation: 1

You deploy a Hyper-V host named Server2 that runs Windows Server 2025. You plan to export VM1 from Server1 and import VM1 to Server2 by using Hyper-V Manager. Which VM1 configurations will be preserved when VM1 is imported to Server2?

- A. the virtual network and IP address only
- B. the virtual network, IP address, configuration version, and generation
- C. the IP address and configuration version only
- D. the virtual network and generation only
- E. the IP address, configuration version, and generation only

Answer: E

NEW QUESTION # 267

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 268

Your on-premises network contains an Active Directory Domain Services (AD DS) domain. The domain contains the servers shown in the following table.

You have an Azure subscription.

You plan to migrate the data on FS1 to Azure by using Azure Data Box Gateway.

You need to configure a Data Box Gateway virtual device.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:
