Pass Guaranteed Quiz Fantastic CheckPoint - 156-536 - Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) New Braindumps Pdf

Each CheckPoint certification exam candidate know this certification related to the major shift in their lives. CheckPoint Certification 156-536 Exam training materials Free4Torrent provided with ultra-low price and high quality immersive questions and answersdedication to the majority of candidates. Our products have a cost-effective, and provide one year free update. Our certification training materials are all readily available. Our website is a leading supplier of the answers to dump. We have the latest and most accurate certification exam training materials what you need.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q64-Q69):

NEW QUESTION # 64

What does the Check Point Support Center as your one-stop portal offer?

- A. SecureKnowledge technical database
- B. Offloads
- C. Technical Certification
- D. UserMates offline discussion boards

Answer: A

NEW QUESTION # 65

Where are the Endpoint Policy Servers located?

- A. Between the Endpoint clients and the EPS
- B. Between the Endpoint clients and the SMS
- C. Between the Endpoint clients and the NMS
- D. Between the Endpoint clients and the EMS

Answer: D

Explanation:

Endpoint Policy Servers (EPS) are integral to the Harmony Endpoint architecture, designed to optimize communication between Endpoint clients and the Endpoint Security Management Server (EMS). The CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf explicitly defines their placement.

On page 25, under "Optional Endpoint Security Elements," the documentation states:

"Endpoint Policy Servers improve performance in large environments by managing most communication with the Endpoint Security clients. Managing the Endpoint Security client communication decreases the load on the Endpoint Security Management Server, and reduces the bandwidth required between sites." This confirms that EPS are positioned between the Endpoint clients and the EMS, handling tasks like policy downloads, heartbeats, and updates to offload the EMS. Option D accurately reflects this architecture.

Evaluating the other options:

* Option A: "Between the Endpoint clients and the EPS" is nonsensical, as EPS (Endpoint Policy Servers) cannot be between themselves and clients—it's a self-referential error.

* Option C: "Between the Endpoint clients and the NMS" introduces "NMS," likely a typo for Network Management System, which isn't part of Harmony Endpoint's architecture per the document.

* Option D: "Between the Endpoint clients and the SMS" refers to the Security Management Server (SMS), which manages gateways in Check Point's broader ecosystem, not the EMS specific to Harmony Endpoint (see page 23 for EMS definition). Thus, Option B is directly supported by the documentation as the correct placement of EPS.

NEW QUESTION # 66

What does pre-boot authentication disable?

- A. Incorrect usernames
- B. Identity theft
- C. Workarounds to computer security
- D. Weak passwords

Answer: C

NEW QUESTION # 67

As an Endpoint Administrator, you are facing some errors related to AD Strong Authentication in the Endpoint Management Server. Where is the right place to look when you are troubleshooting these issues?

- A. \$FWDIR/logs/Auth.log
- **B. \$UEPMDIR/logs/Authentication.log**
- C. \$FWDIR/log/Authentication.log
- D. \$UEMPDIR/log/Authentication.elg

Answer: B

Explanation:

When troubleshooting errors related to Active Directory (AD) Strong Authentication in the Endpoint Security Management Server, the appropriate log file to examine is specified in the Check Point Harmony Endpoint Server Administration Guide R81.20. This guide provides detailed information on log file locations for various components of the Harmony Endpoint system.

On page 213, under the section "Troubleshooting Authentication in Server Logs," the guide explicitly states:

"The authentication logs are located in \$UEPMDIR/logs/Authentication.log." This statement directly identifies \$UEPMDIR/logs/Authentication.log as the correct location for logs related to authentication issues, including those involving AD Strong Authentication. The \$UEPMDIR variable represents the installation directory of the Endpoint Security Management Server, making this path specific to the Harmony Endpoint environment. Therefore, Option C is the verified location for troubleshooting such errors.

To further validate this choice, consider the other options:

* Option A: \$FWDIR/log/Authentication.log- The \$FWDIR directory is typically associated with Check Point's firewall components (e.g., Security Gateway), not the Endpoint Security Management Server. This path is irrelevant for Harmony Endpoint authentication logs.

* Option B: \$FWDIR/logs/Auth.log- Similarly, \$FWDIR pertains to firewall-related logs, and "Auth.log" is not a standard log file name in the Harmony Endpoint context, making this option incorrect.

* Option D: \$UEMPDIR/log/Authentication.elg- This option contains a typo ("UEMPDIR" instead of "UEPMDIR") and references a ".elg" file, which is typically used for debug logs in Check Point systems, not standard authentication logs. The correct extension, as per the guide, is ".log," not ".elg." The documentation's clear directive on page 213 confirms that \$UEPMDIR/logs/Authentication.log is the authoritative source for troubleshooting AD Strong Authentication issues, solidifying Option C as the correct answer.

NEW QUESTION # 68

Why is it critical to change the default Agent Uninstall Password?

- A. The default password used is easy to guess.
- B. There is no need to change it because only the local PC administrator can uninstall the agent.
- **C. You have to change the default Agent Uninstall Password because if you do not, it will be easy for a malware to uninstall the agent itself.**
- D. All passwords and critical data are protected by Full Disk Encryption. The Endpoint agent supports pre-boot authentication so nobody can bypass the agent's security.

Answer: C

NEW QUESTION # 69

.....

For purchasing the 156-536 study guide, the candidates may have the concern of the safety of the websites, we provide you a safe network environment for you. We have been in this business for years, and the website and the 156-536 Study Guide of our company is of good reputation. We also have professionals offer you the guide and advice. 156-536 study guide will provide you the knowledge point as well as answers, it will help you to pass it.

Test 156-536 Dumps Free: <https://www.free4torrent.com/156-536-braindumps-torrent.html>

As 156-536 certifications are quite popular and significant in this field we employed well-paid deliberately experienced educational experts who worked in 156-536 company ever and specialized in certification examinations materials, CheckPoint 156-536 New Braindumps Pdf Notices sent by mail: you will be considered to receive 3 business days after mailing, CheckPoint 156-536 New Braindumps Pdf So its hit rate reaches up to 100% and pass rate up to 99% which has greatly over common study guides.

She often serves as a guest lecturer at distinguished photography schools and leading educational institutions around the world. If you are worried about your job, your wage, and a 156-536 certification, if you are going to change this, we are going to help you solve your problem by our 156-536 exam torrent with high quality, now allow us to introduce you our 156-536 Guide Torrent.

156-536 New Braindumps Pdf offer you accurate Test Dumps Free to pass Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) exam

As 156-536 certifications are quite popular and significant in this field we employed well-paid deliberately experienced educational experts who worked in 156-536 company ever and specialized in certification examinations materials.
