

# Oracle 1Z1-771 Latest Exam Review, 1Z1-771 Exam Book

ORACLE APEX DEVELOPER PROFESSIONAL CERTIFICATION DUMP (1Z1-771)

Exam has 50 Questions; it can't be out of this:

1. Which statement is true about creating and using an interactive grid?

A. For both editable and noneditable interactive grids, end users can change the report layout and create private reports.

B) An interactive grid supports Pivot View and Group By View features.  
C) End users cannot rearrange columns by dragging and dropping.

2. What happens when you regenerate credentials for Push Notifications?

A) Existing Push Subscriptions for the application will be valid.  
B) Queued Push Notifications for the application will be sent.  
C. Existing Push Subscriptions for the application will be invalidated.

3. Which APEX API can be used to send push notifications immediately from the notification queue?

A) APEX\_PWA.PUSH\_QUEUE  
B) APEX\_PWA.HAS\_PUSH\_SUBSCRIPTION  
C) APEX\_PWA.PURGE\_QUEUE

4. At what level does a Developer enable push notifications so that end users can receive them on their devices from an APEX application?

A) Region  
B) Application  
C) Page  
D) Instance

5. Which two tasks can be performed by using the Generate Text with AI Dynamic Action?

A) Invoke a Workflow  
B) Draft an email  
C) Summarize or translate text  
D) Update the underlying database tables

If you really want to get an international certificate, 1Z1-771 training quiz is really your best choice. Of course, 1Z1-771 preparation materials are global products that have been tested by users worldwide. You can be absolutely assured about the quality of the 1Z1-771 training quiz. Our company has hired the most professional team of experts at all costs to ensure that the content of 1Z1-771 guide questions is the most valuable. you really must get international certification!

## Oracle 1Z1-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.</li> </ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Creating and Using Dynamic Actions and Plug-ins:</b> This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Creating Application Page Controls:</b> This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Extending Application Capabilities:</b> This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• <b>Adding Computations, Processes, Validations, and Branches:</b> This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• <b>Managing Workflows and Tasks:</b> This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• <b>Using Themes and Theme Styles:</b> This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>• <b>Implementing Security in Your Application:</b> This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>• <b>Creating Progressive Web Apps:</b> This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>• <b>Creating an APEX Application:</b> This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>• <b>Leveraging Generative AI in Oracle APEX:</b> This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>• <b>Creating and Using Forms:</b> This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.</li> </ul>
Topic 15	<ul style="list-style-type: none"> <li>• <b>Managing Pages and Regions:</b> This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.</li> </ul>
Topic 16	<ul style="list-style-type: none"> <li>• <b>Getting Started with Oracle APEX on the Oracle Autonomous Database:</b> This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.</li> </ul>
Topic 17	<ul style="list-style-type: none"> <li>• <b>Migrating Application Development Between Environments:</b> This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.</li> </ul>

## 1Z1-771 Latest Exam Review - Quiz 1Z1-771 - First-grade Oracle APEX Cloud Developer Professional Exam Book

These 1Z1-771 mock tests are made for customers to note their mistakes and avoid them in the next try to pass Oracle APEX Cloud Developer Professional (1Z1-771) exam in a single try. These Oracle 1Z1-771 mock tests will give you real 1Z1-771 exam experience. This feature will boost your confidence when taking the Oracle 1Z1-771 Certification Exam. The 24/7 support system has been made for you so you don't feel difficulty while using the product. In addition, we offer free demos and up to 1 year of free Oracle Dumps updates. Buy It Now!

### Oracle APEX Cloud Developer Professional Sample Questions (Q13-Q18):

#### NEW QUESTION # 13

Which two Query Source types can be used to create a dynamic LOV?

- A. Function Returning SQL Query
- B. SQL Query
- C. Procedure
- D. Select List

**Answer: A,B**

Explanation:

A dynamic List of Values (LOV) in APEX populates options based on a query source. The supported types include:

Function Returning SQL Query: A PL/SQL function that returns a SQL query string (e.g., RETURN 'SELECT ename, empno FROM emp;'). This offers flexibility for dynamic conditions or complex logic.

SQL Query: A direct SQL statement (e.g., SELECT ename, empno FROM emp) executed at runtime to fetch LOV values. It's the simplest and most common approach.

Procedure: Procedures execute logic but don't return query results in the format required for an LOV (they don't produce a result set directly).

Select List: This is a UI component, not a query source type for defining an LOV.

Dynamic LOVs enhance user interaction by providing real-time, data-driven options, critical for forms and filters.

#### NEW QUESTION # 14

In your application, you want to display data in a searchable, customizable report that supports inline editing at runtime using the mouse or keyboard. Which report type will you create?

- A. Interactive Grid
- B. Classic Report
- C. Smart Filters
- D. Interactive Report

**Answer: A**

Explanation:

An Interactive Grid is the report type that supports searchable, customizable data display with inline editing at runtime using mouse or keyboard. Interactive Reports are searchable and customizable but lack inline editing. Classic Reports are static, and Smart Filters is a component, not a report type.

#### NEW QUESTION # 15

You use the Create Page Wizard to create a faceted search page on the EMP table. What is the default report type generated for this page?

- A. Interactive Report
- B. Column Toggle Report
- C. Classic Report

- D. Interactive Grid

**Answer: A**

Explanation:

When creating a faceted search page via the Create Page Wizard, the default report type is an Interactive Report. This pairs with the faceted search region to provide a searchable, filterable, and customizable report, leveraging the facets for dynamic filtering.

#### NEW QUESTION # 16

An APEX e-commerce application is being used by 50 users. You have a promotional offer, and you need to send a push notification to all the subscribed users on their devices. Which step must be performed in Oracle APEX to achieve this?

- A. Create a Dynamic Action of Send Push Notification type to send push notifications to all the subscribed users.
- B. Create a REST Data Source to send push notifications to all the subscribed users.
- **C. Create a PL/SQL block to fetch all the subscribed users and send push notifications by using APEX\_APPL\_PUSH\_SUBSCRIPTIONS & APEX\_PWA.SEND.**
- D. Enable push notifications at the application level and let APEX handle the subscription and delivery process automatically.

**Answer: C**

Explanation:

To send push notifications to all subscribed users, you must:

Enable push notifications at the application level (a prerequisite).

Use a PL/SQL block with APEX\_APPL\_PUSH\_SUBSCRIPTIONS to fetch subscribers and APEX\_PWA.SEND to send the notifications.

Option A is incorrect as there's no "Send Push Notification" Dynamic Action type. Option B is incomplete as enabling alone doesn't send notifications. Option C is unrelated to push notifications.

#### NEW QUESTION # 17

You have defined a REST Data Source with ORDS as the REST Data Source Type. The Source is being used as source for an editable Interactive Grid. When a user updates an employee record in this Interactive Grid, which operation is performed on the Database?

- A. GET
- B. POST
- **C. PUT**

**Answer: C**

Explanation:

An editable Interactive Grid synced with a REST Data Source (ORDS) maps CRUD operations to HTTP methods:

C . PUT: Updates an existing resource. When a user edits a row (e.g., changes SALARY), the grid sends a PUT request to the ORDS endpoint (e.g., /employees/101), updating the corresponding record.

A . POST: Creates new records, used for inserts, not updates.

B . GET: Retrieves data, used for initial grid population, not updates.

Technical note: ORDS maps PUT to an update operation on the underlying table, requiring the REST endpoint to support this method.

#### NEW QUESTION # 18

.....

With the best quality of 1Z1-771 braindumps pdf from our website, getting certified will be easier and fast. For the preparation of the certification exam, all you have to do is choose the most reliable 1Z1-771 real questions and follow our latest study guide. You can completely rest assured that our 1Z1-771 Dumps Collection will ensure you get high mark in the formal test. You will get lots of knowledge from our website.
