SAP C-BCSBN-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Customer Alignment and Value Communication: The final topic evaluates the ability to align SAP's supply chain solutions with specific customer business needs. It includes tailoring recommendations, addressing customer challenges, and clearly communicating value propositions. Sales professionals must demonstrate skills in articulating how SAP SCM delivers measurable business outcomes.
Topic 2	<ul style="list-style-type: none">Integration and Strategic Value of SAP Business Suite with SCM: This section explores how the SAP Business Suite integrates with SAP SCM to improve overall supply chain performance. Candidates are assessed on their understanding of how this integration enhances visibility, collaboration, and responsiveness across the supply chain, enabling more efficient and agile operations.
Topic 3	<ul style="list-style-type: none">Understanding and Positioning SAP SCM Capabilities: This topic focuses on the ability to position the SAP Business Suite by emphasizing the features and benefits of SAP Supply Chain Management (SCM) solutions. It includes a strong understanding of how SAP SCM supports end-to-end supply chain processes such as demand planning, supply network planning, production planning, logistics, and order fulfillment.

SAP Certified Associate - Positioning SAP Business Suite via SAP Supply Chain Management Solutions Sample Questions (Q26-Q31):

NEW QUESTION # 26

Which categories does the Operate pillar encompass? Note: There are 3 correct answers to this question.

- A. Field Service Management
- **B. Asset Management**
- **C. Business Network for Logistics**
- **D. Transportation Management**
- E. Business Network for Assets

Answer: B,C,D

Explanation:

Solution:

Based on content from learning.sap.com, the Operate pillar of SAP's supply chain suite includes the following areas:

- * A. Transportation Management - Covering planning, execution, and optimization of transportation processes.
- * C. Business Network for Logistics - Enabling real-time collaboration, freight visibility, and event management with logistics partners. learning.sap.com
- * E. Asset Management - Focusing on maintenance, uptime, and performance monitoring within operations.

Options B (Business Network for Assets) and D (Field Service Management) are not listed under the Operate pillar on learning.sap.com.

NEW QUESTION # 27

Which processes help companies integrate renewable energy usage and risk assessment into sustainable supply chain strategies?

Note: There are 2 correct answers to this question.

- **A. Combine sustainability data with external risk factors**
- B. Focus on supplier consolidation for cost reduction
- C. Focus on financial planning with less focus on ecological aspects
- **D. Automate carbon reduction in transportation management**

Answer: A,D

Explanation:

Solution:

The two correct answers from learning.sap.com are:

- * B. Automate carbon reduction in transportation management

SAP integrates sustainability features into Transportation Management (TM) to automatically optimize routes and modes, reducing CO₂ emissions as part of smart logistics planning. This supports sustainable transport strategies within supply chains.

- * D. Combine sustainability data with external risk factors

The Sustainability Control Tower and related offerings merge internal sustainability metrics (like carbon footprints and energy use) with external data-such as climate risk profiles, regulatory changes, and resource constraints-to enable proactive, risk-aware decisions in supply chain operations. Options A and C are not aligned with the described sustainable supply chain processes on learning.sap.com.

NEW QUESTION # 28

How can the carbon footprint tracking feature within SAP Business Suite assist companies in integrating sustainability into product design and logistics? Note: There are 2 correct answers to this question.

- A. Reduces overall energy consumption, focusing on internal processes
- B. Focuses on optimizing financial flows while ignoring sustainability parameters
- **C. Supports the use of environmentally friendly materials**
- **D. Connects lifecycle data to make informed eco-conscious decisions**

Answer: C,D

Explanation:

Solution:

The two correct answers based on learning.sap.com regarding how the carbon footprint tracking feature within SAP Business Suite supports sustainability in product design and logistics are:

* A. Supports the use of environmentally friendly materials

The feature enables product designers to access carbon footprint data, guiding the selection of lower impact materials at the design stage learning.sap.com

* C. Connects lifecycle data to make informed eco-conscious decisions

It integrates lifecycle and logistics carbon data into decision-making processes, allowing teams to evaluate and optimize sustainability trade-offs across the value chain.

Options B and D are incorrect, as the feature doesn't ignore sustainability parameters nor solely focus on internal energy consumption.

NEW QUESTION # 29

How does SAP Business Network support real-time order tracking and dispute resolution in retail?Note:

There are 2 correct answers to this question.

- A. Simplifies manufacturing processes, strengthening coordination within the company
- B. Provides supply chain visibility for informed decision-making with partners
- C. Allows digital collaboration through connections with trading partners
- D. Increases operational efficiency through automation of internal financial processes

Answer: B,C

Explanation:

Solution:

The two correct answers from learning.sap.com are:

* A. Allows digital collaboration through connections with trading partners SAP Business Network enables real-time collaboration and document exchange-purchase orders, confirmations, ship notices, invoices-with both SAP and non-SAP suppliers, allowing all parties to interact via a unified platform.

* C. Provides supply chain visibility for informed decision-making with partners It also integrates with Global Track & Trace to deliver real-time order tracking details-shipment status, ETAs, delays-and supports event-based communications to resolve disputes faster.

Options B and D are not emphasized in learning.sap.com's context for order tracking and dispute resolution in retail.

NEW QUESTION # 30

How do inventory optimization features in SAP IBP help companies to improve transparency in inventory management?

- A. Simplifies procurement procedures
- B. Integrates third-party systems
- C. Establishes connections between data sources
- D. Automates financial reporting

Answer: C

Explanation:

Solution:

The correct answer from learning.sap.com on how inventory optimization in SAP IBP improves transparency in inventory management is:

* B. Establishes connections between data sources.

SAP IBP enhances transparency by integrating diverse data-real-time ERP figures, forecasting models, supply signals, and external inputs-into a unified planning platform. This centralized visibility ensures stakeholders across the supply chain can make informed, aligned decisions based on real-time inventory insights.

Options A, C, and D are not highlighted in the context of transparency via inventory optimization on learning.sap.com

NEW QUESTION # 31
