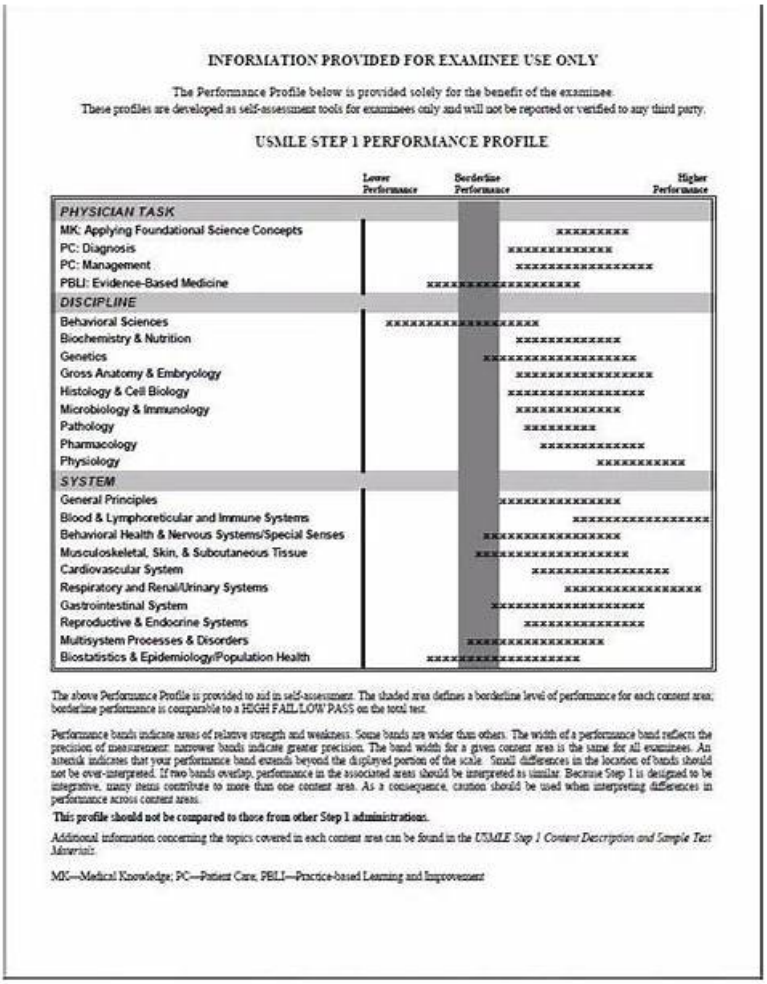
高效的156-587題庫|高通過率的考試材料|精心準備的156-587權威考題



INFORMATION PROVIDED FOR EXAMINEE USE ONLY

The Performance Profile below is provided solely for the benefit of the examinee.
These profiles are developed as self-assessment tools for examinees only and will not be reported or verified to any third party.

USMLE STEP 1 PERFORMANCE PROFILE

	Lower Performance	Borderline Performance	Higher Performance
PHYSICIAN TASK			
MK: Applying Foundational Science Concepts			xxxxxxxxx
PC: Diagnosis			xxxxxxxxxxxx
PC: Management			xxxxxxxxxxxxxxxxx
PBLI: Evidence-Based Medicine		xxxxxxxxxxxxxxxxxxx	
DISCIPLINE			
Behavioral Sciences	xxxxxxxxxxxxxxxxxxx		
Biochemistry & Nutrition			xxxxxxxxxxxx
Genetics		xxxxxxxxxxxxxxxxxx	
Gross Anatomy & Embryology			xxxxxxxxxxxxxxxx
Histology & Cell Biology		xxxxxxxxxxxxxxxxx	
Microbiology & Immunology			xxxxxxxxxxxxx
Pathology			xxxxxxxxx
Pharmacology			xxxxxxxxxxxxx
Physiology			xxxxxxxxxxx
SYSTEM			
General Principles			xxxxxxxxxxxxxxx
Blood & Lymphoreticular and Immune Systems			xxxxxxxxxxxxxxxxx
Behavioral Health & Nervous Systems/Special Senses		xxxxxxxxxxxxxxxx	
Musculoskeletal, Skin, & Subcutaneous Tissue		xxxxxxxxxxxxxxxxxx	
Cardiovascular System			xxxxxxxxxxxxxxxx
Respiratory and Renal/Urinary Systems			xxxxxxxxxxxxxxxxx
Gastrointestinal System		xxxxxxxxxxxxxxxxx	
Reproductive & Endocrine Systems			xxxxxxxxxxxxxxx
Multisystem Processes & Disorders		xxxxxxxxxxxxxxxx	
Biostatistics & Epidemiology/Population Health		xxxxxxxxxxxxxxxxxxx	

The above Performance Profile is provided to aid in self-assessment. The shaded area defines a borderline level of performance for each content area; borderline performance is comparable to a HIGH FAIL/LOW PASS on the total test.

Performance bands indicate areas of relative strength and weakness. Some bands are wider than others. The width of a performance band reflects the precision of measurement: narrower bands indicate greater precision. The band width for a given content area is the same for all examinees. An asterisk indicates that your performance band extends beyond the displayed portion of the scale. Small differences in the location of bands should not be over-interpreted. If two bands overlap, performance in the associated areas should be interpreted as similar. Because Step 1 is designed to be integrative, many items contribute to more than one content area. As a consequence, caution should be used when interpreting differences in performance across content areas.

This profile should not be compared to those from other Step 1 administrations.

Additional information concerning the topics covered in each content area can be found in the *USMLE Step 1 Content Description and Sample Test Materials*.

MK—Medical Knowledge; PC—Patient Care; PBLI—Practice-based Learning and Improvement

BONUS!!! 免費下載NewDumps 156-587考試題庫的完整版：https://drive.google.com/open?id=1BGMA19-8ueg5YLG6aqFuPO6eKRnsfn7P

NewDumps是唯一一個能為你提供品質最好，更新速度最快的CheckPoint 156-587 認證考試的資料網站。或許其他網站也提供CheckPoint 156-587 認證考試的相關資料，但如果你相互比較你就會發現NewDumps提供的資料是最全面，品質最高的，而且其他網站的大部分資料主要來源於NewDumps。

CheckPoint 156-587 考試大綱：

主題	簡介
主題 1	• Advanced Troubleshooting with Logs and Events: This section of the exam measures the skills of Check Point Security Administrators and covers the analysis of logs and events for troubleshooting. Candidates will learn how to interpret log data to identify issues and security threats effectively.
主題 2	• Advanced Firewall Kernel Debugging: This section of the exam measures the skills of Check Point Network Security Administrators and focuses on kernel-level debugging for firewalls. Candidates will learn how to analyze kernel logs and troubleshoot firewall-related issues at a deeper level.
主題 3	• Advanced Gateway Troubleshooting: This section of the exam measures the skills of Check Point Network Security Engineers and addresses troubleshooting techniques specific to gateways. It includes methods for diagnosing connectivity issues and optimizing gateway performance.

主題 4	• Advanced Access Control Troubleshooting: This section of the exam measures the skills of Check Point System Administrators in demonstrating expertise in troubleshooting access control mechanisms. It involves understanding user permissions and resolving authentication issues.
主題 5	• Advanced Site-to-Site VPN Troubleshooting: This section of the exam measures the skills of Check Point System Administrators and covers troubleshooting site-to-site VPN connections.
主題 6	• Introduction to Advanced Troubleshooting: This section of the exam measures the skills of Check Point Network Security Engineers and covers the foundational concepts of advanced troubleshooting techniques. It introduces candidates to various methodologies and approaches used to identify and resolve complex issues in network environments.

156-587題庫 |完美通過Check Point Certified Troubleshooting Expert - R81.20考試

眾所周知，156-587認證在IT認證中有很大的影響力，近年來，該認證已經成為許多成功IT公司的“進門”標準。想快速通過認證考試，可以選擇我們的CheckPoint 156-587考古題。選擇我們NewDumps網站，您不僅可以通過熱門的156-587考試，而且還可以享受我們提供的一年免費更新服務。擁有CheckPoint 156-587認證可以幫助在IT領域找工作的人獲得更好的就業機會，也將會為成功的IT事業做好鋪墊。

最新的 CCTE 156-587 免費考試真題 (Q43-Q48):

問題 #43
What are the four main database domains?

- A. System. Global. Log. Event
- B. System, User, Global. Log
- C. System, User, Host, Network
- D. Local, Global, User, VPN

答案：B

解題說明：
The four main database domains are System, User, Global, and Log. Each domain contains different types of data and serves different purposes123. The System domain contains the configuration data of the Security Management Server (SMS), such as the SMS name, IP address, licensing, and installed products. The User domain contains the configuration data of the security policy, such as the objects, rules, services, and VPN communities. The Global domain contains the configuration data of the global policy, such as the global objects, rules, and services. The Log domain contains the log data of the security events, such as the source, destination, action, and time of each event123. Reference:

3: Check Point R81 Security Management Administration Guide, Chapter 2: Security Management Server, Page 15

問題 #44
Which of the following file is commonly associated with troubleshooting crashes on a system such as the Security Gateway?

- A. tcpdump
- B. fw monitor
- C. CPMIL dump
- D. core dump

答案：D

問題 #45
What is the simplest and most efficient way to check all dropped packets in real time?

- A. tail -f $FWDIR/log/fw.log |grep drop in expert mode
- B. fw ctl zdebug + drop in expert mode
- C. cat /dev/fw1/log in expert mode
- D. Smartlog

答案：B

解題說明：
The simplest and most efficient way to check all dropped packets in real time is C. fw ctl zdebug + drop in expert mode. This command is a shortcut command that sets the kernel debug flags to a predefined value and prints the debug output to the standard output. It is useful for general debugging of common issues, such as traffic drops, NAT, VPN, or clustering. It has a small buffer size and does not require additional steps to start or stop the debugging. However, it has some limitations, such as it cannot be used with SecureXL, it cannot filter the output by chain modules, and it cannot save the output to a file12.
The other commands are not as simple or efficient as the fw ctl zdebug + drop command. The command tail -f $FWDIR/log/fw.log |grep drop in expert mode will only show the drops that are logged in the fw.log file, which may not include all the drops that occur in the kernel. The command cat /dev/fw1/log in expert mode will show the raw binary data of the kernel debug buffer, which is not human-readable and may contain irrelevant information. The command Smartlog will show the drops that are indexed and stored in the SmartEvent database, which may not be in real time and may depend on the log server performance12.

問題 #46
Check Point provides tools & commands to help you to identify issues about products and applications.
Which Check Point command can help you to display status and statistics information for various Check Point products and applications?

- A. cpstat
- B. fwstat
- C. CPstat
- D. CPview

答案：A

解題說明：
The correct Check Point command to display status and statistics information for various Check Point products and applications is cpstat. This command provides a dynamic real-time view of the system, showing the information such as the number of connections, packets, drops, CPU usage, memory usage, disk space, license status, and blade status. The cpstat command can be customized by using various options and flags to specify the product, the interval, the fields, and the format of the output. For example, to display the status and statistics of the firewall module every 5 seconds, the command would be:
cpstat fw -f all -i 5
The other commands are incorrect because:
* A. CPview is a Check Point tool that displays information about the system performance, such as the CPU, memory, disk, network, and firewall. It does not show information about other products and applications, such as VPN, Identity Awareness, Anti-Virus, etc.
* C. fwstat is not a valid command. The correct command is fw ctl pstat, which displays information about the firewall kernel, such as the number of connections, packets, drops, memory, and synchronization. It does not show information about other products and applications, such as VPN, Identity Awareness, Anti-Virus, etc.
* D. CPstat is not a valid command. The correct command is cpstat, which is case-sensitive.
References:
* cpstat - Check Point Software
* CPView Utility
* fw ctl pstat - Check Point Software
* (CCTE) - Check Point Software

問題 #47

After kernel debug with "fw ctl debug" you received a huge amount of information. It was saved in a very large file that is difficult to open and analyze with standard text editors. Suggest a solution to solve this issue.

- A. Divide debug information into smaller files. Use "fw ctl kdebug -f -o "filename" -m 25 - s "1024"
- B. Use "fw ctl zdebug" because of 1024KB buffer size
- C. Reduce debug buffer to 1024KB and run debug for several times
- D. Use Check Point InfoView utility to analyze debug output

答案：A

問題 #48

.....

在如今競爭激烈的IT行業中，通過了CheckPoint 156-587 認證考試是有很多好處的。因為有了CheckPoint 156-587 認證證書就可以提高收入。拿到了CheckPoint 156-587 認證證書的人往往要比沒有證書的同行工資高很多。可是CheckPoint 156-587 認證考試不是很容易通過的，所以NewDumps是一個可以幫助你增長收入的網站.
