NEW QUESTION # 79

Categorise the following statement:

"For an identified data leakage scenario, security team is struggling to configure rules."

- A. Enforcement
- **B. Capability**
- C. Visibility
- D. Demonstration

Answer: B

Explanation:

The statement reflects an organization's difficulty in operationalizing privacy safeguards in response to a known threat scenario. According to the DSCI Assessment Framework for Privacy (DAF-P), "Capability" refers to an organization's ability to implement and maintain technical, procedural, and administrative controls effectively.

A struggling security team in configuring rules for a known leakage scenario indicates a gap in technical expertise or resources, which directly correlates with a lack of "Capability." This category assesses how prepared an organization is in deploying privacy controls, managing incidents, and aligning security technologies with privacy requirements.

Thus, the challenge in configuring protective rules is best categorized under "Capability" as it denotes a functional inadequacy in handling privacy-related incidents.

- A. Foreseeable challenges in the effective implementation of the policy
- B. Awareness of the business units about the privacy policy
- C. Changes in the legal/regulatory regime
- D. Privacy policies of industry peers

While several factors can influence the review of a privacy policy, changes in the legal or regulatory environment are the most critical. The DSCI Privacy Framework underscores that privacy policies must be aligned with applicable laws and standards.
