

Prep4pass SAP C_S4PM_2504 Web-Based Practice Test

P.S. Free & New C_S4PM_2504 dumps are available on Google Drive shared by Prep4pass: <https://drive.google.com/open?id=10Xbs8J3k2EpYlX7yIs7cR8GV3emSPdyR>

We update our C_S4PM_2504 test prep within one year and you will download free which you need. After one year, we provide the client 50% discount benefit if buyers want to extend their service warranty so you can save much money. If you are the old client, you can enjoy some certain discount when buying C_S4PM_2504 Exam Torrent so you can enjoy more service and more benefits. Our update can provide the latest and most useful C_S4PM_2504 prep torrent to you and you can learn more and pass the C_S4PM_2504 exam successfully.

SAP C_S4PM_2504 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Project Management Organizational Change Management (OCM): This section of the exam measures the skills of Project Managers and covers the key principles of managing SAP cloud implementation projects, including team coordination, stakeholder communication, and change management. It evaluates the ability to lead project activities, manage expectations, and handle resistance during digital transformation. Emphasis is placed on aligning organizational goals with implementation strategies to ensure effective user adoption and project success.
Topic 2	<ul style="list-style-type: none"> SAP S 4HANA Cloud Public Edition Implementation: This section of the exam measures the skills of Implementation Consultants and covers the foundational aspects of deploying SAP S 4HANA Cloud Public Edition in a business environment. It focuses on understanding system architecture, scope definition, and the technical and functional setup required for a successful implementation. The candidate is expected to have a strong grasp of how to execute the necessary configuration and adoption tasks that align with customer-specific requirements.
Topic 3	<ul style="list-style-type: none"> SAP Activate Methodology: This section of the exam measures skills of Business Process Architects and covers the structure and practical application of SAP Activate. It includes understanding the phases of the methodology: Discover, Prepare, Explore, Realize, Deploy, and Run, and the use of supporting tools such as SAP Roadmap Viewer and SAP Best Practices. Candidates are expected to demonstrate the ability to apply this methodology to streamline cloud implementation processes and ensure agile delivery.

2026 C_S4PM_2504 Certified Questions | Perfect SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects 100% Free Relevant

Exam Dumps

SAP C_S4PM_2504 exam include all the important concepts leaving behind the stories to tell for some other time. For the complete and quick SAP C_S4PM_2504 preparation the SAP C_S4PM_2504 Exam Questions are the best study material. With SAP C_S4PM_2504 Exam Practice test questions you can ace your SAP C_S4PM_2504 exam preparation simply and quickly to pass the final C_S4PM_2504 exam easily.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q36-Q41):

NEW QUESTION # 36

Which embedded support offerings can you make use of in the SAP Fiori Launchpad? Note: There are 3 correct answers to this question.

- A. Recorded system simulations from the Learning Center
- B. Digital assistance from generative AI (SAP Joule)
- C. Assessment questions from the SAP Learning Hub
- D. Video tutorials from the SAP Help Portal
- E. Recorded webinars from the SAP Learning Website

Answer: A,B,D

Explanation:

The SAP Fiori Launchpad serves as the central entry point for users to access applications and support resources in SAP S/4HANA Cloud Public Edition. Embedded support offerings are designed to enhance user experience and provide immediate assistance within the system.

* Option A: Video tutorials from the SAP Help PortalCorrect. The SAP Help Portal is a key resource integrated into the SAP Fiori Launchpad, providing access to video tutorials that guide users on system functionalities. These tutorials are embedded to support end-users directly within the application interface. According to SAP's official documentation, the SAP Help Portal offers contextual help, including videos, to assist users in navigating and using SAP S/4HANA Cloud features.

* Option B: Recorded system simulations from the Learning CenterCorrect. The Learning Center provides recorded system simulations that demonstrate specific processes or tasks within SAP S/4HANA Cloud. These simulations are accessible via the SAP Fiori Launchpad to support training and user adoption. SAP's Learning Center is part of the enablement content available to customers, as outlined in the SAP S/4HANA Cloud Public Edition implementation guides.

* Option C: Digital assistance from generative AI (SAP Joule)Correct. SAP Joule is a generative AI- powered digital assistant integrated into the SAP Fiori Launchpad. It provides real-time assistance, answers queries, and offers guidance on system operations. SAP's official announcements highlight SAP Joule as a tool to enhance user productivity in SAP S/4HANA Cloud Public Edition.

* Option D: Recorded webinars from the SAP Learning WebsiteIncorrect. While webinars are available through the SAP Learning Website, they are not typically embedded within the SAP Fiori Launchpad. Webinars are external resources that require separate access, not direct integration into the Launchpad interface.

* Option E: Assessment questions from the SAP Learning HubIncorrect. The SAP Learning Hub provides assessment questions for training purposes, but these are not embedded in the SAP Fiori Launchpad. They are part of the broader SAP Learning Hub platform, which is accessed separately.

:

SAP Help Portal: Provides video tutorials and contextual help (<https://help.sap.com>).

SAP Learning Center: Offers system simulations for user training.

SAP Official Documentation on SAP Joule: Describes its integration into SAP FioriLaunchpad for digital assistance.

SAP S/4HANA Cloud Public Edition Implementation Guide: Details embedded support features in the Fiori Launchpad.

NEW QUESTION # 37

When applying a cloud mindset in a greenfield implementation, which of the following should you consider?

Note: There are 2 correct answers to this question.

- A. Use supported extensibility technologies
- B. Ensure transparency on deviations
- C. Use quality gates
- D. Use SAP Digital Discovery Assessment

Answer: A,B

Explanation:

A cloud mindset in a greenfield implementation of SAP S/4HANA Cloud Public Edition emphasizes standardization, minimal customizations, and adherence to SAP Best Practices. Specific considerations ensure alignment with this approach.

* Option A: Use quality gates Incorrect. While quality gates are part of the SAP Activate methodology, they are not specific to the cloud mindset; they apply to all implementations. The SAP Activate Methodology Guide states, "Quality gates are a standard practice in SAP Activate, not unique to the cloud mindset, which focuses on standardization and extensibility."

* Option B: Ensure transparency on deviations Correct. Transparency on deviations from standard processes is critical to maintain cloud compliance and manage technical debt. The SAP S/4HANA Cloud Implementation Guide explains, "A cloud mindset requires transparency on deviations from SAP Best Practices, ensuring that customizations are documented and justified to minimize future upgrade complexities."

* Option C: Use SAP Digital Discovery Assessment Incorrect. The Digital Discovery Assessment is a tool used in the Discover phase, not a specific consideration of the cloud mindset. The SAP S/4HANA Cloud Study Guide notes, "The Digital Discovery Assessment supports project planning, but the cloud mindset focuses on operational principles like standardization."

* Option D: Use supported extensibility technologies Correct. Using supported extensibility technologies, such as SAP BTP or in-app extensions, ensures cloud-compliant customizations. The SAP S/4HANA Cloud Extensibility Guide confirms, "A cloud mindset emphasizes the use of supported extensibility technologies, like SAP BTP and Fiori extensibility apps, to maintain compatibility with SAP S/4HANA Cloud upgrades." Extract from Official Documentation:

* SAP S/4HANA Cloud Implementation Guide (SAP Help Portal, <https://help.sap.com>): "Applying a cloud mindset in a greenfield implementation involves ensuring transparency on deviations from standard processes and using supported extensibility technologies to maintain cloud compliance."

* SAP S/4HANA Cloud Extensibility Guide (SAP Community, <https://community.sap.com>): "The cloud mindset prioritizes supported extensibility technologies, such as SAP BTP, and transparent documentation of deviations to ensure seamless upgrades and system stability." Additional Context:

The cloud mindset is about embracing standardization to leverage SAP's continuous innovation cycles.

Transparency on deviations helps manage customizations, while supported extensibility technologies ensure that extensions are upgrade-safe, aligning with SAP's cloud-first strategy for rapid value delivery.

SAP Community: SAP S/4HANA Cloud Extensibility Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details cloud mindset principles.

SAP Activate Methodology: Outlines greenfield implementation considerations.

NEW QUESTION # 38

What are objectives of the Executive board as opposed to the Steering Committee? Note: There are 3 correct answers to this question.

- **A. To allocate project funding**
- B. To approve project goals
- **C. To approve the project vision**
- D. To approve project results
- **E. To set business vision and goals**

Answer: A,C,E

NEW QUESTION # 39

How does identity and access management work in SAP S/4HANA Cloud Public Edition?

- **A. Through predefined business roles and catalogs assigned to users**
- B. Through a matrix-based permission system where each user is assigned to specific organizational levels and functional areas
- C. Through an AI-driven security model that adjust permissions dynamically by analyzing user behavior patterns
- D. Through departmental security tokens that are issued to organizational units rather than individual users

Answer: A

NEW QUESTION # 40

What are some purposes of using Business Driven Configuration Questionnaires (BDCQs) during the implementation of SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. To gather configuration values and validate solution fit
- B. To suggest new features in the SAP S/4HANA Cloud, Public Edition solution
- C. To ensure the appropriate level of business context for the Fit-to-Standard workshop
- D. To reduce the need for customer involvement

Answer: A,C

Explanation:

Business Driven Configuration Questionnaires (BDCQs) are tools used during the Explore phase of the SAP Activate methodology to collect configuration data and align the SAP S/4HANA Cloud Public Edition solution with customer requirements.

* Option A: To gather configuration values and validate solution fit Correct. BDCQs collect configuration values to tailor the solution and validate its fit against customer needs. The SAP S/4HANA Cloud Implementation Guide states, "BDCQs are used to gather configuration values and validate the solution fit during the Explore phase, ensuring the SAP S/4HANA Cloud system aligns with customer requirements."

* Option B: To suggest new features in the SAP S/4HANA Cloud, Public Edition solution Incorrect.

BDCQs focus on configuring existing features, not suggesting new ones, which is handled through SAP's innovation feedback process. The SAP Activate Methodology Guide notes, "BDCQs are for configuration data collection, not for proposing new features, which are managed separately."

* Option C: To reduce the need for customer involvement Incorrect. BDCQs require active customer involvement to provide accurate configuration data. The SAP S/4HANA Cloud Study Guide clarifies, "BDCQs rely on customer input to ensure accurate configuration, increasing, not reducing, customer involvement."

* Option D: To ensure the appropriate level of business context for the Fit-to-Standard workshop Correct. BDCQs provide business context to inform Fit-to-Standard workshops, ensuring discussions are grounded in customer requirements. The SAP S/4HANA Cloud Implementation Guide explains,

"BDCQs ensure the appropriate business context for Fit-to-Standard workshops by collecting detailed configuration data, enabling effective process validation." Extract from Official Documentation:

* SAP S/4HANA Cloud Implementation Guide (SAP Help Portal, <https://help.sap.com>): "Business Driven Configuration Questionnaires (BDCQs) are used to gather configuration values, validate solution fit, and provide business context for Fit-to-Standard workshops, ensuring alignment with customer needs."

* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "BDCQs play a critical role in the Explore phase by collecting configuration data and establishing business context, enabling effective Fit-to-Standard workshops and solution validation." Additional Context:

BDCQs bridge the gap between customer requirements and standard SAP Best Practices, ensuring that Fit-to-Standard workshops are productive and focused. They are a key accelerator in the SAP Activate methodology, streamlining configuration and validation processes.
