

# Study 1Z1-771 Dumps - Valid 1Z1-771 Mock Exam

 **Get the Optimal Oracle 1Z0-771 Exam PDF Questions**  
— Qualify on Your First Shot!

Are you aiming to clear the Oracle 1Z0-771 exam questions on your very first try? Certification exams in 2025 are more difficult than ever, demanding extensive knowledge and practical experience. To increase your chances of achievement, you need reliable and latest learning tools. **HelloDumps** provides [Oracle 1Z0-771 dumps](#) and expert-reviewed study materials to help you study effectively. The top part? You can now enjoy an exclusive 35% deal on all study materials!

## Why Choose HelloDumps for Your 1Z0-771 Exam Preparation?

### **Authentic 1Z0-771 Exam Questions – Obtain an Advantage Over Others**

HelloDumps offers actual exam-like questions, closely consistent with the latest 1Z0-771 composition, difficulty level, and syllabus of the Oracle APEX Cloud Developer Professional certification. Practicing these questions helps you understand the test structure and enhances your achievement.

 **Retrieve Oracle APEX Cloud Developer Professional Exam Questions 2025 Here:** <https://hellodumps.com/1z0-771-dumps.html>

### **Three User-Friendly Learning Formats**

We provide study materials in various formats to suit different learning styles:

 **PDF Composition** – Study on any device, anytime, anywhere.

 **Desktop Preparation Test** – Simulates real exam conditions with customizable mock tests.

 **Web-Based Drill Test** – No installation required—practice directly from your browser.

P.S. Free 2026 Oracle 1Z1-771 dumps are available on Google Drive shared by TestValid: <https://drive.google.com/open?id=1zzMhTCCh41duHN8SimVmYiClgsklkDg>

You can use this Oracle simulation software without an internet connection after installation. Tracking and reporting features of our Oracle APEX Cloud Developer Professional 1Z1-771 Practice Exam software makes it easier for you to identify and overcome mistakes. Customization feature of this format allows you to change time limits and questions numbers of mock exams.

Do you long to get the 1Z1-771 certification to improve your life? Are you worried about how to choose the 1Z1-771 learning product that is suitable for you? If your answer is yes, we are willing to tell you that you are a lucky dog, because you meet us, it is very easy for us to help you solve your problem. The 1Z1-771 latest question from our company can help people get their 1Z1-771 certification in a short time.

## Oracle 1Z1-771 PDF Questions - Most Effective Exam Preparation Method

You only need 20-30 hours to practice our software materials and then you can attend the exam. It costs you little time and energy. The 1Z1-771 exam questions are easy to be mastered and simplified the content of important information. The Oracle APEX Cloud Developer Professional test guide conveys more important information with amount of answers and questions, thus the learning for the examinee is easy and highly efficient. The language which is easy to be understood and simple, 1Z1-771 Exam Questions are suitable for any learners no matter he or she is a student or the person who have worked for many years with profound experiences. So it is convenient for the learners to master the 1Z1-771 guide torrent and pass the exam in a short time. The amount of the examinee is large.

## Oracle 1Z1-771 Exam Syllabus Topics:

| Topic    | Details   |
|----------|---|
| Topic 1  | <ul style="list-style-type: none"><li>• <b>Creating Application Page Controls:</b> This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.</li></ul>   |
| Topic 2  | <ul style="list-style-type: none"><li>• <b>Getting Started with Oracle APEX on the Oracle Autonomous Database:</b> This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.</li></ul> |
| Topic 3  | <ul style="list-style-type: none"><li>• <b>Extending Application Capabilities:</b> This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.</li></ul>  |
| Topic 4  | <ul style="list-style-type: none"><li>• <b>Creating Progressive Web Apps:</b> This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.</li></ul>  |
| Topic 5  | <ul style="list-style-type: none"><li>• <b>Adding Computations, Processes, Validations, and Branches:</b> This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.</li></ul>   |
| Topic 6  | <ul style="list-style-type: none"><li>• <b>Developing Reports:</b> This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.</li></ul>  |
| Topic 7  | <ul style="list-style-type: none"><li>• <b>Creating and Using Dynamic Actions and Plug-ins:</b> This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.</li></ul>  |
| Topic 8  | <ul style="list-style-type: none"><li>• <b>Leveraging Generative AI in Oracle APEX:</b> This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.</li></ul>   |
| Topic 9  | <ul style="list-style-type: none"><li>• <b>Using Themes and Theme Styles:</b> This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.</li></ul>  |
| Topic 10 | <ul style="list-style-type: none"><li>• <b>Creating and Using Forms:</b> This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.</li></ul>   |
| Topic 11 | <ul style="list-style-type: none"><li>• <b>Using SQL Workshop:</b> This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.</li></ul>                             |
| Topic 12 | <ul style="list-style-type: none"><li>• <b>Migrating Application Development Between Environments:</b> This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.</li></ul>                           |
| Topic 13 | <ul style="list-style-type: none"><li>• <b>Managing Pages and Regions:</b> This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.</li></ul>   |

|          |   |
|----------|---|
| Topic 14 | <ul style="list-style-type: none"> <li>Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.</li> </ul>             |
| Topic 15 | <ul style="list-style-type: none"> <li>Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.</li> </ul>    |
| Topic 16 | <ul style="list-style-type: none"> <li>Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.</li> </ul>                    |
| Topic 17 | <ul style="list-style-type: none"> <li>Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.</li> </ul> |

## Oracle APEX Cloud Developer Professional Sample Questions (Q48-Q53):

### NEW QUESTION # 48

Which step is mandatory to make an existing Oracle APEX application Progressive Web App (PWA) enabled?

- A. Verify that Friendly URLs are turned on in the Application Definition.
- B. Add custom JavaScript to support offline functionality.
- **C. Enable the PWA flag in the Application Definition.**
- D. Enable RESTful Web Services in the application.

**Answer: C**

Explanation:

To enable an existing APEX application as a Progressive Web App (PWA), the mandatory step is:

Enable the PWA flag in the Application Definition: In the Application Definition attributes under "Progressive Web App," setting "Enable PWA" to "Yes" activates PWA features like installability, push notifications, and service worker generation. This is the foundational step, after which optional customizations (e.g., icons, manifest) can be added.

Friendly URLs: While recommended for modern apps, they're not required for PWA functionality.

Custom JavaScript: Optional for offline capabilities, but not mandatory for basic PWA enablement.

RESTful Web Services: Unrelated to PWA features.

This step transforms the app into a PWA, enhancing user experience on mobile and desktop devices with native-like behavior.

### NEW QUESTION # 49

The Movies faceted search report is filtered only when the Apply button for a selected facet is clicked. What must be done in the Page Designer so that report filtering is automatically executed when any facet value is selected?

- A. Navigate to each facet and then in the Property Editor, turn on Client-Side Filtering.
- **B. Navigate to the faceted search region Attributes, and disable the Batch Facet Changes attribute.**
- C. Navigate to the faceted search region Attributes, and turn off the Show Facet Name attribute.

**Answer: B**

Explanation:

By default, faceted search can "batch" changes, requiring an "Apply" button click to filter the report. To enable automatic filtering:

Disable the Batch Facet Changes attribute: In Page Designer, under the Faceted Search region's Attributes, setting "Batch Facet Changes" to "No" ensures the report refreshes immediately when a facet value is selected, improving responsiveness. This triggers an AJAX call to update the report without a manual submit.

Show Facet Name: This controls facet label visibility, unrelated to filtering behavior.

Client-Side Filtering: This applies to Interactive Reports/Grids, not faceted search regions, and isn't the correct solution here.

This adjustment enhances the user experience by providing instant feedback.

### NEW QUESTION # 50

Which two statements are true about creating and managing an APEX Workspace?

- A. A workspace can be associated with only one schema.
- **B. New schemas cannot be created during workspace creation.**
- **C. During workspace creation, you can associate the workspace with an existing database schema.**
- D. You can create only two workspaces in an APEX Service (APEX Application Development) instance.

**Answer: B,C**

Explanation:

APEX Workspaces define development environments tied to database schemas:

A . During workspace creation, you can associate the workspace with an existing database schema: In the Workspace creation wizard (via Instance Administration), you select an existing schema (e.g., "HR") to link, enabling access to its objects. This is a standard step, ensuring immediate usability.

B . New schemas cannot be created during workspace creation: APEX doesn't provide a UI to create schemas here; schemas must pre-exist in the database, created via SQL (e.g., CREATE USER).

C . A workspace can be associated with only one schema: False; a workspace can associate with multiple schemas post-creation via "Manage Workspace to Schema Assignments." D . You can create only two workspaces: False; the limit depends on the APEX instance configuration (e.g., cloud service tier), not a fixed number like two.

Use case: Associating existing schemas is key for leveraging pre-built databases.

### NEW QUESTION # 51

Which three data types are supported by Oracle APEX Workflow parameters and item types?

- **A. VARCHAR**
- **B. CLOB**
- C. Image
- **D. NUMBER**

**Answer: A,B,D**

Explanation:

Workflow parameters and page items in APEX support:

B . NUMBER: For numeric values (e.g., 123.45), used in calculations or IDs.

C . CLOB: For large text (e.g., descriptions), stored as character large objects.

D . VARCHAR: For variable-length strings (e.g., EMPLOYEE\_NAME), capped at 4000 characters in most cases.

A . Image: Not a supported data type for parameters or items; images are handled as BLOBs or file uploads, not directly as a Workflow parameter type.

These types align with Oracle Database, ensuring robust data handling in workflows.

### NEW QUESTION # 52

What do you achieve by performing the "Refresh Working Copy" task?

- A. Update the changes from one Working Copy to another.
- **B. Get the latest updates from the Main application.**
- C. Merge the Working Copy changes with the Main application.

**Answer: B**

Explanation:

Working Copies in APEX allow safe experimentation:

C . Get the latest updates from the Main application: "Refresh Working Copy" (in App Builder > Working Copies) pulls changes from the Main application into the Working Copy, ensuring it reflects the latest state (e.g., new pages, fixes) without overwriting Working Copy changes.

A . Merge with Main: Merging is a separate "Merge Working Copy" task.

B . Update between Working Copies: Not supported; refreshing is Main-to-Working only.

Practical note: Use this to sync collaborative development efforts.
