Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q499-Q504):

NEW QUESTION # 499

A company hosts its website on Amazon S3. The website serves petabytes of outbound traffic monthly, which accounts for most of the company's AWS costs. What should a solutions architect do to reduce costs?

- A. Rearchitect the website to run on a combination of Amazon API Gateway and AWS Lambda.
- B. **Configure Amazon CloudFront with the existing website as the origin.**
- C. Move the website to Amazon EC2 with Amazon EBS volumes for storage.
- D. Use AWS Global Accelerator and specify the existing website as the endpoint.

Answer: B

NEW QUESTION # 500

A company recently launched a variety of new workloads on Amazon EC2 instances in its AWS account. The company needs to create a strategy to access and administer the instances remotely and securely. The company needs to implement a repeatable process that works with native AWS services and follows the AWS Well-Architected Framework.

Which solution will meet these requirements with the LEAST operational overhead?

- A. **Attach the appropriate IAM role to each existing instance and new instance. Use AWS Systems Manager Session Manager to establish a remote SSH session.**
- B. Establish an AWS Site-to-Site VPN connection. Instruct administrators to use their local on-premises machines to connect directly to the instances by using SSH keys across the VPN tunnel.
- C. Create an administrative SSH key pair. Load the public key into each EC2 instance. Deploy a bastion host in a public subnet to provide a tunnel for administration of each instance.
- D. Use the EC2 serial console to directly access the terminal interface of each instance for administration.

Answer: A

Explanation:

NEW QUESTION # 501

A company has an application that calls AWS Lambda functions. A recent code review found database credentials stored in the source code. The database credentials needs to be removed from the Lambda source code. The credentials must then be securely stored and rotated on a on-going basis to meet security policy requirements.

What should a solutions architect recommend meet these requirements?

- A. Move the database password to an environment variable associate the Lambda function Retrieve the password from the environment variable upon execution.
- B. Store the password in AWS Key Management Service (AWS KMS). Associate the Lambda function with a role that can retrieve the password from AWS KMS given its key ID.
- C. **Store the password in AWS Secrets Manager . A associate the Lambda function with a role that can retrieve the password from secrets Manager given its secret ID.**

- D. Store the password in AWS CloudHSM. Associate the Lambda function with a role that can review the password from CloudHSM given key ID.

Answer: C

NEW QUESTION # 502

A company wants to analyze and troubleshoot Access Denied errors and unauthorized errors that are related to IAM permissions. The company has AWS CloudTrail turned on.

Which solution will meet these requirements with the LEAST effort?

- A. Use AWS Glue and write custom scripts to query CloudTrail logs for the errors.
- B. Search CloudTrail logs with Amazon QuickSight Create a dashboard to identify the errors
- C. Use AWS Batch and write custom scripts to query CloudTrail logs for the errors.
- D. Search CloudTrail logs with Amazon Athena queries to identify the errors

Answer: D

NEW QUESTION # 503

A solutions architect is creating a data processing job that runs once daily and can take up to 2 hours to complete. If the job is interrupted, it has to restart from the beginning.

How should the solutions architect address this issue in the MOST cost-effective manner?

- A. Use an Amazon Elastic Container Service (Amazon ECS) Fargate task triggered by an Amazon EventBridge (Amazon CloudWatch Events) scheduled event.
- B. Create an AWS Lambda function triggered by an Amazon EventBridge (Amazon CloudWatch Events) scheduled event.
- C. Use an Amazon Elastic Container Service (Amazon ECS) task running on Amazon EC2 triggered by an Amazon EventBridge (Amazon CloudWatch Events) scheduled event.
- D. Create a script that runs locally on an Amazon EC2 Reserved Instance that is triggered by a cron job.

Answer: A

NEW QUESTION # 504

.....

If you want a relevant and precise content that imparts you the most updated, relevant and practical knowledge on all the key topics of the AWS-Solutions-Architect-Associate Certification Exam, no other AWS-Solutions-Architect-Associate study material meets these demands so perfectly as does TestsDumps's study guides. The AWS-Solutions-Architect-Associate questions and answers in these guides have been prepared by the best professionals who have deep exposure of the certification exams and the exam takers needs. The result is that TestsDumps's study guides are liked by so many ambitious professionals who give them first priority for their exams. The astonishing success rate of TestsDumps's clients is enough to prove the quality and benefit of the study questions of TestsDumps.
