

Excellent New GH-900 Mock Test - Win Your Microsoft Certificate with Top Score

What's more, part of that Actual4Cert GH-900 dumps now are free: <https://drive.google.com/open?id=1gPw1IGQh41FctWh8Yy0EonEjF3vDN34z>

GH-900 exam cram is famous for instant access to download, and you can receive your download link and password within ten minutes, so that you can start your learning immediately. If you don't receive the download link, you can contact us, and we will solve the problem for you as quickly as possible. In addition, GH-900 Exam Dumps contain both questions and answers, and they also cover most of knowledge points for the exam, and you can improve your professional knowledge as well as pass the exam.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.
Topic 2	Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.
Topic 3	Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.

Quiz 2026 GH-900: Trustable New GitHub Foundations Mock Test

Even in a globalized market, the learning material of similar GH-900 doesn't have much of a share, nor does it have a high reputation or popularity. In this dynamic and competitive market, the GH-900 study materials can be said to be leading and have absolute advantages. In order to facilitate the user real-time detection of the learning process, we GH-900 practice materials provided by the questions and answers are all in the past. It is closely associated, as our experts constantly update products every day to ensure the accuracy of the problem, so all GH-900 practice materials are high accuracy.

Microsoft GitHub Foundations Sample Questions (Q41-Q46):

NEW QUESTION # 41

You need to identify how GitHub Desktop differs from github.com.
Which statement correctly describes GitHub Desktop?

- A. It replaces the need to use github.com for repository and workflow management.
- B. It is available only on Windows operating systems.
- C. It is a self-hosted version of GitHub that runs on a local machine.
- D. It enables native integration with Microsoft Office applications.
- E. It provides a graphical user interface for managing local Git repositories.

Answer: E

Explanation:

GitHub Desktop is a local desktop application that provides a graphical user interface for common Git operations. Instead of using the command line, users can clone repositories, create branches, commit changes, view diffs, and push or pull changes through a visual interface. It does not replace github.com because many collaboration features, such as repository settings, advanced pull request review, issues, discussions, organizations, and security administration, are still handled through GitHub.com. GitHub Desktop is also not a self-hosted GitHub server and is not limited only to Windows, because it is available for both Windows and macOS. Its main purpose is to simplify local Git repository management for users who prefer a GUI over command-line Git.

NEW QUESTION # 42

What is defined as software that can be freely used, modified, and shared by anyone?

- A. open source
- B. free source
- C. proprietary
- D. Innersource

Answer: A

Explanation:

Open source software (OSS) can be freely used, modified, and shared because its source code is publicly available under specific licenses. These open source licenses grant users the freedom to access, study, change, and distribute the software to anyone, fostering transparency, collaboration, and innovation within a global community.

NEW QUESTION # 43

What folder is the definition files stored in when creating custom issue forms?

- A. .issues/ISSUE_TEMPLATE
- B. .github/ISSUE_TEMPLATE
- C. .issues
- D. .GitHub

Answer: B

Explanation:

When creating custom issue forms on GitHub, the definition files are stored in the .github/ISSUE_TEMPLATE folder. This directory is used to define issue templates and forms that help standardize the information collected when users open new issues in the repository. The .github folder is a special directory used for various repository configurations and workflows.

NEW QUESTION # 44

You are working on a collaborative software project and want to ensure that your code is automatically built and tested every time a contributor opens a pull request. A teammate suggests using GitHub Actions for this purpose. Which of the following best describes the purpose of GitHub Actions?

- A. A documentation system within GitHub where teams can write internal wikis and tutorials

- B. A built-in GitHub feature for managing repository access, contributors, and permissions
- C. A tool used to write issues and assign them automatically to contributors using labels
- D. A CI/CD platform within GitHub that lets you automate workflows for building, testing, and deploying code

Answer: D

Explanation:

GitHub Actions is a CI/CD platform within GitHub that lets you automate workflows for building, testing, and deploying code. It enables teams to set up automated processes that run whenever certain events occur, such as opening a pull request. This ensures that code changes are tested and built consistently before merging, improving reliability and streamlining collaboration.

Option C is CORRECT because GitHub Actions is a CI/CD automation platform built into GitHub that lets you create workflows to build, test, and deploy your code automatically based on repository events such as pushes or pull requests.

NEW QUESTION # 45

Which of the following default workflows are available as part of GitHub projects? (Each answer presents a complete solution. Choose three.)

- A. " Item closed "
- B. " Pull request merged "
- C. " Auto-archive items "
- D. " Label added to issue "
- E. " Pull request opened "

Answer: B,C,D

NEW QUESTION # 46

.....

The prime objective of our Microsoft GH-900 PDF is to improve your knowledge and skills to the level that you get attain success easily without facing any difficulty. For this purpose, Actual4Cert hired the services of the best industry experts for developing exam dumps and hence you have preparatory content that is unique in style and filled with information. Each Actual4Cert brain dump, included in the GH-900 Brain Dumps PDF is significant and may also be the part of the actual exam paper.
