we can give you 100% pass rate guarantee. IIA-CIA-Part3 practice quiz is equipped with a simulated examination system with timing function, allowing you to examine your IIA-CIA-Part3 learning results at any time, keep checking for defects, and improve your strength. Besides, during the period of using IIA-CIA-Part3 learning guide, we also provide you with 24 hours of free online services, which help to solve any problem for you at any time and sometimes mean a lot to our customers.

The IIA IIA-CIA-Part3 exam is broken down into four domains: Business Acumen, Information Security, Information Technology, and Financial Management. Business Acumen covers the basics of business operations, including organizational structures, financial statements, and risk management. Information Security covers the protection of information systems and data, while Information Technology covers the use and management of technology in internal auditing. Finally, Financial Management covers financial analysis and reporting. Passing IIA-CIA-Part3 Exam demonstrates a candidate's knowledge of important business concepts and skills, ensuring they are equipped to provide valuable insights and recommendations to their organization.

all irrelevant knowledge, which decreases your learning pressure. Secondly, the displays of the IIA-CIA-Part3 Study Materials are varied to cater to all fo your different study interest and hobbies. It is interesting to study with our IIA-CIA-Part3 exam questions.

IIA Business Knowledge for Internal Auditing Sample Questions (Q468-Q473):

NEW QUESTION # 468

Futures and option contracts are examples of what type of financial instruments?

- A. Underlying.
- **B. Derivatives.**
- C. Non derivatives.
- D. Equity instruments.

Answer: B

Explanation:

A derivative is a financial instrument whose value changes with the change in the underlying. It requires little or no investment and is settled in the future. Examples are futures, forward, swap, or option contracts. The underlying is a specified interest rate, security price, foreign currency exchange rate, price index, commodity price, etc.

NEW QUESTION # 469

For which of the following scenarios would the most recent backup of the human resources database be the best source of information to use?

- **A. There was a data center failure that requires restoring the system at the backup site.**
- B. There is a need to access prior year-end training reports for all employees in the human resources database
- C. An incorrect program fix was implemented just prior to the database backup.
- D. The organization is preparing to train all employees on the new self-service benefits system.

Answer: A

NEW QUESTION # 470

Quality control programs employ many tools for problem definition and analysis. A scatter diagram is one of these tools. The objective of a scatter diagram is to:

- A. Show the vital trend and separate trivial items.
- B. Divide a universe of data into homogeneous groups.
- **C. Display a population of items for analysis.**
- D. Show frequency distribution in graphic form.

Answer: C

Explanation:

The objective of a scatter diagram is to depict degrees of correlation. Each observation is represented by a dot on a graph corresponding to specific values of x (the independent variable) and y (the dependent variable).

NEW QUESTION # 471

According to IIA guidance on IT, which of the following would be considered a primary control for a spreadsheet to help ensure accurate financial reporting?

- A. The spreadsheet is stored on a network server that is backed up daily.
- B. The purpose and use of the spreadsheet are documented.
- C. Check-in and check-out software is used to control versions.
- **D. Formulas and static data are locked or protected.**

Answer: D

NEW QUESTION # 472

Which of the following attributes of data are cybersecurity controls primarily designed to protect?

- A. Veracity, velocity, and variety.
- B. Authorization, logical access, and physical access.
- C. Accessibility, accuracy, and effectiveness.
- **D. Integrity, availability, and confidentiality.**

Answer: D

Explanation:

Cybersecurity controls are primarily designed to protect the Confidentiality, Integrity, and Availability (CIA) of data. These are the three fundamental principles of cybersecurity and are essential for protecting organizational information assets. Let's analyze each option:

* Option A: Veracity, velocity, and variety.

* Incorrect. These attributes are commonly associated with big data and data analytics rather than cybersecurity. Cybersecurity controls focus on ensuring that data is secure, rather than on its volume, speed, or diversity.

* IIA Reference: Cybersecurity risk management frameworks emphasize the CIA triad over big data attributes. (IIA GTAG: Auditing Cybersecurity Risk)

* Option B: Integrity, availability, and confidentiality.

* Correct. These three principles are at the core of cybersecurity:

* Confidentiality: Ensures that sensitive information is only accessible to authorized individuals.

* Integrity: Protects data from unauthorized modifications or corruption.

* Availability: Ensures that data and systems are accessible when needed.

* IIA Reference: The IIA's guidance on IT governance highlights the CIA triad as the foundation of cybersecurity. (IIA GTAG: Information Security Governance)

* Option C: Accessibility, accuracy, and effectiveness.

* Incorrect. While these attributes are important in data management and usability, they do not directly define cybersecurity controls.

* Option D: Authorization, logical access, and physical access.

* Incorrect. While these are essential security components, they fall under broader IT security measures rather than forming the fundamental principles of cybersecurity.

NEW QUESTION # 473

.....

Our IIA-CIA-Part3 exam questions have been designed by the experts after an in-depth analysis of the exam and the study interest and hobbies of the candidates.
