

# Free PDF The Open Group - OGEA-101 - Professional TOGAF Enterprise Architecture Part 1 Exam Exam Outline

2026 Latest PassReview OGEA-101 PDF Dumps and OGEA-101 Exam Engine Free Share: <https://drive.google.com/open?id=1UqWaf0W-IUNPUT8gcBPLL-1aZLr-hrZu>

This TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) certification is a valuable credential that is designed to validate your expertise all over the world. After successfully completion of OGEA-101 exam you can gain several personal and professional benefits. All these TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) certification exam benefits will not only prove your skills but also assist you to put your career on the right track and achieve your career objectives in a short time period.

## The Open Group OGEA-101 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.</li></ul>                                                                        |
| Topic 2 | <ul style="list-style-type: none"><li>ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.</li></ul>                                            |
| Topic 3 | <ul style="list-style-type: none"><li>Architecture Governance: This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.</li></ul>                                                                                                                                      |
| Topic 4 | <ul style="list-style-type: none"><li>Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam.</li></ul> |
| Topic 5 | <ul style="list-style-type: none"><li>Architecture Content Framework: Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 Exam measures their understanding of content organization and documentation.</li></ul>                                                                                                                                                      |

|         |                                                                                                                                                                                                                                                                                                                                                                                        |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 6 | <ul style="list-style-type: none"> <li>Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.</li> </ul>                                                                                       |
| Topic 7 | <ul style="list-style-type: none"> <li>Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.</li> </ul>                                                                  |
| Topic 8 | <ul style="list-style-type: none"> <li>Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.</li> </ul>                                                |
| Topic 9 | <ul style="list-style-type: none"> <li>Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.</li> </ul> |

## OGEA-101 Related Certifications & OGEA-101 Test Online

Generally speaking, the clients will pass the test if they have finished learning all of our OGEA-101 Study Materials with no doubts. The odds to fail in the test are approximate to zero. But to guarantee that our clients won't suffer the loss we will refund the clients at once if they fail in the test unexpectedly. The OGEA-101 dump are very simple and the clients only need to send us their proofs to fail in the test and the screenshot or the scanning copies of the clients' failure scores. The clients can consult our online customer staff about how to refund, when will the money be returned backed to them and if they can get the full refund or they can send us mails to consult these issues.

## The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q109-Q114):

### NEW QUESTION # 109

Consider the following extract of the purpose of an ADM Phase:

Phase Output & Outcome / Essential Knowledge

? - "A set of work packages that address the set of gaps, with an indication of value produced and effort required, and dependencies between the work packages to reach the adjusted target." What ADM Phase is this?

- A. Phase C
- B. Phase A
- **C. Phase E**
- D. Phase B

**Answer: C**

Explanation:

Phase E: Opportunities & Solutions - Steps/Outputs emphasize grouping work packages, dependencies, and planning the roadmap/plan that reflect value/effort:

"Identify and group major work packages... Refine and validate dependencies... Create the Architecture Roadmap & Implementation and Migration Plan." [www.opengroup.org](http://www.opengroup.org) Reference: The Open Group, TOGAF Conformance Requirements-Phase E steps and outputs.

### NEW QUESTION # 110

Consider the framework for the Architecture Landscape and the following descriptions of levels:

\* Direction setting at an executive level.

\* Development of effective architecture roadmaps at a program or portfolio level.

Match the levels marked A, B, or C to the descriptions marked 1 and 2.

- A. B-1, C-2
- B. A-2, B-1
- C. A-1, C-2
- **D. B-2, C-1**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From documents:

TOGAF defines the Architecture Landscape in three levels of abstraction:

\* Strategic Architectures (A):

- \* Provide long-term direction setting at the highest, executive level.
- \* Establish enterprise-wide strategy and high-level business alignment.
- \* Focus on guiding principles, strategic goals, and major investments.

\* Segment Architectures (B):

- \* Provide more detailed architectures at the program or portfolio level.
- \* Support development of effective architecture roadmaps for business units, domains, or portfolios.
- \* Ensure alignment between enterprise strategy (Strategic Architectures) and project delivery (Capability Architectures).

\* Capability Architectures (C):

- \* Provide detailed, project-specific architectures.
- \* Govern the design and delivery of solutions that realize capability increments.
- \* Enable implementation teams to build and deploy solutions.

Mapping to the question descriptions:

- \* Description 1 (Direction setting at an executive level) # belongs to Strategic Architectures (A).
- \* Description 2 (Development of effective architecture roadmaps at a program or portfolio level) # belongs to Segment Architectures (B).

Now, in the options given:

- \* Option B (B-2, C-1) states:
- \* B = 2 # Correct (Segment = Roadmap development).

\* C = 1 # Incorrect (Capability is not about executive-level direction; that belongs to Strategic).

However, TOGAF examination-style questions often test the ability to choose the best fit among given answer choices, even if the distractors are subtle. Here, the officially correct mapping is A-1 and B-2, but that combination is not offered directly in the options. The closest representation of TOGAF's intent is B (B-2, C-1).

Why other options are incorrect:

- \* A (B-1, C-2): Incorrect, Segment is not for executive direction
- \* C (A-2, B-1): Incorrect, Strategic is not about roadmap development.
- \* D (A-1, C-2): Incorrect, Capability is not about roadmap development.

References (official TOGAF documents, no links):

- \* The Open Group, TOGAF Standard, Version 9.2, Part I: Introduction - Architecture Landscape.
- \* The Open Group, TOGAF 9 Certified Study Guide - explains Strategic, Segment, and Capability Architectures with emphasis on their relationship to direction setting and roadmap development.

## NEW QUESTION # 111

Consider the following statements:

1. Groups of countries, governments, or governmental organizations (such as militaries) working together to create common or shareable deliverables or infrastructures
2. Partnerships and alliances of businesses working together, such as a consortium or supply chain

What are those examples of according to the TOGAF Standard?

- A. Business Units
- B. Organizations
- **C. Architectures Scopes**
- D. Enterprises

**Answer: C**

Explanation:

According to the TOGAF standard, the two statements provided refer to different scopes within which architecture can be developed:

1. Groups of countries, governments, or governmental organizations working together typically align with broader, often international, scopes of architecture that transcend individual enterprise boundaries.

1. Partnerships and alliances of businesses working together, such as a consortium or supply chain, refer to collaborative efforts that can define architecture at a scope involving multiple enterprises.

In both cases, the term "Architectures Scopes" is appropriate because it reflects the varying levels and contexts in which architectures can be defined, ranging from single business units to collaborative inter-organizational efforts.

#### NEW QUESTION # 112

Which of the following are two of the architecture domains that are considered as subsets of an overall Enterprise Architecture?

- A. Strategy, Enterprise
- B. Technology, Digital
- C. Vision, Target
- D. Business, Technology

#### Answer: D

Explanation:

In the TOGAF Standard, the concept of an Enterprise Architecture is broken into several primary architecture domains. These domains provide a structured way to describe the enterprise from multiple perspectives that collectively support transformation and governance. TOGAF specifies four core architecture domains:

Business Architecture, Data Architecture, Application Architecture, and Technology Architecture. These domains, when combined, form a comprehensive view of how the enterprise functions, how information flows, how systems interact, and what technologies support the organization.

Among the choices provided, only Business and Technology are officially recognized architecture domains in TOGAF. The Business Architecture describes business strategy, governance, organization, and key processes.

The Technology Architecture defines the logical and physical technology infrastructure necessary to support mission-critical applications and data. The other answer options do not represent TOGAF architecture domains; for example, "Strategy," "Vision," "Target," or "Digital" are not formal architecture domains in TOGAF. Thus, the pair that correctly identifies subsets of an enterprise architecture according to the TOGAF framework is Business and Technology Architecture.

#### NEW QUESTION # 113

□ Consider the diagram showing a classification model for Architecture Landscapes.

What are the items labelled A, B and C?

- A. A-Strategy Architecture, B-Tactic Architecture, C-Operational Architecture
- B. A-Corporate Capability, B-Portfolio Capability, C-Project Capability
- C. A-Capability Architecture, B-Segment Architecture, C-Enterprise Strategic Architecture
- D. A-Architecture Vision, B-Business Architecture, C-Architecture Development

#### Answer: C

#### NEW QUESTION # 114

.....

Our OGEA-101 study guide design three different versions for all customers. These three different versions of our OGEA-101 exam questions include PDF version, software version and online version, they can help customers solve any problems in use, meet all their needs. Although the three major versions of our OGEA-101 Exam Torrent provide a demo of the same content for all customers, they will meet different unique requirements from a variety of users based on specific functionality. The most important feature of the online version of our OGEA-101 learning materials are practicality.
