

Palo Alto Networks NetSec-Pro Most Reliable Questions & Testing NetSec-Pro Center

What's more, part of that TopExamCollection NetSec-Pro dumps now are free: <https://drive.google.com/open?id=1y7qdCWS5U9u4IbRILX3leWM5w-7PzsZk>

Our NetSec-Pro exam torrent is compiled by experts and approved by experienced professionals and updated according to the development situation in the theory and the practice. Our Palo Alto Networks Network Security Professional guide torrent can simulate the exam and boosts the timing function. The language is easy to be understood and makes the learners have no learning obstacles. So our NetSec-Pro Exam Torrent can help you pass the exam with high possibility.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	GFW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.
Topic 2	Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.
Topic 3	Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.

Testing NetSec-Pro Center & NetSec-Pro Valid Test Guide

Our NetSec-Pro test torrent is of high quality, mainly reflected in the pass rate. As for our NetSec-Pro study tool, we guarantee our learning materials have a higher passing rate than that of other agency. Our NetSec-Pro test torrent is carefully compiled by industry experts based on the examination questions and industry trends in the past few years. More importantly, we will promptly update our NetSec-Pro exam materials based on the changes of the times and then send it to you timely. 99% of people who use our learning materials have passed the exam and successfully passed their certificates, which undoubtedly show that the passing rate of our NetSec-Pro Test Torrent is 99%. If you fail the exam, we promise to give you a full refund in the shortest possible time. So our product is a good choice for you. Choosing our NetSec-Pro study tool can help you learn better. You will gain a lot and lay a solid foundation for success.

Palo Alto Networks Network Security Professional Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which AI-powered solution provides unified management and operations for NGFWs and Prisma Access?

- A. Strata Cloud Manager (SCM)
- B. Panorama
- C. Prisma Access Browser
- D. Autonomous Digital Experience Manager (ADEM)

Answer: A

Explanation:

Strata Cloud Manager (SCM) offers a cloud-based unified management plane for both NGFWs and Prisma Access, enabling consistent policy enforcement, simplified management, and AI-driven operational insights.

Strata Cloud Manager provides a single interface for unified management of NGFWs and Prisma Access, leveraging AI to optimize security operations and streamline workflows.

Unlike Panorama, which is an on-premises management solution, SCM delivers cloud-based, AI-driven capabilities for centralized oversight.

NEW QUESTION # 43

Which step is necessary to ensure an organization is using the inline cloud analysis features in its Advanced Threat Prevention subscription?

- A. Update or create a new anti-spyware security profile and enable the appropriate local deep learning models.
- B. Enable SSL decryption in Security policies to inspect and analyze encrypted traffic for threats.
- C. Configure Advanced Threat Prevention profiles with default settings and only focus on high-risk traffic to avoid affecting network performance.
- D. Disable anti-spyware to avoid performance impacts and rely solely on external threat intelligence.

Answer: A

Explanation:

To fully leverage inline cloud analysis in Advanced Threat Prevention, security profiles (e.g., anti-spyware) must be updated or newly created to enable local deep learning and inline cloud analysis models.

"To activate inline cloud analysis, update your Anti-Spyware profile to enable advanced inline detection engines, including deep learning-based models and cloud-delivered signatures." (Source: Inline Cloud Analysis and Deep Learning) This ensures real-time protection from sophisticated threats beyond static signatures.

NEW QUESTION # 44

Which action allows an engineer to collectively update VM-Series firewalls with Strata Cloud Manager (SCM)?

- A. Creating a device grouping rule

- B. Creating an update grouping rule
- C. Scheduling software update
- D. Setting a target OS version

Answer: A

Explanation:

Device grouping rules in SCM allow administrators to organize firewalls into logical groups and collectively manage updates or configuration pushes across those groups.

"SCM allows you to create device group rules, enabling streamlined management and collective updates of multiple NGFW instances." (Source: SCM Device Grouping) This approach ensures consistency in software versions and configuration baselines across large deployments.

NEW QUESTION # 45

Which two components of a Security policy, when configured, allow third-party contractors access to internal applications outside business hours? (Choose two.)

- A. Schedule
- B. Service
- C. User-ID
- D. App-ID

Answer: A,C

Explanation:

To allow third-party contractors controlled access, security policies must combine user identification and time-based access controls: User-ID

User-ID enables security policies to be based on user identity rather than IP addresses, ensuring precise policy enforcement for specific users such as contractors.

Schedule

Schedules allow policies to be active only during specific times, providing time-based access control (e.g., after business hours). Together, they ensure that only authorized users (contractors) have access, and only when explicitly allowed.

NEW QUESTION # 46

A network security engineer has created a Security policy in Prisma Access that includes a negated region in the source address. Which configuration will ensure there is no connectivity loss due to the negated region?

- A. Add a Dynamic Application Group to the Security policy.
- B. Set the service to be application-default.
- C. Add all regions that contain private IP addresses to the source address.
- D. Create a Security policy for the negated region with destination address "any".

Answer: D

Explanation:

Negated source addresses exclude traffic from the specified region. To avoid accidental connectivity loss for traffic from that region, create a separate Security policy to explicitly permit it.

"When you use a negated region in a Security policy rule, ensure to create an additional Security policy to permit traffic from the excluded (negated) region to avoid unintentional drops." (Source: Prisma Access Policy Best Practices) This ensures explicit inclusivity for the excluded region, maintaining reliable connectivity.

NEW QUESTION # 47

.....

We know that it is hard to stay and study for the Palo Alto Networks Network Security Professional (NetSec-Pro) exam dumps in one place for a long time. Therefore, you have the option to use Palo Alto Networks Network Security Professional (NetSec-Pro) PDF questions anywhere and anytime. TopExamCollection Palo Alto Networks Network Security Professional (NetSec-Pro) dumps are designed according to the Palo Alto Networks NetSec-Pro certification exam standard and have hundreds of questions
