The software is designed to help with MS-721 exam dumps preparation.

Microsoft Collaboration Communications Systems Engineer Sample Questions (Q201-Q206):

NEW QUESTION # 201

Your company plans to use Microsoft Teams for collaboration and communication.

You need to deploy Microsoft Surface Hub devices to Teams meeting rooms.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Step 1: Install Windows Configuration Designer

Step 2: Use the Provision Surface Hub devices wizard

Create provisioning packages for Surface Hub

Provisioning packages allow you to automate deployment of key features, helping deliver a consistent experience across all Surface Hubs in your organization. Using Windows Configuration Designer (WCD) on a separate PC, you can complete the following tasks:

Enroll in Active Directory or Azure Active Directory

Create a device administrator account

Add applications and certificates

Configure proxy settings

Configure Configuration Service Provider (CSP) settings

Overview

On a separate PC running Windows 10 or Windows 11, install Windows Configuration Designer from the Microsoft Store.

Select Provision Surface Hub devices to configure common settings using a wizard. Or select Advanced provisioning to view and configure all possible settings.

Create the provisioning package and save it to a USB drive.

Deploy the package to your Surface Hub during first-run setup, or through the Settings app.

Step 3: Save the provisioning package to a USB device

Step 4: Deploy the provisioning package to Surface Hub

Reference:

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Teams Shared Devices

Hotline phones (Private Line Automatic Ringdown)

Next quarter, you will be able to program Microsoft Teams certified phone devices to directly dial a pre-configured phone number or contact, such as emergency services in a manufacturing plant or help desk in your organization. The hotline can be set up directly through the device settings or the Teams admin center. The device will need to be enabled with a Teams Shared Device License and set to common area phone mode.

Box 2: Hotline

You'll be able to program Teams phone devices to autodial a pre-configured PSTN number or directory contact when the handset is picked up. You can configure a common area phone as a hotline phone by navigating to Settings > Device Settings > Calling >

Hotline and specifying auto dial contact and display name.

NEW QUESTION # 204

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to create a new call queue to route calls to support agents. The support agents must be able to see their call queue history and the shared transcribed voicemail. The solution must minimize administrative effort.

Solution: You configure the call queue to use a team and a channel.

Does this meet the goal?

- A. No
- B. Yes
