We provide the free demos before the clients decide to buy our 1z0-809 test guide. The clients can visit our company's website to have a look at the demos freely. Through looking at the demos the clients can understand part of the contents of our 1z0-809 exam reference, the form of the questions and answers and our software, then confirm the value of our 1z0-809 Test Guide. If the clients are satisfied with our 1z0-809 exam reference they can purchase them immediately. They can avoid spending unnecessary money and choose the most useful and efficient 1z0-809 exam practice question

By passing the Oracle 1z0-809 exam, candidates can demonstrate their proficiency in Java programming and increase their chances of getting hired for Java developer roles. Java SE 8 Programmer II certification is also recognized by employers as proof of an individual's expertise in Java programming and can lead to higher salaries and better job opportunities.

Oracle 1z0-809 certification exam is designed for Java developers who want to prove their skills in the Java SE 8 programming language. Java SE 8 Programmer II certification exam is the second level exam in the Oracle Certified Professional (OCP) certification path for Java SE 8. Passing 1z0-809 Exam demonstrates that the candidate has a deep understanding of advanced Java concepts and can develop complex Java applications.

Oracle 1z0-809: Java SE 8 Programmer II exam is designed for experienced Java developers who have already passed the Oracle Certified Associate exam. 1z0-809 exam tests the candidate's knowledge of advanced Java concepts and their ability to apply them effectively in real-world scenarios. Passing 1z0-809 exam proves that the candidate is proficient in Java SE 8 programming and is capable of developing robust applications using Java technologies.

Exam 1z0-809 Introduction | New 1z0-809 Braindumps Questions

Oracle 1z0-809 exam certification is widely recognized IT certifications. People around the world prefer 1z0-809 exam certification to make their careers more strengthened and successful. Speaking of Oracle 1z0-809 exam, SureTorrent Oracle 1z0-809 exam training materials have been ahead of other sites. Because SureTorrent has a strong IT elite team, they always follow the latest Oracle 1z0-809 Exam Training materials, with their professional mind to focus on Oracle 1z0-809 exam training materials.

Oracle Java SE 8 Programmer II Sample Questions (Q29-Q34):

NEW QUESTION # 29

Given the code fragment:

```

try {
    Properties prop = new Properties();
    prop.put("user", userName);
    prop.put("password", passWord);
    Connection conn = DriverManager.getConnection(dbURL, prop);
    if(conn != null){
        System.out.print("Connection Established");
    }
} catch (Exception e) {
    System.out.print(e);
}
}

```

ORACLE®

and the information:

* The required database driver is configured in the classpath.

* The appropriate database is accessible with the dbURL, username, and passWord exists.

What is the result?

- A. A ClassNotFoundException is thrown at runtime.
- B. The program prints Connection Established.
- C. A SQLException is thrown at runtime.
- D. The program prints nothing.

Answer: B

NEW QUESTION # 30

Given the code fragment:

```

ProductCode<Number, Integer> c1 = new ProductCode<Number, Integer>(); /* c1
instantiation */
ProductCode<Number, String> c2 = new ProductCode<Number, String>(); /* c2
instantiation */

```

You have been asked to define the ProductCode class. The definition of the ProductCode class must allow c1 instantiation to succeed and cause a compilation error on c2 instantiation.

Which definition of ProductCode meets the requirement?

```

A
class ProductCode<T, S<Integer>> {
    T c1;
    S c2;
}

B
class ProductCode<T, S extends T> {
    T c1;
    S c2;
}

C
class ProductCode<T, S> {
    T c1;
    S c2;
}

D
class ProductCode<T, S super T> {
    T c1;
    S c2;
}

```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: C

NEW QUESTION # 31

Given the code fragment:

```
List<String> words = Arrays.asList("win", "try", "best", "luck", "do");
Predicate<String> test1 = w -> {
    System.out.println("Checking...");
    return w.equals("do"); // line n1
};
Predicate test2 = (String w) -> w.length() > 3; // line n2
words.stream()
    .filter(test2)
    .filter(test1)
    .count();
```

What is the result?

- A. A compilation error occurs at line n2.
- **B. Checking..**
Checking..
- C. A compilation error occurs at line n1.
- D. Checking..

Answer: B

NEW QUESTION # 32

Given:

```
class Book {
    int id;
    String name;
    public Book (int id, String name) {
        this.id = id;
        this.name = name;
    }
    public boolean equals (Object obj) { //line n1
        boolean output = false;
        Book b = (Book) obj;
        if (this.name.equals(b.name))
            output = true;
        }
        return output;
    }
}
```

and the code fragment:

```
Book b1 = new Book (101, "Java Programing");
Book b2 = new Book (102, "Java Programing");
System.out.println (b1.equals(b2)); //line n2
```

Which statement is true?

- A. A compilation error occurs. To ensure successful compilation, replace line n2 with: `System.out.println (b1.equals((Object) b2));`
- B. A compilation error occurs. To ensure successful compilation, replace line n1 with: `boolean equals (Book obj) {`
- **C. The program prints true.**
- D. The program prints false.

Answer: C

NEW QUESTION # 33

Given:

```
public class StrMan {
    public static void doStuff(String s) {
        try {
            if (s == null) {
                throw new NullPointerException();
            }
        } finally {
            System.out.println("-finally-");
        }
        System.out.println("-doStuff-");
    }
    public static void main (String[] args) {
        try {
            doStuff(null);
        } catch (NullPointerException npe) {
            System.out.println("-catch-");
        }
    }
}
```

ORACLE®

What is the result?

- A. -catch-
-finally-
-doStuff-
- B. -finally-
-catch-
- C. -finally
-doStuff-
-catch-
- D. -catch-

Answer: B

NEW QUESTION # 34
