## Cisco Understanding Cisco Cybersecurity Operations Fundamentals Sample Questions (Q302-Q307):

### NEW QUESTION # 302

Refer to the exhibit.

□ Which field contains DNS header information if the payload is a query or a response?

- A. ID
- B. Z
- C. TC
- D. QR

**Answer: A**

**NEW QUESTION # 303**

□ Refer to the exhibit. A SOC team member receives a case from his colleague with notes attached. The artifacts and alerts associated with the case must be analyzed and a conclusion must be provided. What is the cause of the alert?

- A. A misconfigured backup process malfunctioned, causing unexpected file changes.
- B. External attackers gained access and are exfiltrating data stealthily.
- C. An insider threat compromised the service account to delete sensitive data.
- **D. A ransomware attack is underway, encrypting files and deleting originals.**

**Answer: D**

**NEW QUESTION # 304**

Refer to the exhibit.

□ Which technology produced the log?

- A. proxy
- B. firewall
- C. antivirus
- **D. IPS/IDS**

**Answer: D**

Explanation:

The log in the exhibit is generated by an Intrusion Prevention System (IPS) or Intrusion Detection System (IDS). It contains information about a TCP connection attempt, including the source IP address, destination IP address, and other details related to the connection. The presence of "TCP MISS" indicates that the system detected an anomaly or potential threat during the connection attempt. References := Cisco Cybersecurity Operations Fundamentals

**NEW QUESTION # 305**

Refer to the exhibit.

□ Which event is occurring?

- **A. A binary is being submitted to run on VM cuckoo1**
- B. A binary named "submit" is running on VM cuckoo1.
- C. A binary on VM cuckoo1 is being submitted for evaluation
- D. A URL is being evaluated to see if it has a malicious binary

**Answer: A**

Explanation:

The command "\$ cuckoo submit --machine cuckoo1 /path/to/binary" indicates that a binary located at "/path/to/binary" is being submitted to be run on a virtual machine named "cuckoo1". This is a common practice in cybersecurity to analyze the behavior of suspicious files in an isolated environment. References: Cisco Cybersecurity documents or resources are needed for more detailed information.

**NEW QUESTION # 306**

Which security model assumes an attacker within and outside of the network and enforces strict verification before connecting to any system or resource within the organization?

- A. Biba
- B. Take-Grant
- **C. Zero Trust**
- D. Object-capability

**Answer: C**

### Explanation:

Zero Trust security is an IT security model that requires strict identity verification for every person and device trying to access resources on a private network, regardless of whether they are sitting within or outside of the network perimeter.

## NEW QUESTION # 307

The Understanding Cisco Cybersecurity Operations Fundamentals (200-201) certification exam is one of the top-rated career advancement certifications in the market.
