They constantly use their industry experiences to provide the precise logic verification. The ACP-620 prep material is compiled with the highest standard of technology accuracy and developed by the certified experts and the published authors only. And you will be bound to pass the ACP-620 exam with them.

## ATLASSIAN Managing Jira Cloud Projects Sample Questions (Q54-Q59):

### NEW QUESTION # 54

You want to see how unresolved issues are trending over a given period. Namely, on any given day, what is the average amount of

time that issues were still unresolved.  
What gadget displays this information?

- A. Average Times in Status
- B. Resolution Time
- **C. Average Age Chart**
- D. Average Number of Times in Status

**Answer: C**

Explanation:

The Average Age Chart shows the average age of unresolved issues over time. It helps visualize how long, on average, issues have been open on any given day, which directly reflects how unresolved issues are trending.

#### NEW QUESTION # 55

Nick's Team is responsible for developing a new mobile application for their client. Each module will be delivered continuously to the client until they complete the project.

Which of the following Jira Software template is suitable for Nick's Team?

- A. Project management
- B. Scrum
- **C. Kanban**
- D. Bug Tracking
- E. IT service management

**Answer: C**

#### NEW QUESTION # 56

You are the project administrator for a team based in the Middle East.

You need to change the Standard Working Days configuration on the board: from Sunday to Thursday instead of Monday to Friday.

What will be affected by this change?

- A. sprint duration
- B. original estimates on issues
- **C. Burndown Chart**
- D. Average Age Report
- E. Velocity Chart

**Answer: C**

Explanation:

Changing the Standard Working Days affects the Burndown Chart, as this chart relies on working days to plot the ideal and actual burn of work during a sprint. Adjusting working days ensures the burndown chart accurately reflects the team's actual schedule.

#### NEW QUESTION # 57

The TIS project automation rule is configured as shown.

Trigger	Condition	Action
Issue Created	Priority = Highest	Assign the issue to Kimmy

Charlie changed the priority of issue TIS-25 from High to Highest.

But the issue does not get assigned to Kimmy automatically.

Identify the root cause.

- **A. The automation rule is not triggered by this action.**

- B. Kimmy does not have the Assign issues permission.
- C. Charlie does not have the Assign issues permission.
- D. The project's Default Assignee is Unassigned.

**Answer: A**

Explanation:

The rule is configured to trigger only when an issue is created with the highest priority. Changing the priority after creation does not trigger the rule, which is why issue TIS-25 was not assigned to Kimmy.

#### NEW QUESTION # 58

Which of the following are the available scopes in Jira automation? (Choose four.)

- A. Issue type
- B. Multiple issue types
- C. Single project
- D. Project type
- E. Multiple projects
- F. All projects

**Answer: B,C,D,E**

#### NEW QUESTION # 59

.....
