Authentic Mule-Dev-201 Study Materials: Salesforce Certified MuleSoft Developer Grant You High-quality Exam Brindumps - BootcampPDF

Don't waste further time and money, get real Salesforce Certified MuleSoft Developer (Mule-Dev-201) pdf questions and practice

test software, and start Salesforce Certified MuleSoft Developer (Mule-Dev-201) test preparation today. BootcampPDF will also provide you with up to 1 year of free Salesforce Certified MuleSoft Developer exam questions updates.

Salesforce Certified MuleSoft Developer Sample Questions (Q97-Q102):

NEW QUESTION # 97

Refer to the exhibits.

What

is the response when a client submits a request to `http://localhost:8081`?

- A. Before
- B. After
- C. Validation error
- D. null

Answer: C

Explanation:

Here's specifically what is happening here:

1) Payload is successfully set to "Before"

2) Is null validation is used which will pass the message only if payload is null. In this case as payload is not null, it creates an Error Object. Flow execution stops

`#[error.description] = "Validation error"`

3) Because no error handler is defined, the Mule default error handler handles the error

4) "Validation error" is the error message returned to the requestor in the body of the HTTP request with HTTP Status Code: 500

A picture containing timeline Description automatically generated

NEW QUESTION # 98

A

Mule application contains two HTTP Listeners, each configured for different API endpoints: `http://acme.com/apis/orders` and `http://acme.com/apis/customers`.

What base path value should be set in an HTTP Listener config element so that it can be used to configure both HTTP Listeners?

- A. `/apis/orders|customers`
- B. `/apis/`
- C. `/apis/?`
- D. `/apis/*`

Answer: D

Explanation:

Option 2 is the correct answer as `/apis/*` accepts everything starting with `/api/`

NEW QUESTION # 99

Refer to the exhibits.

How many private flows does APIKit generate from RAML specification?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

APIKit Creates a separate flow for each HTTP method. Hence 4 private flows would be generated.

NEW QUESTION # 100

Refer to the exhibit. This RAML fragment defines a Book data type that is used in a RAML API specification.

An API implementation is created for this RAML API specification.

What is valid JSON input for a request from a web client to an implementation of this RAML API specification?

□

- A. □
- B. □
- C. □
- D. □

Answer: B

NEW QUESTION # 101

Refer to the exhibits.

□

The Batch Job scope contains two Batch Steps scopes with different accept expression.

The input payload is passed to the Batch Job scope.

After the entire payload is processed by the batch job scope, what messages have been logged by the Logger component?

- A. 1. {amount=140} 2. {amount=102} 3. {step2amount=100}
- B. 1. {amount=140} 2. {amount=102} 3. {step2amount=100} 4. {step2amount=140}
- C. 1. {amount=140} 2. {amount=102} 3. {step2amount=100} 4. {step2amount=140} 5. {step2amount=102}
- D. 1. {amount=140} 2. {amount=102} 3. {step2amount=100} 4. {step2amount=40}

Answer: C

Explanation:

This question validates your knowledge on Batch Processing. Before we analyze the question, let's revise a bit about batch filters.

Batch Filters

You can apply one or more filters as attributes to any number of batch steps. Imagine a batch job whose first batch step checks if a Salesforce contact exists for a record, and a second batch step that updates each existing Salesforce contact with new information. You can apply a filter to the second batch step to ensure it only processes records that didn't fail during the first batch step. By having batch steps accept only some records for processing, you streamline the batch job so the Mule runtime engine can focus only on the relevant data for a particular batch step.

A batch step uses two attributes to filter records:

acceptExpression

acceptPolicy

Each batch step can accept one acceptExpression and one acceptPolicy attributes to filter records.

Use the acceptExpression attribute to process only records that evaluate to true; if the record evaluates to false, the batch step skips the record and sends it to the next one. In other words, the records with an accept expression that resolves to false are the ones that Mule filters out.

The example below filters out all records where the age is less than 21; the batch step does not process those records.

```
* <batch:jobjobName="batchJob">
* <batch:process-records>
* <batch:stepname="adultsOnlyStep"acceptExpression="#[payload.age >21]">
* ...
* </batch:step>
* </batch:process-records>
* </batch:job>
```

Mule Ref Doc : Refining Batch Steps Processing | MuleSoft Documentation

As we are clear with above concepts, now let's understand this solution step by step.

1) Batch Step (Less than 50)

Accept expression for this batch step is less than 50. Hence elements which will go in this batch step are amount value 40 and 2.

Hence output of logger in first batch step is

```
{amount=140}
```

```
{amount=102}
```

2) Batch Step (Greater than 20)

Accept condition for this batch step is greater than 20. Note that input amount values for this batch step are 100 , 140 and 102 (last two values have been updated in batch step less than 50) As all values satisfy this condition output of second logger is

```
{step2amount=100}
```

```
{step2amount=140}
```

```
{step2amount=102}
```

Hence correct answer to this question is

* {amount=140}

* {amount=102}

* {step2amount=100}

* {step2amount=140}

* {step2amount=102}

2) Batch Step (Greater than 20)

Accept condition for this batch step is greater than 20. Note that input amount values for this batch step are

100 , 140 and 102 (last two values have been updated in batch step less than 50) As all values satisfy this condition output of second logger is

```
{step2amount=100}
```

```
{step2amount=140}
```

```
{step2amount=102}
```

Hence correct answer to this question is

{amount=140}

{amount=102}

{step2amount=100}

{step2amount=140}

{step2amount=102}

NEW QUESTION # 102

.....

Learning knowledge is not only to increase the knowledge reserve, but also to understand how to apply it, and to carry out the theories and principles that have been learned into the specific answer environment. Studying for attending Salesforce Certified MuleSoft Developer exam pays attention to the method. The good method often can bring the result with half the effort, therefore we in the examination time, and also should know some test-taking skill. The Mule-Dev-201 Quiz guide on the basis of summarizing the past years, found that many of the questions, the answers have certain rules can be found, either subjective or objective questions, we can find in the corresponding module of similar things in common.
