The high pass rate of our Order-Management-Administrator exam prep is 99% to 100%.

## Salesforce Order-Management-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Process Automation and Integrations: This section helps the Salesforce Order Management Administrator Consultant demonstrate the capability to deliver business value by integrating Order Management with external systems using clicks rather than code. Mastery of navigation within Order Management processes, connecting nodes, and integrating systems efficiently ensures understanding of how to implement effective solutions.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Advanced Topics: This topic challenges the Salesforce Order Management Administrator Consultant to diagnose and resolve configuration issues that hinder the launch or operation of Order Management processes. Proficiency includes troubleshooting integration problems and articulating how various processes interact to support successful deployments and system functionality.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Order Management Basics: In this topic, the Salesforce Order Management Administrator Consultant learns to position Order Management effectively within Salesforce's core architecture. By articulating the extensible platform capabilities, the ability to integrate with third-party systems, and the overall value proposition, this knowledge helps highlight Order Management's seamless adaptability and efficiency. These insights are crucial for demonstrating business value during client engagements.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Deployment and Debugging: In this area, aspiring order management administrator consultant demonstrates a deep understanding of deployment options, life cycles, and the configuration of supporting objects. This includes creating processes from scratch, leveraging pre-set data, and validating results in runtime scenarios.</li></ul>

Topic 5	<ul style="list-style-type: none"> <li>• <b>Data Model:</b> This topic equips the Salesforce Order Management Administrator Consultant to showcase knowledge of critical objects such as Order, Order Summary, Fulfillment Orders, and Return Orders. It involves establishing and tracing integrations with B2C Commerce or other systems, including custom attributes. Proficiency here is pivotal for ensuring seamless data flow and robust Order Management operations within complex business environments.</li> </ul>

Order-Management-Administrator Actual Exam is really a good helper on your dream road.

### **Salesforce Order Management Administrator Accredited Professional Sample Questions (Q25-Q30):**

#### **NEW QUESTION # 25**

Which two practices are needed for a custom attribute to map into Order Management assuming the attribute has been created on the necessary objects?

- **A. The types must match within reason**
- B. The names must only contain letters and underscores
- **C. The names must be an exact match**
- D. The types must be an exact match (i.e. String to String)

**Answer: A,C**

Explanation:

Two practices that are needed for a custom attribute to map into Order Management assuming the attribute has been created on the necessary objects are:

The types must match within reason. The data type of the custom attribute in Order Management must match or be compatible with the data type of the corresponding attribute in the external system, such as B2C Commerce or B2B Commerce. For example, if the attribute is a string in B2C Commerce, it must also be a string in Order Management.

The names must be an exact match. The name of the custom attribute in Order Management must be exactly the same as the name of the corresponding attribute in the external system, including capitalization and punctuation. For example, if the attribute is named "kitItem" in B2C Commerce, it must also be named "kitItem" in Order Management.

#### **NEW QUESTION # 26**

How can a user view the information exchanged between the payment platform and the external payment gateways?

- A. Check for process exceptions associated with the Order Payment Summary
- **B. Navigate to Payment Gateway Logs related list on the corresponding Order Payment Summary**
- C. Navigate to Payments within the setup menu and select the payment platform
- D. Check associated debug logs in Debug Logs in setup

**Answer: B**

Explanation:

The best way for a user to view the information exchanged between the payment platform and the external payment gateways is to

navigate to Payment Gateway Logs related list on the corresponding Order Payment Summary. A Payment Gateway Log is a record that captures the request and response messages between the payment platform and the external payment gateways, such as Stripe, PayPal, etc. A PaymentGateway Log has a lookup relationship to the Order Payment Summary object, which represents a payment made for an order or part of an order. A user can use the Payment Gateway Logs related list on the Order Payment Summary page to view the details of the payment transactions, such as the request and response payloads, status codes, timestamps, etc. Verified References: [https://help.salesforce.com/s/articleView?id=sf.order\\_management\\_payment\\_gateway\\_log.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.order_management_payment_gateway_log.htm&type=5)[https://help.salesforce.com/s/articleView?id=sf.order\\_management\\_order\\_payment\\_summary.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.order_management_order_payment_summary.htm&type=5)

#### NEW QUESTION # 27

Some admins are exploring the optimal Data Model for their QMS Org. What should be considered when choosing between Person Accounts vs Contacts?

- A. Person Accounts are appropriate for B2B transactions while Account-Contact model is appropriate for B2C transactions
- **B. Person Accounts are appropriate for B2C transactions while Account-Contact model is appropriate for B2B transactions**
- C. Person Accounts once enabled can be rolled back
- D. Person Accounts once enabled cannot be rolled back and makes changes to the data model

**Answer: B**

Explanation:

The correct statement about Person Accounts and Contacts is that Person Accounts are appropriate for B2C transactions while Account-Contact model is appropriate for B2B transactions. A Person Account is a type of account that represents an individual consumer, rather than a business or organization. A Person Account combines the features and fields of both the Account and Contact objects, and it does not require a Contact record to be associated with it. A Person Account is suitable for B2C transactions, where the customers are individual consumers who purchase products or services for personal use. An Account-Contact model is a type of data model that represents a business or organization as an account, and its employees or affiliates as contacts. An account can have many contacts associated with it, but a contact can only belong to one account.

An Account-Contact model is suitable for B2B transactions, where the customers are businesses or organizations that purchase products or services for professional use. #### NEW QUESTION # 28

How can an administrator synchronize licenses from the production org when preparing a sandbox for development?

- A. Import a Change Set
- B. Export a Change Set
- C. Use a custom shell script
- **D. Run the Match Production Licenses to Sandbox without a Refresh tool in Setup**

**Answer: D**

Explanation:

The best way for an administrator to synchronize licenses from the production org when preparing a sandbox for development is to run the Match Production Licenses to Sandbox without a Refresh tool in Setup. This tool allows administrators to match their sandbox licenses with their production licenses without refreshing their sandbox. This way, the administrator can ensure that the sandbox has the same number and type of licenses as the production org, and avoid any license-related issues when developing or testing in the sandbox. Verified Reference: [https://help.salesforce.com/s/articleView?id=sf.data\\_sandbox\\_licenses.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.data_sandbox_licenses.htm&type=5)

#### NEW QUESTION # 29

When are Fulfillment Orders created by default?

- A. During import with a status of Activated
- B. During import with a status of Managed
- **C. The Status field on the Order Summary entity changes and a platform event which is caught by a flow**

**Answer: C**
