Accurate 100% Free NCP-DB-6.10–100% Free Real Question | NCP-DB-6.10 Reliable Test Blueprint

Our Nutanix NCP-DB-6.10 practice test software is the most distinguished source for the Nutanix NCP-DB-6.10 exam all over the world because it facilitates your practice in the practical form of the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 certification exam. Moreover, you do not need an active internet connection to utilize Nutanix NCP-DB-6.10 Practice Exam software. It works without the internet after software installation on Windows computers.

If you are aiming to become a certified Nutanix NCP-DB-6.10, you should prepare with actual exam questions and study guides. These study materials will enable you to pass the exam without much difficulty. Nutanix's practice exams will help you prepare well for the actual exam. The questions are updated and easy to understand. The test materials also consist of a realistic scenario that simulates the exam environment.

>> NCP-DB-6.10 Real Question <<

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 updated training vce & NCP-DB-6.10 free demo & Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 valid torrent

As long as you follow the steps of our NCP-DB-6.10 quiz torrent, your mastery of knowledge will be very comprehensive and you will be very familiar with the knowledge points. This will help you pass the exam more smoothly. The NCP-DB-6.10 learning materials are of high quality, mainly reflected in the adoption rate. As for our NCP-DB-6.10 exam question, we guaranteed a higher passing rate than that of other agency. More importantly, we will promptly update our NCP-DB-6.10 Quiz torrent based on the progress of the letter and send it to you. 99% of people who use our NCP-DB-6.10 quiz torrent has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our NCP-DB-6.10 exam question is 99%. So our product is a good choice for you. Choose our NCP-DB-6.10 learning materials, you will gain a lot and lay a solid foundation for success.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q69-Q74):

NEW QUESTION # 69
An organization has NDB HA enabled across multiple Nutanix clusters. If two clusters are using ESXi and one cluster is using AHV, which additional component is necessary to support cross- hypervisor compatibility?

- A. Stretched VLANs for all nodes
- B. Nutanix Prism Central
- C. VirtIO
- D. NGT

Answer: B

Explanation:
In an NDB high availability (HA) environment spanning multiple Nutanix clusters, with two clusters running VMware ESXi and one running Nutanix AHV, cross-hypervisor compatibility becomes essential to manage the heterogeneous environment effectively. Nutanix Prism Central is the centralized management platform that provides a unified interface and orchestration capabilities across multiple clusters, regardless of the underlying hypervisor (ESXi or AHV). For NDB HA to function seamlessly across these clusters, Prism Central is required to coordinate cluster operations, manage resources, and ensure consistent policy enforcement, including VM placement, failover, and database management tasks. It abstracts the differences between hypervisors, enabling NDB to operate in a mixed environment.

NEW QUESTION # 70
An administrator is adding a stretched VLAN in NDB.
Which VLAN type(s) will satisfy this task?

- A. Only VLANs that are not managed in NDB
- B. Only dynamic VLANs
- C. Both static and dynamic VLANs
- D. Only static VLANs that are managed in NDB

Answer: C

Explanation:
The administrator can add a stretched VLAN in NDB using either static or dynamic VLANs. A stretched VLAN is a VLAN that spans across multiple Nutanix clusters, and allows the NDB- managed databases to communicate and migrate between different clusters. A static VLAN is a VLAN that is manually configured and assigned to the database server VMs and the databases by the administrator. A dynamic VLAN is a VLAN that is automatically configured and assigned to the database server VMs and the databases by the NDB instance, using the Nutanix Calm orchestration service. Both static and dynamic VLANs can be used to create a stretched VLAN in NDB, as long as they have the same VLAN ID and network configuration across the clusters.
The administrator cannot add a stretched VLAN in NDB using only VLANs that are not managed in NDB. A VLAN that is not managed in NDB is a VLAN that is configured and assigned to the database server VMs and the databases outside of the NDB instance, using the Nutanix Prism web console or other tools. A VLAN that is not managed in NDB cannot be used to create a stretched VLAN in NDB, as it is not recognized or controlled by the NDB instance.

NEW QUESTION # 71
An administrator needs to migrate a large 1/0-intensive database that doesn't support multi-disk layout.
How should the storage be provisioned with Era to support the database while optimizing performance?

- A. vDisk based provisioning
- B. Volume Group with Load Balancing
- C. Storage Spaces
- D. Volume Group

Answer: D

Explanation:
In Nutanix Era, a Volume Group is the recommended storage provisioning method for a large I/O- intensive database that doesn't support a multi-disk layout. A Volume Group in Nutanix Era is a collection of disks that can be managed as a single entity, providing a way to aggregate the storage capacity of multiple disks into a larger storage unit. This allows for better performance optimization as it enables the database to leverage the combined I/O capabilities of all the disks in the group. It's important to note that while other

options like Load Balancing, Storage Spaces, and vDisk based provisioning can also be used in certain scenarios, a Volume Group is specifically designed for situations where a single, high-performance storage unit is required.

NEW QUESTION # 72

How long is the default continuous recovery for the Gold SLA in Era Time Machine?

- A. 60 days
- B. 30 days
- C. 90 days
- D. 15 days

Answer: B

Explanation:
The default continuous recovery for the Gold SLA in Era Time Machine is 30 days. This means that the system keeps a continuous recovery point for the last 30 days, allowing you to restore your database to any point within this period.

NEW QUESTION # 73

What is causing this issue?

- A. The VLAN is static
- B. The VLAN is IPAM
- C. The VLAN is DHCP
- D. The VLAN is stretched

Answer: D

Explanation:
The correct answer is C because a stretched VLAN is a VLAN that spans across multiple Nutanix clusters, which may cause network conflicts or latency issues when starting the database server.
Option A is incorrect because a DHCP VLAN is a VLAN that uses dynamic IP address allocation, which does not affect the database server startup. Option B is incorrect because a static VLAN is a VLAN that uses fixed IP address allocation, which also does not affect the database server startup. Option D is incorrect because IPAM is not a type of VLAN, but a feature of NDB that allows managing IP addresses for database servers and databases.

NEW QUESTION # 74

......

The Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 real dumps by PracticeVCE that are available in three formats get updates every three months as per the feedback received from industry professionals. When you will buy the Nutanix NCP-DB-6.10 pdf questions and practice tests, you can open and access them instantly. The Nutanix NCP-DB-6.10 Practice Tests software is also updated if the Nutanix NCP-DB-6.10 certification exam content changes. You can download a free demo of Nutanix NCP-DB-6.10 PDF dumps and practice software before buying.
