SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which of the following is a benefit of using Retrieval Augmented Generation?

- A. It reduces the computational resources required for language modeling.
- **B. It allows LLMs to access and utilize information beyond their initial training data.**
- C. It eliminates the need for fine-tuning LLMs for specific tasks.
- D. It enables LLMs to learn new languages without additional training.

Answer: B

NEW QUESTION # 30

Which statement best describes the Chain-of-Thought (COT) prompting technique?

- A. Connecting related concepts by having the LLM generate chains of ideas.
- B. Linking multiple AI models in sequence, where each model's output becomes the input for the next model in the chain.
- **C. Concatenating multiple related prompts to form a chain, guiding the model through sequential reasoning steps.**
- D. Writing a series of connected prompts creating a chain of related information.

Answer: C

Explanation:

Chain-of-Thought (CoT) prompting is a technique that involves concatenating multiple related prompts to guide a language model through a series of reasoning steps, leading to a final conclusion.

1. Structure of CoT Prompting:

* **Sequential Reasoning:** By breaking down a complex problem into a sequence of intermediate prompts, the model addresses each

step methodically, enhancing its problem-solving capabilities.

* Logical Progression: Each prompt builds upon the previous one, ensuring a coherent flow of information that mirrors human logical reasoning.

2. Advantages of CoT Prompting:

* Enhanced Comprehension: This structured approach helps the model understand and process intricate tasks by focusing on one aspect at a time.

* Improved Accuracy: By guiding the model through detailed reasoning steps, CoT prompting reduces the likelihood of errors in the final output.

NEW QUESTION # 31

What is a Large Language Model (LLM)?

- A. A rule-based expert system to analyze and generate grammatically correct sentences.
- **B. An AI model that specializes in processing, understanding, and generating human language.**
- C. A gradient boosted decision tree algorithm for predicting text.
- D. A database system optimized for storing large volumes of textual data.

Answer: B

Explanation:

A Large Language Model (LLM) is an advanced AI model designed to handle various natural language processing tasks.

1. Definition and Purpose:

* Processing: LLMs analyze human language to understand syntax, semantics, and context.

* Understanding: They interpret the meaning behind text, enabling comprehension of nuanced language elements.

* Generating: LLMs can produce coherent and contextually appropriate text, facilitating tasks like content creation and translation.

2. Characteristics of LLMs:

* Scale: These models are trained on vast datasets, encompassing billions of words, which enhances their language capabilities.

* Architecture: LLMs typically utilize complex neural network architectures, such as transformers, to manage and process language data effectively.

3. Applications:

* Content Generation: Creating articles, summaries, and reports.

* Language Translation: Converting text from one language to another with high accuracy.

* Conversational Agents: Powering chatbots and virtual assistants to interact with users naturally.

NEW QUESTION # 32

Which of the following steps must be performed to deploy LLMs in the generative AI hub?

- **A. Provision SAP AI Core**
- B. Check for foundation model scenario
- C. Run the booster
- D. Provision SAP AI

Answer: A

NEW QUESTION # 33

Why would a user include formatting instructions within a prompt?

- A. To force the model to separate relevant and irrelevant output
- **B. To ensure the model's response follows a desired structure or style**
- C. To redirect the output to another software program
- D. To increase the faithfulness of the output

Answer: B
