

100% Pass Tableau - TDA-C01 - High-quality Valid Test Tableau Certified Data Analyst Vce Free

P.S. Free & New TDA-C01 dumps are available on Google Drive shared by Itbraindumps: <https://drive.google.com/open?id=1H3RFkgQAnRcnBGR4vyrO2Uvb8M4P2mDz>

Our company is a multinational company which is famous for the TDA-C01 training materials in the international market. After nearly ten years' efforts, now our company have become the topnotch one in the field, therefore, if you want to pass the TDA-C01 exam as well as getting the related certification at a great ease, I strongly believe that the TDA-C01 Study Materials compiled by our company is your solid choice. To be the best global supplier of electronic TDA-C01 study materials for our customers' satisfaction has always been our common pursuit.

Tableau TDA-C01 certification exam is an excellent way for professionals to enhance their skills and advance their careers. Tableau Certified Data Analyst certification demonstrates to employers that an individual has the skills and knowledge to use Tableau effectively for data analysis. With the increasing demand for data analysts and the growing importance of data-driven decision-making, the Tableau TDA-C01 certification is a valuable credential that can help individuals stand out in a competitive job market.

Tableau TDA-C01 is a certification exam designed to test the skills and expertise of professionals in the field of data analytics. Tableau Certified Data Analyst certification program is offered by Tableau, an American software company that specializes in developing interactive data visualization products. The TDA-C01 Exam is aimed at professionals who want to validate their skills in using Tableau for data analysis and reporting. Tableau Certified Data Analyst certification exam is ideal for individuals who are seeking to enhance their knowledge and skills in data analytics, as well as for organizations that want to validate the abilities of their employees in using Tableau software.

Pass-Sure Valid Test TDA-C01 Vce Free | Easy To Study and Pass Exam at first attempt & Perfect TDA-C01: Tableau Certified Data Analyst

Our website experts simplify complex concepts of the TDA-C01 exam questions and add examples, simulations, and diagrams to explain anything that might be difficult to understand. Therefore, even ordinary examiners can master all the TDA-C01 learning materials without difficulty. And the price of our TDA-C01 Study Guide is reasonable for even the students can afford it. At the same time, we give some discounts from time to time, you can buy our TDA-C01 practice engine at a favorable price.

Tableau Certified Data Analyst Sample Questions (Q68-Q73):

NEW QUESTION # 68

A Data Analyst has the following primary data source that contains a dimension named Dorm_Code.

Dorm_Name	Dorm_Code
Hawthorne	DKSK
Blinx	A1TYU
Michaels	G3N9J
Rogers	FSN7
Mazy	J8TO
Cameron	9MUH
Kemmins	Z1KL

The analyst receives the following secondary data source that contains updated dorm codes.

Dorm_Name	Dorm_Code_New
Hawthorne	A1
Blinx	A2
Michaels	A3
Rogers	A4
Mazy	A5
Cameron	A6
Kemmins	A7

The analyst needs to bring the updated dorm codes into Tableau and use the codes in existing visualizations.

The new dorm codes must use the existing field name of Dorm_Code.

What should the analyst do?

- A. Bring in the secondary table as a left join to the primary data source. From the Data Source page, select Create Calculated Field in the Dorm_Name field and enter [Dorm_Name_New] in the calculation window.
- **B. Bring in the secondary data source by using relationships. From the Data pane, right-click Dorm_Name, select Replace References, and then select DormName New.**
- C. Bring in the secondary data source as a union.
- D. Create a data blend and select Edit Primary Aliases to replace the primary data source alias values with values from the secondary data source.

Answer: B

NEW QUESTION # 69

In a dataset, you have a string field named Name that contains unnecessary semicolons.

Which function should you use to remove the semicolons from the Name field?

- A. TRIM
- B. CONTAINS
- C. SPLIT
- **D. REPLACE**

Answer: D

Explanation:

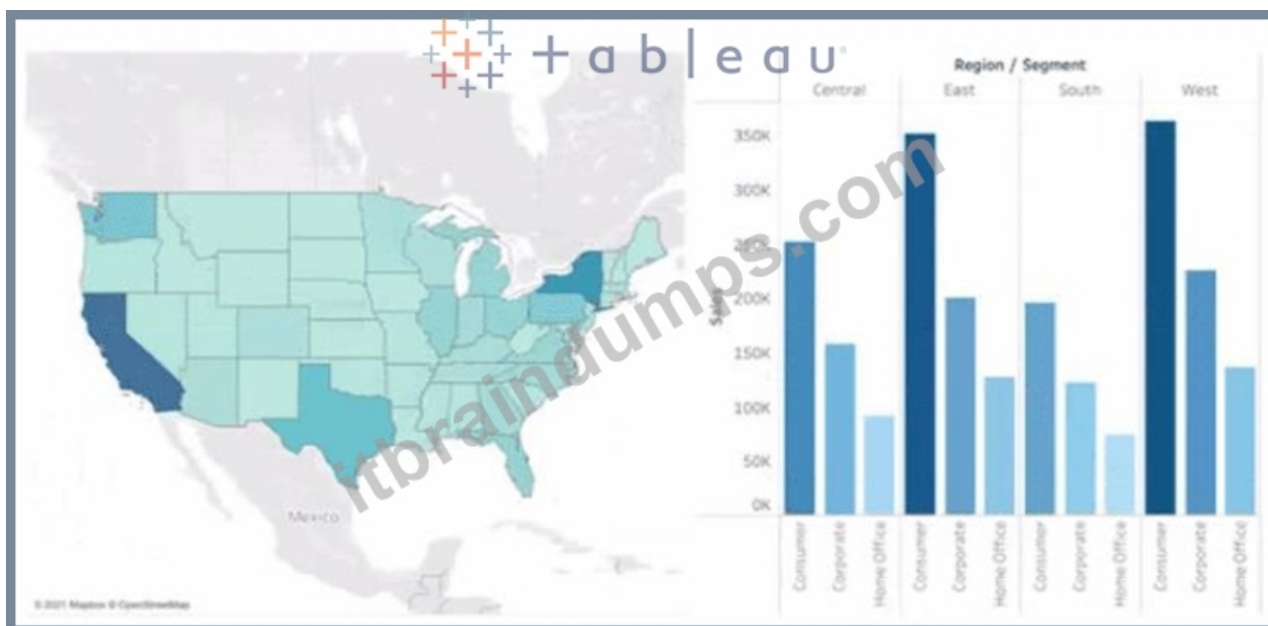

The REPLACE function is used to replace all occurrences of a substring within a string with another substring. In this case, it can be used to remove the semicolons from the Name field by replacing them with an empty string. For example, REPLACE ("John;Doe", ";", "") = "JohnDoe". Reference: The information is based on the following sources:

String Functions - Tableau

Remove special characters and add a semi colon in a word - Tableau

NEW QUESTION # 70

You have the following dashboard that contains two visualizations.

You want to show only one visualization at time. Users must be able to switch between visualizations. What should you use?

- A. Show/hide buttons
- B. Dashboard actions
- C. Worksheet actions
- D. A parameter and a calculated field

Answer: D

Explanation:

In Tableau, you can manage the visibility of different visualizations on a dashboard using various techniques.

Among the options provided, the most straightforward method to allow users to switch between two visualizations is to use show/hide buttons.

Here's why each option is or isn't suitable for the requirement:

A). A parameter and a calculated field: While it's possible to use a parameter and a calculated field to control which visualization is displayed, it requires creating a calculated field that responds to a parameter and then using that field to filter the view. This method can become complex and is not as user-friendly for simply showing and hiding visualizations.

B). Worksheet actions: Worksheet actions in Tableau typically allow users to interact with the data within a visualization, such as filtering data or highlighting related data points when clicking or hovering. They are not designed to control the visibility of entire visualizations on a dashboard.

C). Show/hide buttons: Show/hide buttons are a feature specifically designed to manage the visibility of dashboard elements. When you create a show/hide button, it can be configured to display or hide a particular visualization, container, or any other dashboard element when clicked. This provides a very intuitive interface for users to switch between visualizations.

D). Dashboard actions: Dashboard actions, like worksheet actions, are used to create interactions between sheets, such as filtering data or navigating to other sheets or URLs based on user interactions. They are not intended for toggling the visibility of visualizations.

Therefore, the correct answer is C. Show/hide buttons as they provide a user-friendly way to switch between visualizations on a dashboard without the need for complex calculations or actions that aren't meant for this purpose. The show/hide button feature is specifically designed for toggling visibility and offers a simple and effective solution for the requirement.

NEW QUESTION # 71

You have the following dataset.

Region	Sales
Central	\$501,240
East	\$678,781
South	\$391,722
West	\$725,458

Which Level of Detail (LOD) expression should you use to calculate the grand total of all the regions?

- A. {FIXED: TOTAL (Sales)}
- B. {FIXED: SUM Sales}
- C. {Fixed: [Region]: TOTAL Sales}
- D. {FIXED: [Region] SUM Sales}

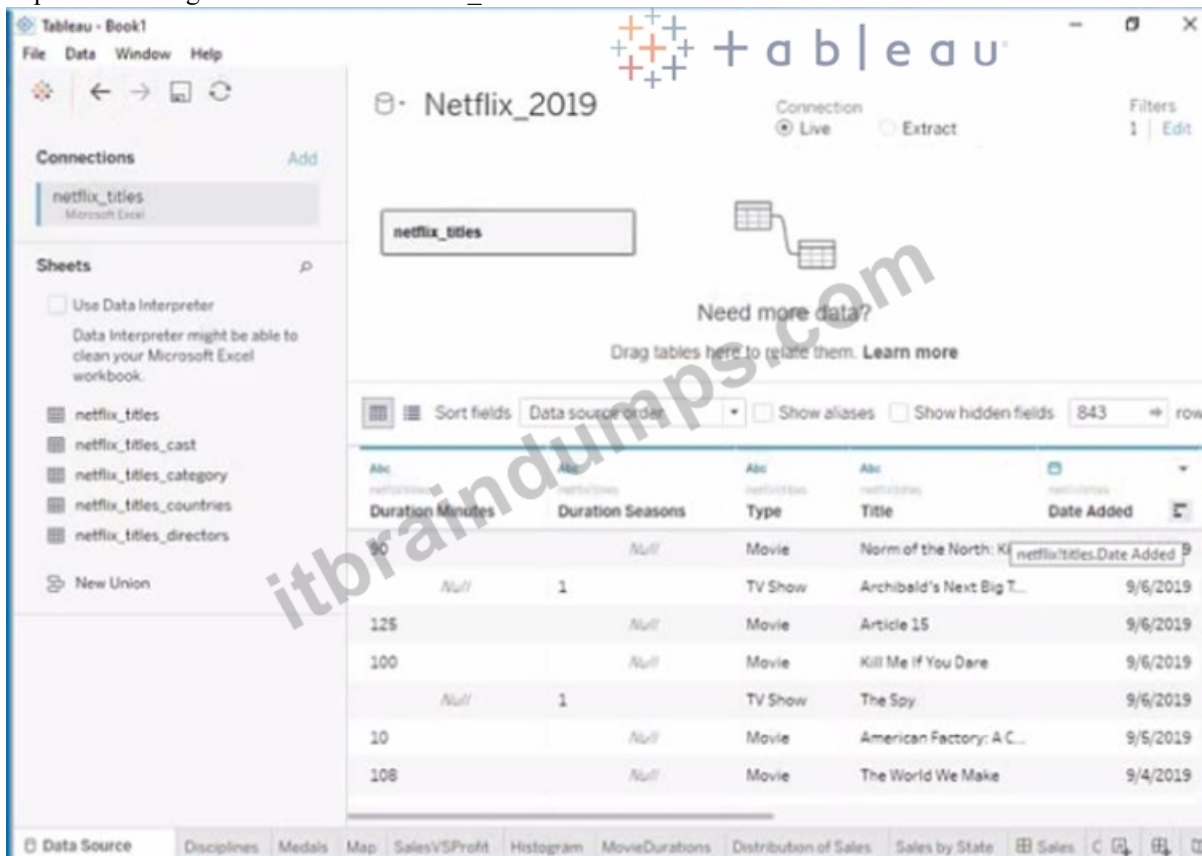

Answer: A

Explanation:

To calculate the grand total of all the regions, you need to use a Level of Detail (LOD) expression that ignores any dimensions in the view and returns the total sum of sales. The FIXED keyword allows you to specify the level of detail for the calculation, and the TOTAL function returns the sum of all values in the expression. Therefore, the correct LOD expression is {FIXED: TOTAL (Sales)}. Reference: https://help.tableau.com/current/pro/desktop/en-us/calculations_calculatedfields_lod.htm
https://help.tableau.com/current/pro/desktop/en-us/functions_functions_tablecalculation.htm#TOTAL

NEW QUESTION # 72

Open the link to Book1 found on the desktop. Open the Movie Durations worksheet.
Replace the existing data source with the Netflix_2019 data source.

- A. check the steps below in explanation

Answer: A

Explanation:

To replace the existing data source with the Netflix_2019 data source, you need to do the following steps:

Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Movie Durations worksheet. Click on the Movie Durations tab at the bottom of the workbook to open the worksheet. You will see a bar chart that shows the number of movies by duration for the existing data source.

Go to the Data Source tab at the bottom of the workbook to see the data source page. You will see a table that shows the fields and values from the existing data source.

Click on the drop-down arrow next to the data source name at the top of the page and select Replace Data Source from the menu. This will open a dialog box that allows you to replace your data source with another one.

Select Netflix_2019 from the list of available data sources and click OK. This will replace your existing data source with the

Netflix 2019 data source and update your worksheet accordingly. You may need to fix any broken fields or calculations that result from the replacement.

NEW QUESTION # 73
