

# 2026 Pass 300-745 Guide | Newest 300-745 100% Free Sample Questions Pdf

RealExamFree online digital 300-745 exam questions are the best way to prepare. Using our 300-745 exam dumps, you will not have to worry about whatever topics you need to master. The 300-745 practice test RealExamFree keeps track of each previous attempt and highlights the improvements with each attempt. The 300-745 Mock Exam setup can be configured to a particular style & arrive at unique questions. Cisco 300-745 practice exam went through real-world testing with feedback from more than 90,000 global professionals before reaching its latest form.

The RealExamFree is one of the top-rated and renowned platforms that has been offering real and valid Designing Cisco Security Infrastructure (300-745) exam practice test questions for many years. During this long time period countless Designing Cisco Security Infrastructure (300-745) exam candidates have passed their dream 300-745 certification and they are now certified Cisco professionals and pursuing a rewarding career in the market.

## Cisco Pass 300-745 Guide Exam Pass Once Try | 300-745: Designing Cisco Security Infrastructure

They found difficulty getting hands on Cisco 300-745 real exam questions as it is undoubtedly a tough task. Besides this, it is also hard to pass the 300-745 exam on the first attempt. Nervousness and fear of exam is also daunting for applicants. The actual 300-745 Questions being offered by RealExamFree will enable you to obtain the certification without any hassle.

## Cisco Designing Cisco Security Infrastructure Sample Questions (Q67-Q72):

### NEW QUESTION # 67

A financial company is in the process of upgrading network access across the entire company.

The solution must ensure:

- least privilege access
- control access across different network segments
- increased security for employers

Which solution approach must the company take?

- A. NetFlow
- **B. RBAC**
- C. SNMP
- D. PKI

**Answer: B**

Explanation:

Role-Based Access Control (RBAC) enforces least privilege access by granting permissions based on roles, not individuals. It also provides centralized control across network segments, ensuring employees only have the access necessary for their responsibilities, thereby increasing overall security.

#### NEW QUESTION # 68

A video game company identified a potential threat of a SYN flood attack, which could disrupt the online gaming services and impact user experience. The attack can overwhelm network resources by exploiting the TCP handshake process, leading to server unavailability and degraded performance. To safeguard the company's infrastructure and ensure uninterrupted service, it is essential to enhance the security measures in place. The company must implement a solution that manages and mitigates the risk of such network-based attacks. Which security product must be implemented to mitigate similar risks?

- A. Cisco Umbrella
- B. Cisco Web Security Appliance
- C. Cisco Secure Endpoint
- **D. Cisco Secure Firewall**

**Answer: D**

Explanation:

A SYN flood attack is a type of DoS/DDoS attack targeting the TCP handshake process. The correct mitigation is deploying a Cisco Secure Firewall, which includes advanced intrusion prevention, SYN flood protection, and traffic management capabilities to prevent resource exhaustion and keep services available.

#### NEW QUESTION # 69

Which generative AI impact is addressed by a human-in-the-loop design policy?

- A. deep fakes
- B. phishing
- **C. AI hallucinations**
- D. scale changes

**Answer: C**

Explanation:

A human-in-the-loop design policy ensures that humans validate or oversee AI-generated outputs, reducing the risk of AI hallucinations (false or misleading information generated by AI).

This provides accountability and accuracy in generative AI use.

#### NEW QUESTION # 70

Which benefit does AI provide in network security?

- **A. It identifies vulnerabilities associated with weak TLS algorithms.**
- B. It provides complete protection from DDoS attacks.
- C. It speeds up network data transmission rates.
- D. It replaces comprehensive defense in depth.

**Answer: A**

#### Explanation:

AI in network security enhances threat detection and vulnerability identification by analyzing large volumes of traffic and encryption patterns. It can automatically detect risks such as weak TLS algorithm usage, which would otherwise be difficult to identify quickly with manual processes.

#### NEW QUESTION # 71

A software development company uses multiple cloud providers to host the applications. The company is designing a scalable firewall solution that must meet the requirements:

- Consistent security policies across multiple cloud environments.
- Centralized visibility and management.
- Scalability to accommodate different cloud platforms.

Which type of firewall meets the requirements?

- A. traditional firewall
- B. zone-based firewall
- C. host-based firewall
- D. **distributed firewall**

#### Answer: D

#### Explanation:

A distributed firewall is designed for multi-cloud and hybrid environments. It ensures consistent security policies across multiple platforms, offers centralized visibility and management, and scales seamlessly with workloads across different cloud providers. This directly meets the requirements of the scenario, unlike traditional or host-based solutions that lack centralized scalability across multiple clouds.

#### NEW QUESTION # 72

.....

The 300-745 learning materials are of high quality, mainly reflected in the adoption rate. As for our 300-745 exam question, we guaranteed a higher passing rate than that of other agency. More importantly, we will promptly update our 300-745 quiz torrent based on the progress of the letter and send it to you. 99% of people who use our 300-745 Quiz torrent has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our 300-745 exam question is 99%. So our 300-745 study guide is a good choice for you.
