100% Pass Quiz 2026 Fortinet High Pass-Rate EMEA-Advanced-Support: Key Fortinet EMEA Advanced Support Exam Concepts

Our EMEA-Advanced-Support preparation exam can provide all customers with the After-sales service guarantee. The After-sales

service guarantee is mainly reflected in to many aspects. The most important one is that we can promise that our EMEA-Advanced-Support study questions will meet the customer demand for privacy protection. As is known to us, the privacy protection of customer is very important, No one wants to breach patient. So our EMEA-Advanced-Support Actual Exam pays high attention to protect the privacy of all customers.

Fortinet EMEA Advanced Support Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36
Which protocol does FortiGate use for secure management access by default?

- A. SSH
- B. HTTP
- C. SNMP
- D. Telnet

Answer: A

Explanation:
FortiGate uses SSH (Secure Shell) by default for secure management access, providing encrypted command- line access. Telnet (A) and HTTP (C) are insecure, and SNMP (D) is for monitoring, not management. Exact extract: "FortiGate enables SSH by default for secure management access, providing encrypted CLI access to administrators."

NEW QUESTION # 37
What is the role of the FortiGate 'set srcintf' command in a firewall policy?

- A. Defines the destination interface for traffic
- B. Configures the source NAT interface
- C. Specifies the source interface for traffic matching
- D. Sets the source IP address range

Answer: C

Explanation:
The 'set srcintf' command in a FortiGate firewall policy specifies the source interface from which traffic originates, helping define the policy's scope. It does not set the destination interface (B), source IP range (C), or NAT interface (D). Exact extract: "The 'set srcintf' command in a firewall policy specifies the source interface for incoming traffic, allowing FortiGate to match packets based on their entry interface."

NEW QUESTION # 38
What are source and destination MAC addresses of an ARP request?

- A. The source MAC is that of the forwarding switch and destination of the targeted device
- B. The source MAC is that of the sending device and the destination of the targeted device
- C. The source MAC is that of the sending device and the destination MAC is a broadcast address
- D. The source MAC is that of the sending device and the destination is a multicast address

Answer: C

Explanation:
An ARP (Address Resolution Protocol) request is broadcast to resolve an IP address to a MAC address. The source MAC is the sender's MAC address, and the destination MAC is the broadcast address (FF:FF:FF:FF:
FF:FF) to reach all devices on the local network. Fortinet devices handle ARP for Layer 2 communication.
Options B, C, and D are incorrect as switches don't originate ARP requests, the target's MAC is unknown, and ARP uses broadcast, not multicast. Exact extract: "In an ARP request, the source MAC address is that of the sending device, and the destination MAC address is the broadcast address (FF:FF:FF:FF:FF:FF), sent to all devices in the local network segment."

NEW QUESTION # 39

Which statement is true about IPsec VPNs and SSL VPNs?

- A. Both SSL VPNs and IPsec VPNs are standard protocols
- B. Either a SSL VPN or an IPsec VPN can be established between an end-user workstation and a FortiGate device
- C. SSL VPN creates a HTTPS connection. IPsec does not
- D. All of the above

Answer: D

Explanation:
Both SSL VPN and IPsec VPN are standard protocols supported by FortiGate devices for secure remote access. SSL VPN typically uses HTTPS (TCP port 443) for encrypted communication, while IPsec uses protocols like IKE and ESP. Both can be configured between an end-user workstation (e.g., via FortiClient) and a FortiGate device, supporting various authentication methods. All options are correct, making D the correct answer. Exact extract: "SSL VPN technology uses the standard SSL/TLS protocol to provide a secure connection to the FortiGate unit. The FortiGate SSL VPN can be configured to use HTTPS..." and "IPsec VPNs use standardized protocols like IKE and ESP to create secure tunnels... FortiClient supports both IPsec and SSL VPN connections to FortiGate devices for remote access."

NEW QUESTION # 40
Hybrid cloud means that

- A. The cloud provider uses AMD, Intel and possibly also other CPU vendors
- B. One customer uses VMs with multiple different operating systems in the same cloud account
- C. Some of the customer's systems are virtualized in the public cloud and some are in the local datacenter
- D. Cloud provider provides both 32-bit and 64-bit virtual machines

Answer: C

Explanation:
A hybrid cloud combines on-premises infrastructure (local datacenter) with public cloud resources, allowing workloads to operate across both environments for flexibility and scalability. Fortinet solutions like FortiGate- VM support hybrid cloud deployments. Option A refers to hardware diversity, C to OS variety, and D to architecture types, none of which define hybrid cloud. Exact extract: "Hybrid cloud is the combination of public cloud services with an on-premises private cloud or datacenter... This allows customers to run some systems in the public cloud and others in their local datacenter, managed seamlessly."

NEW QUESTION # 41
......

With the principles of serve first and customers first, we will company you during you whole preparation. We offer you free demo before buying EMEA-Advanced-Support exam dumps of us, and you can get your downloading link and password when you finish your payment. And you can get them about ten minutes after your payment. What's more, we have free update for one year after purchasing, and the updated version will send to your email automatically. If you have any questions about the EMEA-Advanced-Support Exam Dumps, you can consult our online service stuff.

EMEA-Advanced-Support Download: https://www.surepassexams.com/EMEA-Advanced-Support-exam-bootcamp.html

Once you received our EMEA-Advanced-Support dump pdf, you just need to spend one or two days to practice questions and remember the answers of EMEA-Advanced-Support passleader dumps, The answer is our EMEA-Advanced-Support VCE dumps, Because of the stunning rate of 98% to 100% of EMEA-Advanced-Support pass-sure torrent, every year we have helped all off our candidates win tests, By virtue of the help from professional experts, who are conversant with the regular exam questions of our latest EMEA-Advanced-Support exam torrent we are dependable just like our EMEA-Advanced-Support test prep.

Oracle Forms Generator, After all customers successfully EMEA-Advanced-Support purchased our exam materials, we will provide one year free update, Once you received our EMEA-Advanced-Support Dump pdf, you just need to spend one or two days to practice questions and remember the answers of EMEA-Advanced-Support passleader dumps.

100% Pass Quiz 2026 Fortinet - EMEA-Advanced-Support - Key Fortinet EMEA Advanced Support Exam Concepts

The answer is our EMEA-Advanced-Support VCE dumps, Because of the stunning rate of 98% to 100% of EMEA-Advanced-Support pass-sure torrent, every year we have helped all off our candidates win tests.

By virtue of the help from professional experts, who are conversant with the regular exam questions of our latest EMEA-Advanced-Support exam torrent we are dependable just like our EMEA-Advanced-Support test prep.

App/online test engine of the EMEA-Advanced-Support guide torrent is designed based on a Web browser, as long as a browser device is available.
