2026 SOA-C02–100% Free Premium Files | Latest Test AWS Certified SysOps Administrator - Associate (SOA-C02) Questions Answers

What's more, part of that Pass4Test SOA-C02 dumps now are free: https://drive.google.com/open?id=1ZU70OMoy8O6k_6OxIVmEnvl7GP61dreN

We consider the actual situation of the test-takers and provide them with high-quality learning materials at a reasonable price. Choose the SOA-C02 test guide absolutely excellent quality and reasonable price, because the more times the user buys the SOA-C02 test guide, the more discounts he gets. In order to make the user's whole experience smoother, we also provide a thoughtful package of services. Once users have any problems related to the SOA-C02 learning questions, our staff will help solve them as soon as possible.

If you encounter any questions about our SOA-C02 learning materials during use, you can contact our staff and we will be happy to serve for you. Maybe you will ask if we will charge an extra service fee. We assure you that we are committed to providing you with guidance on SOA-C02 quiz torrent, but all services are free of charge. As for any of your suggestions, we will take it into consideration, and effectively improve our SOA-C02 Exam Question to better meet the needs of clients. In the process of your study, we have always been behind you and are your solid backing. This will ensure that once you have any questions you can get help in a timely manner.

Test SOA-C02 Questions Answers - SOA-C02 Valid Exam Pattern

About the oncoming SOA-C02 exam, every exam candidates are wishing to utilize all intellectual and technical skills to solve the obstacles ahead of them to go as well as it possibly could. So the pending exam causes a panic among the exam candidates. The help of our SOA-C02 Exam prepare is just in time. In the present posture, our SOA-C02 study materials are your best choice. We provide you with excellent prepare materials for you to pass the exam and get the certification.

Amazon AWS Certified SysOps Administrator - Associate (SOA-C02) Sample Questions (Q539-Q544):

NEW QUESTION # 539
A SysOps administrator has launched a large general purpose Amazon EC2 instance to regularly process large data files. The instance has an attached 1 TB General Purpose SSD (gp2) Amazon Elastic Block Store (Amazon EBS) volume. The instance also is EBS-optimized. To save costs, the SysOps administrator stops the instance each evening and restarts the instance ach morning.
When data processing is active, Amazon CloudWatch metrics on the instance show a consistent
3,000 VolumeReadOps. The SysOps administrator must improve the I/O performance while ensuring data integrity.
Which action will meet these requirements?

- A. Change the instance type to a large, burstable, general purpose instance.
- B. Increase the EBS volume to a 2 TB General Purpose SSD (gp2) volume.
- C. Move the data that resides on the EBS volume to the instance store.
- D. Change the instance type to an extra large general purpose instance.

Answer: B

NEW QUESTION # 540
A Sysops administrator needs to configure automatic rotation for Amazon RDS database credentials. The credentials must rotate every 30 days. The solution must integrate with Amazon RDS.
Which solution will meet these requirements with the LEAST operational overhead?

- A. Store the credentials in AWS Secrets Manager. Configure automatic rotation with a rotation interval of 30 days.
- B. Store the credentials in a file in an Amazon S3 bucket. Deploy an AWS Lambda function to automatically rotate the credentials every 30 days.
- C. Store the credentials in AWS Secrets Manager. Deploy an AWS Lambda function to automatically rotate the credentials every 30 days.
- D. Store the credentials in AWS Systems Manager Parameter Store as a secure string. Configure automatic rotation with a rotation interval of 30 days.

Answer: A

Explanation:
Storing the credentials in AWS Secrets Manager and configuring automatic rotation with a rotation interval of
30 days is the most efficient way to meet the requirements with the least operational overhead. AWS Secrets Manager automatically rotates the credentials at the specified interval, so there is no need for an additional AWS Lambda function or manual rotation. Additionally, Secrets Manager is integrated with Amazon RDS, so the credentials can be easily used with the RDS database.

NEW QUESTION # 541
A SysOps administrator must configure a resilient tier of Amazon EC2 instances for a high performance computing (HPC) application. The HPC application requires minimum latency between nodes Which actions should the SysOps administrator take to meet these requirements? (Select TWO.)

- A. Create an Amazon Elastic File System (Amazon EPS) file system Mount the file system to the EC2 instances by using user data
- B. Launch the EC2 instances into a cluster placement group
- C. Place the EC2 instances in an Auto Scaling group within a single subnet
- D. Create a Multi-AZ Network Load Balancer in front of the EC2 instances
- E. Launch the EC2 instances into a partition placement group

Answer: B,E

Explanation:
For high-performance computing (HPC) applications requiring minimal latency between nodes, using a placement group strategy is crucial.
Cluster Placement Group:
Provides low-latency network performance within a single Availability Zone by placing instances close together on the network.
Suitable for applications that require high throughput or low latency.
Partition Placement Group:
Helps reduce the impact of hardware failures by dividing instances into partitions, where each partition can be placed on distinct racks in the data center.
Suitable for applications that need high availability and fault tolerance.
Setting Up Placement Groups:
Create a Placement Group:
Open the Amazon EC2 console at Amazon EC2 Console.
In the navigation pane, choose Placement Groups.
Choose Create placement group, specify the name, and choose either Cluster or Partition as the strategy.
Launch Instances:
When launching new instances, specify the placement group name to ensure they are placed accordingly.

Placement Groups
Creating and Managing Placement Groups

NEW QUESTION # 542
A company is using an Amazon Aurora MySQL DB cluster that has point-in-time recovery, backtracking, and automatic backup enabled. A SysOps administrator needs to be able to roll back the DB cluster to a specific recovery point within the previous 72 hours. Restores must be completed in the same production DB cluster.
Which solution will meet these requirements?

- A. Create an Aurora Replica. Promote the replica to replace the primary DB instance.
- B. Create an AWS Lambda function to restore an automatic backup to the existing DB cluster.
- C. Use backtracking to rewind the existing DB cluster to the desired recovery point.
- D. Use point-in-time recovery to restore the existing DB cluster to the desired recovery point.

Answer: D

NEW QUESTION # 543
A company's web application is available through an Amazon CloudFront distribution and directly through an internet-facing Application Load Balancer (ALB) A SysOps administrator must make the application accessible only through the CloudFront distribution and not directly through the ALB. The SysOps administrator must make this change without changing the application code Which solution will meet these requirements?

- A. Create a Lambda@Edge function Configure the function to compare a custom header value in the request with a stored password and to forward the request to the origin in case of a match Associate the function with the distribution.
- B. Modify the ALB type to internal Set the distribution's origin to the internal ALB domain name
- C. Replace the ALB with a new internal ALB Set the distribution's origin to the internal ALB domain name Add a custom HTTP header to the origin settings for the distribution In the ALB listener add a rule to forward requests that contain the matching custom header and the header's value Add a default rule to return a fixed response code of 403.
- D. Add a custom HTTP header to the origin settings for the distribution in the ALB listener add a rule to forward requests that contain the matching custom header and the header's value Add a default rule to return a fixed response code of 403.

Answer: D

Explanation:
To make the application accessible only through the CloudFront distribution and not directly through the Application Load Balancer (ALB), you can add a custom HTTP header to the origin settings for the CloudFront distribution. You can then create a rule in the ALB listener to forward requests that contain the matching custom header and its value to the origin. You can also add a default rule to the ALB listener to return a fixed response code of 403 for requests that do not contain the matching custom header. This will allow you to redirect all requests to the CloudFront distribution and block direct access to the application through the ALB.

NEW QUESTION # 544

......

There is an old saying goes, the customer is king, so we follow this principle with dedication to achieve high customer satisfaction on our SOA-C02 exam questions. First of all, you are able to make full use of our SOA-C02 learning dumps through three different versions: PDF, PC and APP online version. For each version, there is no limit and access permission if you want to download our SOA-C02study materials, and it really saves a lot of time for it is fast and convenient.

Test SOA-C02 Questions Answers: https://www.pass4test.com/SOA-C02.html

You will always get the latest and updated information about SOA-C02 actual questions & answers for study due to our one year free update policy after your purchase, Amazon Premium SOA-C02 Files They even felt a headache when they read a book, Amazon Premium SOA-C02 Files Prepare yourself to Face the Exam with Real Exam Questions from Previous Exams, walk into the Testing Centre with confidence, Amazon Premium SOA-C02 Files In addition, we are pass guarantee and money back guarantee if you fail to pass the exam.

Unless you are completely desperate, our study guide can SOA-C02 Valid Exam Pattern deal with your troubles, The benefits can include better job prospects, higher pay, and superior quality of life.

You will always get the latest and updated information about SOA-C02 Actual Questions & answers for study due to our one year free update policy after your purchase.

2026 Premium SOA-C02 Files Pass Certify | Professional Test SOA-C02 Questions Answers: AWS Certified SysOps Administrator - Associate (SOA-C02)

They even felt a headache when they read a book, Prepare yourself SOA-C02 to Face the Exam with Real Exam Questions from Previous Exams, walk into the Testing Centre with confidence.

In addition, we are pass guarantee and money back guarantee if Test SOA-C02 Questions Answers you fail to pass the exam, Yes, we have several Exam Engines, as well as the PDF Test Files available in our Samples page.
