All C-WME-2506 Test Questions are created based on the real test and followed by valid test answers and explanations. We guarantee you get high passing score with our C-WME-2506 exam prep.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q36-Q41):

NEW QUESTION # 36

How would you write a jQuery selector for the following HTML element: `<div class="button" id="blueBtn">Click Here</div>`?

- A. `div#button`
- **B. `div#blueBtn`**
- C. `#blue Btn`
- D. `div.blueBtn`

Answer: B

NEW QUESTION # 37

A brokerage firm is interested in implementing WalkMe to address an issue their customers face when transferring money from their online accounts to their banks. They have heard that users do not know where to go on the platform to complete this, but once they reach the appropriate page, they know how to fill out the forms correctly without errors. Of the listed WalkMe apps, which would best address the issue?

- A. ShoutOut to announce that this must be completed
- B. SmartTips on the fields of the page

- C. Resource to explain how to complete all parts of the process
- **D. Shuttle to bring the user to the page**

Answer: D

Explanation:

The issue described is that users struggle to navigate to the correct page for transferring money, but once there, they can complete the forms without errors. A Shuttle is the most appropriate WalkMe solution, as it directly addresses navigation challenges by guiding users from any page to the specific target page (e.g., the money transfer page) via a clickable link or button. Shuttles are designed to simplify navigation, making them ideal for this use case where the primary pain point is finding the right page.

The other options are less suitable:

- * Resource(A) provides detailed instructions, but the issue is navigation, not understanding the process.
- * SmartTips(C) offer field-level guidance, which is unnecessary since users already know how to fill out the forms.
- * ShoutOut(D) is for announcements and doesn't directly solve the navigation problem.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.7: Shuttles):

"Shuttles are designed to guide users to a specific page or section of an application, addressing navigation challenges by providing a direct path to the target location." The course Getting Started with Building WalkMe Solutions states:

"For scenarios where users struggle to find the correct page, such as initiating a process like a money transfer, a Shuttle is the most effective tool to direct them to the destination." Option B, a Shuttle, best addresses the navigation issue.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.7: Shuttles.

Course: Getting Started with Building WalkMe Solutions, Module 8: Navigation Solutions.

NEW QUESTION # 38

Your product team released a new feature last month and would like to get end user feedback within Insights.

Which of the options below is the best approach?

- A. Use a Shuttle linking to a Google Form with detailed questions.
- **B. Add a ShoutOut on the feature page that activates a WalkMe Survey with multiple questions.**
- C. Use a 3rd party survey tool and send it to your users in an automated email campaign.
- D. Create a Survey and place it in the WalkMe Menu.

Answer: B

NEW QUESTION # 39

The ShopMe team wants to put a Launcher on every product page. Example URLs of the product pages are as follows:

<http://shopme.walkme.com/product/taylor-swift-1989/>

<http://shopme.walkme.com/product/nicki-minaj-the-pinkprint/>

<http://shopme.walkme.com/product/beyonce-beyonce/>

How would they build the Current URL rule for when this should appear with best practices in mind?

- A. Current URL > is like > shopme.walkme.com/product
- **B. Current URL > contains > /product**
- C. Current URL is like > walkme.com
- D. Current URL > contains > shopme.walkme.com

Answer: B

Explanation:

To display a Launcher on every product page, the Current URL rule must target the common pattern in the product page URLs. The example URLs share the segment "/product," which uniquely identifies product pages. Using the rule Current URL > contains > /product ensures the Launcher appears on all pages with "

/product" in the URL, following best practices for specificity and flexibility. This approach avoids overly broad or restrictive rules and accommodates potential URL variations.

The other options are incorrect:

* is like > shopme.walkme.com/product(A) is too specific, missing subpaths like "/taylor-swift-1989/."

* is like > walkme.com(B) is too broad, matching non-product pages.

* contains > shopme.walkme.com(D) is also too broad, including non-product pages on the domain.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.9:

URL Rules):

"For URL-based rules, use 'contains' with a unique URL segment (e.g., '/product') to target specific page types, ensuring flexibility and accuracy for dynamic URLs." The course Getting Started with Building WalkMe Solutions advises:

"When targeting pages like product pages, use 'Current URL contains' with a distinctive segment like '/product' to capture all relevant pages without including unrelated ones." Option C is the best URL rule for the Launcher.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.9: URL Rules.

WalkMe Editor User Guide, "Configuring URL Rules" Section.

Course: Getting Started with Building WalkMe Solutions, Module 10: Targeting Content with Rules.

NEW QUESTION # 40

What is the primary difference between Global Level Design and Local Level Design in WalkMe?

- A. Global Level Design requires CSS knowledge, while Local Level Design does not for certain elements.
- **B. Global Level Design applies to all WalkMe content, while Local Level Design applies to specific items and can override global settings.**
- C. Global Level Design only affects ShoutOuts, while Local Level Design affects SmartTips and Launchers.
- D. Global Level Design is only available for administrators, while Local Level Design is available for all users.

Answer: B

Explanation:

In WalkMe, Global Level Design refers to styling and configuration settings that apply universally to all WalkMe content within an account, such as default fonts, colors, or balloon styles. These settings ensure consistency across deployables like Smart Walk-Thrus, ShoutOuts, and Launchers. Local Level Design, on the other hand, allows Builders to customize the appearance or behavior of specific WalkMe items (e.g., a single ShoutOut or SmartTip), overriding global settings when needed. This hierarchy enables flexibility while maintaining a cohesive brand identity.

The other options are incorrect:

* Option A is wrong because Global Level Design affects all content types, not just ShoutOuts, and Local Level Design applies to any item, not only SmartTips and Launchers.

* Option C is misleading, as both design levels can be configured without CSS knowledge using the WalkMe Editor's UI, though advanced customization may involve CSS.

* Option D is incorrect, as both design levels are accessible to Builders with appropriate permissions, not restricted by user role.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.6: Design and Customization):

"Global Level Design sets the default styling and behavior for all WalkMe content in an account, such as fonts, colors, and balloon positioning. Local Level Design allows customization of individual items, overriding global settings to meet specific needs." The course Advancing Your Skills in Building WalkMe Solutions states:

"Use Global Level Design to enforce brand consistency across all WalkMe deployables. For unique requirements, apply Local Level Design to specific items, which takes precedence over global configurations." Option B correctly captures the primary difference between Global and Local Level Design.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.6: Design and Customization.

WalkMe Editor User Guide, "Global vs. Local Design" Section.

Course: Advancing Your Skills in Building WalkMe Solutions, Module 9: Customizing WalkMe Content.

NEW QUESTION # 41

.....

ExamsTorrent's C-WME-2506 exam dumps comprise a brief and succinct set of exam questions that provides authentic, updated and the most relevant information on each syllabus contents that may be the part of your C-WME-2506 exam paper. The C-WME-2506 dumps have been verified and approved by the skilled professional. Hence, there is no question of irrelevant or substandard information. The feedback of our customers evaluates C-WME-2506 Brain Dumps as the top dumps that helped their overcome all their exam worries rather enabled them to ace it with brilliant success.

Latest C-WME-2506 Test Dumps: <https://www.examstorrent.com/C-WME-2506-exam-dumps-torrent.html>

Once you begin to do the exercises of the C-WME-2506 test guide, the timer will start to work and count down. Third, the latest Latest C-WME-2506 Test Dumps - SAP Certified Associate - WalkMe Digital Adoption Consultant troytec pdf covers most of questions in the real exam, and you will find everything you need to over the difficulty of SAP Latest C-WME-2506 Test Dumps troytec exams, SAP C-WME-2506 updated mp3 guide and C-WME-2506 video lectures online will make each and everything perfectly done for you and then your success chances will surely get increased in the exam up to the maximum.

As an instructor, I go a step farther and hide behind the old "Do as I say, not as I do" approach, Users Group Bay Area leader, Once you begin to do the exercises of the C-WME-2506 test guide, the timer will start to work and count down.
