## Exam CCFA-200b Objectives Pdf - 100% Professional Questions Pool

With great outcomes of the passing rate upon to 98-100 percent, our CCFA-200b practice engine is totally the perfect ones. We never boost our achievements on our CCFA-200b exam questions, and all we have been doing is trying to become more effective and perfect as your first choice, and determine to help you pass the CCFA-200b Study Materials as efficient as possible. Just to try on our CCFA-200b training guide, and you will love it.

## CrowdStrike Falcon Administrator Sample Questions (Q147-Q152):

**NEW QUESTION # 147**
What is the purpose of precedence with respect to the Sensor Update policy?

- A. Hosts assigned to multiple policies will assume the lowest ranked policy in the list (policy with the highest number)
- B. Hosts assigned to multiple policies will assume the highest ranked policy in the list (policy with the lowest number)

- C. Precedence ensures that conflicting policy settings are not set in the same policy
- D. Precedence applies to the Prevention policy and not to the Sensor Update policy

**Answer: B**

Explanation:
The purpose of precedence with respect to the Sensor Update policy is that hosts assigned to multiple policies will assume the highest ranked policy in the list (policy with the lowest number).
This means that if a host belongs to more than one group that has different Sensor Update policies assigned, it will use the policy that has the highest precedence (lowest number) among them. The other options are either incorrect or not related to precedence.

**NEW QUESTION # 148**
When a host belongs to more than one host group, how is sensor update precedence determined?

- A. Sensors of hosts that belong to more than one group must be manually updated
- B. Groups have no impact on sensor update policies
- C. All of the host's groups are examined in aggregate and the policy with highest precedence is applied to the host
- D. The highest precedence policy from the most important group is applied to the host

**Answer: C**

Explanation:
The option that describes how sensor update precedence is determined when a host belongs to more than one host group is that all of the host's groups are examined in aggregate and the policy with highest precedence is applied to the host. A Sensor Update policy is a policy that controls how and when the Falcon sensor is updated on a host. You can create and assign custom Sensor Update policies to different hosts or groups in your environment. Each Sensor Update policy has a precedence value, which determines its priority over other policies. The higher the precedence value, the higher the priority. If a host belongs to more than one host group, each with a different Sensor Update policy assigned, then all of the host's groups are examined in aggregate and the policy with highest precedence among them is applied to the host.

**NEW QUESTION # 149**
When uninstalling a sensor, which of the following is required if the 'Uninstall and maintenance protection' setting is enabled within the Sensor Update Policies?

- A. Bulk update key
- B. Maintenance token
- C. Customer ID (CID)
- D. Agent ID (AID)

**Answer: B**

Explanation:
When uninstalling a sensor, a maintenance token is required if the `Uninstall and maintenance protection' setting is enabled within the Sensor Update Policies. This setting prevents unauthorized or accidental uninstallation of sensors by requiring a token that can be generated from the Falcon console. The other options are either incorrect or not related to uninstalling a sensor.

**NEW QUESTION # 150**
In order to quarantine files on the host, what prevention policy settings must be enabled?

- A. Enable Malware Protection and Custom Execution Blocking
- B. Enable Behavior-Based Threat Prevention sliders and Advanced Remediation Actions
- C. Enable Malware Protection and Windows Anti-Malware Execution Blocking
- D. Enable Next-Gen Antivirus Prevention sliders and "Quarantine & Security Center Registration

**Answer: D**

Explanation:
The option that will enable Next-Gen Antivirus Prevention sliders and "Quarantine & Security Center Registration" is to enable

Malware Protection and Windows Anti-Malware Execution Blocking. Malware Protection is a feature that enables the Next-Gen Antivirus Prevention sliders, which allow you to adjust the level of sensitivity and aggressiveness of the Falcon sensor's machine learning engine, which uses artificial intelligence to identify and stop unknown threats.
Windows Anti- Malware Execution Blocking is a feature that enables the "Quarantine & Security Center Registration" setting, which allows you to quarantine malicious files and register them in the Windows Security Center.

**NEW QUESTION # 151**
An inactive host that does not contact the Falcon cloud will be automatically removed from the Host Management and Trash pages after how many days?

- A. 75 Days
- B. 60 Days
- C. 45 Days
- D. 90 Days

**Answer: D**

Explanation:
An inactive host that does not contact the Falcon cloud will be automatically removed from the Host Management and Trash pages after 90 days. An inactive host is a host that has not communicated with the Falcon platform for more than seven days. An inactive host will be moved from the Host Management page to the Trash page after seven days of inactivity. An inactive host will remain in the Trash page for 90 days before being permanently deleted from the Falcon platform. You can restore an inactive host from the Trash page if it becomes active again within
90 days.

**NEW QUESTION # 152**
.....

The results prove that DumpsFree's CCFA-200b dumps work the best. And this is the reason that our CCFA-200b exam questions are gaining wide popularity among the ambitious professionals who want to enhance their workability and career prospects. Our experts have developed them into a specific number of CCFA-200b questions and answers encompassing all the important portions of the exam. They have keenly studied the previous CCFA-200b Exam Papers and consulted the sources that contain the updated and latest information on the exam contents. The end result of these strenuous efforts is set of CCFA-200b dumps that are in every respect enlightening and relevant to your to actual needs.
