Salesforce Platform Developer I, Superbadge Apex Specialist, Superbadge Data Integration Specialist, Superbadge Aura Components Specialist and Superbadge Advance Apex Specialist Certification can act as a prerequisite for this exam.

Salesforce Platform Developer II Sample Questions (Q46-Q51):

NEW QUESTION # 46

Employee_c is a Child object of Company_c. The Company_c object has an external Id field Company_Id_c. How can a developer insert an Employee_c record linked to Company_c with a Company_Id_c of '999'?

Employee_c emp = new Employee_c(Name='Developer'); emp.Company_r = '999'

- A. insert emp;
Employee_c emp = new Employee_c(Name='Developer'); emp.Company_c = new
- B. **Company_r(Company_Id_c='999') insert emp;**
- C. Company_c(Company_Id_c='999') insert emp;
Employee_c emp = new Employee_c(Name='Developer'); emp.Company_r = new
- D. insert emp;
Employee_c emp = new Employee_c(Name='Developer'); emp.Company_c = '999'

Answer: B

NEW QUESTION # 47

What is the correct syntax for calling a controller action from a Visualforce page and updating part of the page once the action is completed? (Choose two.)

<apex:commandFunction action="{!Save}" value="Save" rendered="thePageBlock"/>

- A. **<apex:commandButton action="{!Save}" value="Save" redraw="thePageBlock"/>**
- B. <apex:actionFunction action="{!Save}" name="Save" rerender="thePageBlock"/>
- C. **rerender="thePageBlock"/>**
- D. <apex:actionSupport action="{!Save}" event="onchange">

Answer: A,C

Explanation:

Explanation

NEW QUESTION # 48

Consider the following code snippet:

□ As part of the deployment cycle, a developer creates the following test class:

□ When the test class runs, the assertion fails.

Which change should the developer implement in the Apex test method to ensure the test method executes successfully?

- A. □
- B. □
- C. □
- D. □

Answer: A

Explanation:

To ensure that test methods execute successfully and are able to verify the behavior of the code, it is important to set up the proper context and to make sure that the test covers the expected outcomes accurately.

* Option B is correct because enclosing the method call within Test.startTest() and Test.stopTest() ensures that any asynchronous operations are completed before the assertions are made. This is crucial when the code being tested is expected to perform operations that may run after the initial transaction, such as future methods, queueable jobs, or batch operations.

* Options A, C, and D are incorrect because they do not address the issue of ensuring that all operations are completed before the assertion is made. Option A incorrectly suggests modifying the test setup code, while Options C and D suggest changes that are not related to the test execution flow.

NEW QUESTION # 49

A developer is working on an integration between Salesforce and an external system. The integration requires sending a large amount of data to the external system, which can cause long response times and timeouts.

To optimize the performance and avoid timeouts, which technique should be used?

- A. Use a chained batch Apex to split the data into smaller batches.
- **B. Use the @future annotation to make the callout asynchronous.**
- C. Implement an asynchronous callout using the Continuation class,
- D. Increase the timeout limit in the callout options,

Answer: B

NEW QUESTION # 50

Consider the following code snippet:

How should <c-order> component communicate to the <c-order-order> component that an order has been selected by the user?

- **A. Create and fire a standard DOM event.**
- B. Created and fire an application event.
- C. Create and dispatch a custom event
- D. Create and fire a component event.

Answer: A
