Sometimes many people find they always have one begin that if I have money. . . . If so I advise you apply for an IT certification steadfastly. Nokia 4A0-113 valid exam questions and answers give an excellent beginning for your dream. If you pass exams and get a certification, you can obtain a high-salary job and realize your goal. 4A0-113 Valid Exam Questions and answers help you pass exam certainly. We have a series of products for IT certification exams.

ExamBoosts provide different training tools and resources to prepare for the Nokia 4A0-113 Exam. The preparation guide includes courses, practice test, test engine and part free PDF download.

The Best Accurate 4A0-113 Pdf Free – Find Shortcut to Pass 4A0-113 Exam

The test software used in our products is a perfect match for Windows' 4A0-113 learning material, which enables you to enjoy the best learning style on your computer. Our 4A0-113 study materials also use the latest science and technology to meet the new requirements of authoritative research material network learning. Unlike the traditional way of learning, the great benefit of our 4A0-113 Study Materials are that when the user finishes the exercise, he can get feedback in the fastest time.

Nokia 4A0-113 Exam is designed for networking professionals who want to validate their knowledge and skills in configuring and

troubleshooting the Nokia OSPF routing protocol. OSPF (Open Shortest Path First) is one of the most widely used routing protocols in the world, and it is essential for network engineers to have a strong grasp of its concepts and implementation.

Nokia OSPF Routing Protocol Exam Sample Questions (Q104-Q109):

NEW QUESTION # 104

Which of the following concerning OSPFv3 is TRUE?

- A. NSSA is supported in OSPFv3.
- B. OSPFv3 uses MD5 Authentication.
- C. Router LSAs carry IPv6 prefix information.
- D. OSPFv3 uses a 64-bit router ID.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract (Nokia 7750 SR OS Routing Protocols Guide

- OSPFv3 Differences from OSPFv2):

OSPFv3 supports NSSA (same as OSPFv2).

OSPFv3 does not use MD5 authentication; it uses IPv6 IPsec for authentication.

Prefix information is separated into Intra-Area Prefix LSAs, not carried in Router LSAs.

Router ID remains 32-bit even in OSPFv3.

Thus, correct answer: C.

NEW QUESTION # 105

Click the exhibit button.

The following command sequence is executed on router R2:

- A. R2# configure router ospf router-id 10.10.10.99
 - B. 10.10.10.1
 - C. 10.10.10.66
 - D. 10.10.10.2
 - E. R2# configure router router-id 10.10.10.66
- On router R1, what router ID appears for router R2 directly after these commands are executed?
- F. 10.10.10.99

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (Router ID Selection):

"The OSPF router ID configured under the OSPF context overrides the global router ID configured under the general router

context." Since "configure router ospf router-id 10.10.10.99" was applied, this takes precedence for OSPF operation, even though

"configure router router-id 10.10.10.66" was configured globally.

Thus, router R1 will see router R2's OSPF router ID as 10.10.10.99.

-

NEW QUESTION # 106

An operator configures an Nokia 7750 SR with a loopback interface and IPv6 address. The operator then configures a routing policy to redistribute the loopback prefix into OSPFv3. What type of LSA is used to advertise the route to other OSPFv3 routers in the same area?

- A. Inter-Area Prefix LSA
- B. None of the statements are correct.
- C. AS External LSA
- D. Intra-Area Prefix LSA
- E. Network LSA
- F. Router LSA

Answer: C

NEW QUESTION # 107

Which LSA type is not found in point-to-point only OSPF networks?

- A. Type 5 External LSA
- B. Type 1 Router LSA
- C. Type 3 Summary LSA
- **D. Type 2 Network LSA**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract (Nokia 7750 SR OS Routing Protocols Guide - OSPF LSA Types and Network Types):

Type 1 Router LSA - always generated, carries router topology info.

Type 2 Network LSA - generated only on broadcast or NBMA networks by DR.

Type 3 Summary LSA - used for inter-area route advertisement.

Type 5 External LSA - used for AS external routes (generated by ASBRs).

Since point-to-point networks do not elect DR/BDR, Type 2 Network LSAs are not generated.

Thus, correct answer: B.

-

NEW QUESTION # 108

When are virtual links used in OSPF?

- **A. When an area needs to traverse another area to reach area 0.**
- B. When an area needs to connect directly to another area without using area 0.
- C. When two areas are connected to area 0, but there is no direct path between them.
- D. When two areas need to communicate and there is no area 0.

Answer: A

NEW QUESTION # 109

.....

For candidates who will buy 4A0-113 training materials online, they may pay more attention to privacy protection. We respect your private information, and your personal identification information will be protected well if you choose us. Once the order finishes, your personal information will be concealed. In addition, 4A0-113 Exam Dumps contain not only quality but also certain quantity. It will be enough for you to pass the exam. In order to build up your confidence for 4A0-113 exam dumps, we are pass guarantee and money back guarantee, if you fail to pass the exam, we will give you full refund.
